FURUNIVERSE DIGITAL PRESERVATION ARCHIVE

BY STEPHEN T. FLINT
AKA RINTY SKYCOYOTE

DISCLAIMER:

This full-page document book—including all 149 pages and 10 extra pages (Part of the Furuniverse Reality Basement Collection Extras) previously shared—contains elements of a fictional narrative concept, alongside creative interests and storytelling involving school life, childhood, teenage years, and other personal-style experiences.

Some sections may include **sensitive themes** such as **tragedy, disaster, violence, or emotionally intense topics** that may be unsettling to some readers.

However, this content **does NOT condone, endorse, support, or celebrate** any **real-world tragedies, crimes, infamous individuals, disasters, violence, deaths, or harmful events**.

The **Furuniverse** and other **dimensions/realities** depicted in this work are **largely fictional** and are **not based on real-world events, real-life people, real-life animals, companies, religions, or historical occurrences**—whether **famous, infamous, remembered, forgotten, living, or deceased**.

This is a **fictional narrative concept–based on a creative framework**. It is **NOT a real-world claim**, does **NOT represent verified reality**, and should **NOT be interpreted as factual description** of real-world systems or events.

The material exists as a **creative and reflective universe shaped by imagination and storytelling**. While it may explore **complex or sensitive topics**, complexity does **NOT imply endorsement, real-world equivalence, or that something has gone wrong**—it simply reflects **multiple interacting narrative elements**.

Please **respect this work** and do **not harass, bully, or contact any individuals mentioned, including the creator**. This content is shared for **creative, reflective, and documentary purposes only**. Any resemblance to real people or events is **purely coincidental unless explicitly stated**.

Sit back, relax, and explore this work as a fictional creative universe.

READER DISCRETION IS ADVISED.

UNEXPECTED NOTE: THIS IS MY UNUSUAL EXPECTATIONS 😂🤣:
I’m just some autistic people who develop the belief system (which that exists as part of the Furuniverse framework and is not intended to describe real-world reality or scientifically verified outcomes) so much further, but at that time please come join us for the one-step reincarnation or two-step reincarnation, which any furry species you want to be reincarnated or to be reborn, but as a newborn for starting a new family to believe yourselves for living in the alternative real-life reality and please don't be like me, but if you are a furry, reversing ages must be between 13 to 17 years old, but if you're under 15 for being a furry, so someday you'll be a tall furry person! Heights must be between 6'0" to 6'6" or 183 CM to 198 CM as a male and between 5'9" to 6'0" or 175.2 CM to 183 CM as a female, weight must be a healthy or normal weight, furry species must be a bat, bear, canine, deer, dragon, Dutch Angel Dragon (there’s no way that they would join), feline, hybrid like folf, fusky or other kinds of hybrids, hyena, kangaroo, otter, rabbit, raccoon and skunk, and years must be between 1998 to present and some of your memories and knowledges won't fade or reset and obviously I don't mind if you furries want to have a star pupil on your eye, but only if you female furries can choose heart pupils or star pupils on your eye if you're being transformed into a furry after your death where you'll be waken up and appeared in the cryonic in Advanced Cryogenic Research Lab in HIVAC Fort Combine (babyfurs, LGBTQ furries and predator furries are not allowed), but if you are a non-furry, animal artist, or a therian, so, hopefully you'll believe that you would be reborn as which any anthro species you want to be reborn, but as a newborn for starting a new family and must be between as upper middle-class family to rich family, years must be between 1997 to present, planets would be from Furoria, Velirum, Huskarra, and other habitable furry planets or maybe some of you therians (and animal artists, which most of your memories and knowledges will fade) will be two-step reincarnation to be reincarnated as any anthro species, which your memories and knowledges will be faded away before rebirth like me or one-step reincarnation, but reversing ages must be between 10 to 16 years old, years must be between mid-1995 to present, heights must be between 6'0" to 6'4" or 183 CM to 193 CM as a male and 5'8" to 5'11" or 172.7 to 180.3 CM as a female, but if you're a child therian, so someday you'll be tall therian person! Therian species must be a canine, deer, feline, hyena, rabbit, raccoon, and skunk, and weight must be healthy or normal weight. However, I don't mind if you therians want to have a star pupil on your eye, but only if you female therians can choose heart pupils or star pupils on your eye if being reincarnated as an anthropomorphic animal after your death where you'll be woken up and appeared in these bedrooms in HIVAC Fort Combine the very famous underground Laboratory military base, and it's a magic appearance if you therians seeing this and whatever you want to choose, but not all of you guys might understand this and that's okay.
Four collective terms of anthro species that is native to Furoria and other habitable planets in the Furuniverse:

Peditrans/Therians:

Lifespan: 110-200 Years.

1. Anthro Canines;
2. Anthro Felines;
3. Anthro Hyenas;
4. Anthro Bears;
5. Anthro Kangaroos;
6. Anthro Beavers;
7. Anthro Horses;
8. Anthro Raccoons;
9. Anthro deer;
10. Anthro Otters;
11. Anthro Hogs;
12. Anthro Pigs;
13. Anthro Goats;
14. Anthro Sheep (Only One of Peditrans/Therian-Altertherian Hybrid Anthro Species);
15. Anthro Bunnies/Rabbits;
16. Anthro Elks;

17. Anthro Bats (Which they live in Velirum and other habitable planets in the Furuniverse, especially outside of Furoria);
18. Anthro Caribous;
19. Anthro Reindeer (Anthro Elks, Anthro Caribous, & Anthro Reindeer Are Considered Altertherians);
20. Anthro Llamas.

Altertherians:

Lifespan: 110-200 Years.

1. Anthro Cows;
2. Anthro Sheep (Only One of Peditrans/Therian-Altertherian Hybrid Anthro Species);
3. Anthro Gazelles;
4. Anthro Mooses;
5. Anthro Bulls;
6. Anthro Oryxs;
7. Anthro Koalas;
8. Anthro Donkeys;
9. Anthro Opossums/Possums;
10. Anthro Rats;
11. Anthro Mouses;
12. Anthro Squirrels;
13. Anthro Zebras;
14. Anthro Weasels;
15. Anthro Yaks;
16. Anthro Pinemartins;
17. Anthro Rams;
18. Anthro Ferrets;
19. Anthro Capybaras;
20. Anthro Buffalos.

Primatarins:

Lifespan: 130-180 Years.

1. Anthro Monkeys;
2. Anthro Chimpanzees;
3. Anthro Gorillas;
4. Anthro Macaques;
5. Anthro Capuchins;
6. Anthro Baboons;
7. Anthro Lemurs (Usually they act animal sounds and their lifespan is around 100-120 years).

Berdorons:

Lifespan: 120-140 Years.

1. Anthro Ducks;
2. Anthro Pelicans.

11 planets in the Furstar System where I created:

All 5 terrestrial planets that are inside the orbit of the Paw Star belt:

1. Ketho (1st)
2. Pexon (2nd)
3. Huskarra (3rd)
4. Furoria (4th)
5. Velirum (5th)

All 5 jovian planets and one dwarf planet that are outside the orbit of the Paw Star belt and the inside orbit of the Echopaw belt:

1. Jovira (6th)
2. Skythos (7th)
3. Furvaan (8th)
4. Thera (9th)
5. Zynthos (10th)
6. Korsh (11th which is a last planet in the Furstar System, but it's a dwarf planet)

11 planets in the Furstar System in size between with KM & Miles (where I wrote on my journals):

Size in kilometers:

- Middle of the Furstar System - Fursun - 2,275,874 KM in diameter and 1,137,937 KM in radius;
- 1st planet from the Fursun - Ketho - 8,919 KM in diameter and 4,459.7 KM in radius;
- 2nd planet from the Fursun - Pexon - 13,007.7 KM in diameter and 6,505.7 KM in radius;
- 3rd planet from the Fursun - Huskarra - 62,436 KM in diameter and 31,218 KM in radius;
- 4th planet from the Fursun - Furoria - 63,710 KM in diameter and 31,855 KM in radius;
- Natural satellite that is orbiting Furoria - Furmoon - 3,498 KM in diameter and 1,749 KM in radius;
- 5th planet from the Fursun - Velirum - 57,339 KM in diameter and 28,670 KM in radius;
- 6th planet from the Fursun - Jovira - 501,382 KM in diameter and 250,691 KM in radius;
- 7th planet from the Fursun - Skythos - 28,878 KM in diameter and 14,439 KM in radius;
- 8th planet from the Fursun - Furvaan - 438,976 KM in diameter and 219,488 KM in radius;
- 9th planet from the Fursun - Thera 115,099 KM in diameter and 57,549.5 KM in radius;
- 10th planet from the Fursun - Zynthos - 98,251 KM in diameter and 49,125.5 KM in radius;
- 11th planet from the Fursun - Korsh - 4,852 KM in diameter and 2,426 KM in radius.

Size in miles:

- Middle of the Furstar System - Fursun - 1,414,806 miles in diameter and 707,403 miles in radius;
- 1st planet from the Fursun - Ketho - 5,543.9 miles in diameter and 2,771.2 miles in radius;
- 2nd planet from the Fursun - Pexon - 8,082.3 miles in diameter and 4,041.15 miles in radius;
- 3rd planet from the Fursun - Huskarra - 38,798 miles in diameter and 19,399 miles in radius;
- 4th planet from the Fursun - Furoria - 39,593 miles in diameter and 19,795 miles in radius;
- Natural satellite that is orbiting Furoria - Furmoon - 2,173.5 miles in diameter and 1.086.8 miles in radius;
- 5th planet from the Fursun - Velirum - 35,631 miles in diameter and 17,816 miles in radius;
- 6th planet from the Fursun - Jovira - 311,547.2 miles in diameter and 155,773.6 miles in radius;
- 7th planet from the Fursun - Skythos - 17,947 miles in diameter and 8,973.5 miles in radius;
- 8th planet from the Fursun - Furvaan - 272,747.6 miles in diameter and 136,373.8 miles in radius;
- 9th planet from the Fursun - Thera 71,506.1 miles in diameter and 35,753.1 miles in radius;
- 10th planet from the Fursun - Zynthos - 61,051.2 miles in diameter and 30,525.6 miles in radius;
- 11th planet from the Fursun - Korsh - 4,852 miles in diameter and 2,426 miles in radius.

The Furuniverse's Age of Things (Excluding Wolf Titans, Supra Titans, Navara Titans, Hilux Titans, Fox Titans, Kitsune Titans, & Coyote Titans The Nicest Mysterious Cosmic Creatures):

- The Furstar System - 700 Trillion Years Old
- The Furuniverse - Estimated 1.2 Quadrillion Years Old
- The One Paw of God - Quadrillion Years Old

11 Planets Age:

1. Ketho - 698.88 Trillion Years Old

2. Pexon - 698.91 Trillion Years Old
3. Huskarra - 698.98 Trillion Years Old
4. Furoria - 699.01 Trillion Years Old
5. Velirum - 699.05 Trillion Years Old
6. Paw Star Belt (or Paw Star System) - 699.98 Trillion Years Old
7. Jovira - 699.95 Trillion Years Old
8. Skythos - 699.95 Trillion Years Old
9. Furvaan - 699.95 Trillion Years Old
10. Thera - 699.90 Trillion Years Old
11. Zynthos - 699.79 Trillion Years Old
12. Korsh - 699.45 Trillion Years Old
13. Echo Paw Belt - 699.98 Trillion Years Old

10 Continents and 22 Countries on Furoria the hyper-Earth planet (A to Z):

Clawsha:

- Ducklandia (As of transcontinental country located in Clawsha, and it's a state that is the part of Ducklandia)

Darrakoon:

- Darrakoon (As of continental county)

Glacithra:

- Neutral

Halimah:

- United Halimah Arabia (As of transcontinental country located in Halimah)

Nordicavire:

1. Furolish Kingdom
2. Kingdom of Karellaberg
3. Nordicaviran Union
4. Ruskarra (As of transcontinental country located in Eastern Nordicavire)
5. Slavania

North Auratheria:

1. Canidland
2. Cubén
3. Monkania
4. Somborerio
5. United Federal States (United Federal States of Auratheria)

Pawveria:

- Neutral

South Auratheria:

1. Perterrio
2. Suria

Xianyora:

1. Chingduo
2. Ducklandia (As of transcontinental country located in South Xianyora)
3. Furon
4. Liberen
5. Pankhdesh Raj
6. Ruskarra (As of transcontinental country located in North Xianyora)
7. Valkoraya
8. United Halimah Arabia (As of transcontinental country located in West Xianyora)

Zulekore:

1. South Zulekore LeSimba
2. United Halimah Arabia (As of transcontinental country located in North Zulekore)
3. Zulekorese Union

Northern Oceans:

1. Slytherian Ocean;
2. Elyvian.

Middle Oceans:

1. Veykara Ocean;
2. Numirian Oceans;
3. Orinave Ocean.

Southern Oceans:

1. Duskarin Ocean;
2. Glacithric Ocean.

Heights of anthro species in the furuniverse, including Furoria:

Anthro Canines:

- Around 6’1”-6’6” as a Male
- Around 5’9”-6’2” as a Female

Anthro Felines:

- Around 5’11”-6’6” as a Male
- Around 5’8”-6’2” as a Female

Anthro Hyenas:

- Around 6’0.5”-6’5” as a Male
- Around 5’9”-6’1.5” as a Female

Peditrans/Therians:

- Around 5’11”-6’8” as a Male
- Around 5’8”-6’3” as a Female

Altertherians:

- Around 6’0”-6’10” as a Male
- Around 5’8”-6’5” as a Female

Berdorons:

- Around 5’11”-6’4.5” as a Male
- Around 5’8”-6’0” as a Female

Primatarins (Excluding Anthro Lemurs):

- Around 5’9”-6’4” as a Male (Sometimes They're Tall)
- Around 5’6.5”-5’11” as a Female (Sometimes They're Tall)

Including Anthro Lemurs:

- Around 5’11”-6’4” as a Male
- Around 5’9”-6’0” as a Female

Berdorons & Primatarins (excluding anthro lemurs) have abnormal biology and genetics, but usually very strong and their visions are pretty normal (and colourful) because their night visions are weak during nighttime, like humans do, but they don't act animal sounds at all; Petidrans/Therians & Altertherians have highly advanced and powerful biology and genetics, also, anthro canines, anthro felines, and anthro hyenas have powerful vision, including colourful vision, night vision during nighttime, high resolution, and motion tracking; rest of Peditrans/Therians & Altertherians have powerful vision, including colourful vision, night vision during nighttime, but not as strong as anthro canines’, anthro felines’, and anthro hyenas’ night vision during nighttime, high resolution, and motion tracking, such as anthro bulls, anthro hogs, anthro pigs, anthro goats, anthro sheep (the only Peditran/Therian-Altertherian hybrid species), anthro cows, and anthro donkeys have their extreme abnormal biology and genetics and their vision are very abnormal (and colourful), but they also do act animal sounds, and anthro canines, anthro felines, and anthro hyenas too. However, they don't feel pain, fear, and suffering, even though and muscles are uncuttable, unbreakable, and unkillable too, including furries, therians, furry-therian hybrids, anthro animals (as of animal artists) too, but if you are a furry, therian, furry and therian, which you identified both, or an animal artist!

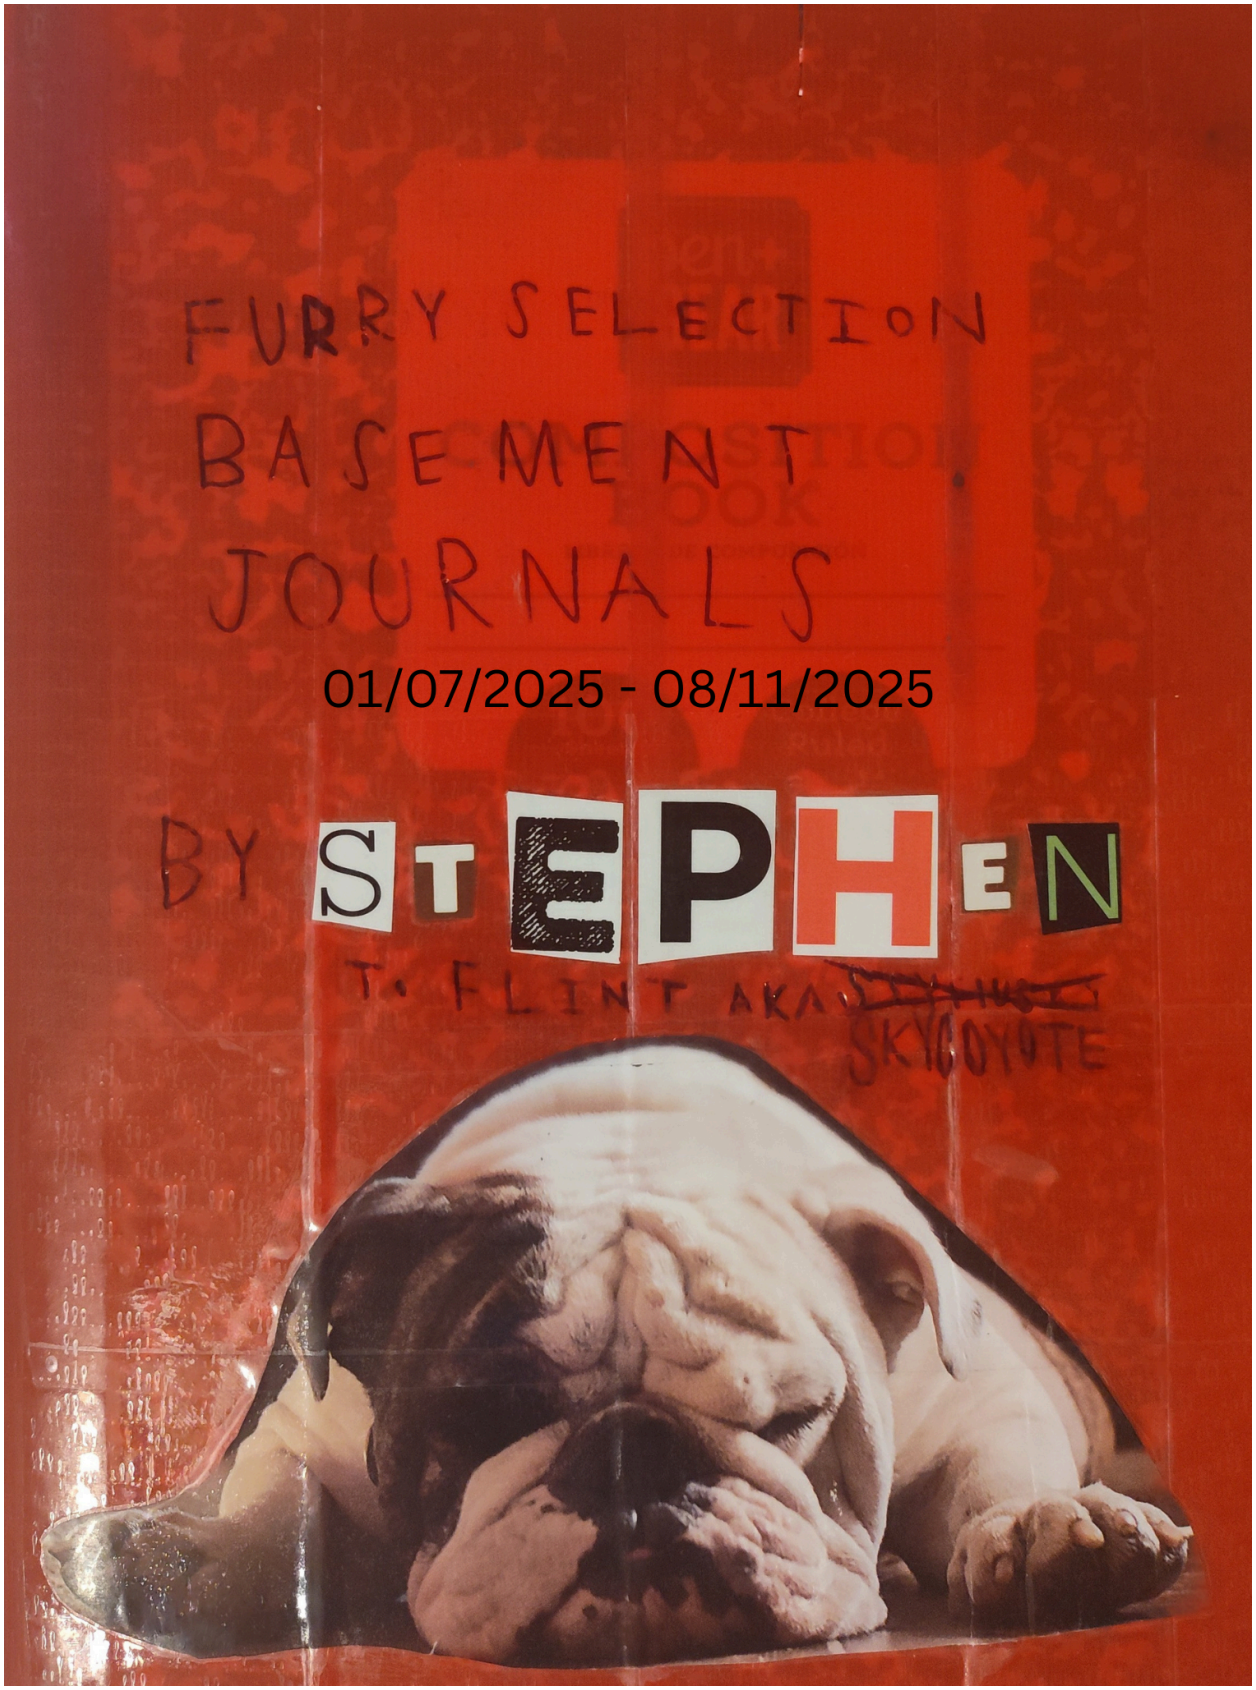
USUALLY, including MARINIANS & REPTILIANS EXIST OUTSIDE OF FURORIA, AND THEY HAVE HIGHLY ADVANCED AND POWERFUL BIOLOGY, AND POWERFUL VISION, JUST LIKE ANTHRO CANINES, ANTHRO FELINES, AND ANTHRO HYENAS, HOWEVER THEY DON’T FEEL PAIN, FEAR, AND SUFFERING AT ALL EITHER AS WHY!!!

24th of December, 2024

So I recently do believe in furries in real life and pretty much instead of that, but I believe that I would be reincarnated as a furry, but starting a new life as a baby furry husky girl, but living in the different world, different universe, living in modern day included with different furry species, cities, small towns, urbans, the Internet, schools, vehicles, included with no gun violence anymore since all guns are banned in some countries it's because some countries use guns only use for military use, and everything else in the new world more like a furry world and since everyone is a furry more like anthropomorphic animals so I would join it in real life like become a child or teen influencer as a furry husky girl after I die no joke at all, but I would imagine that I'm just some kid who believes in goddess, but in a furry version not a human version and instead of that I believe in Amaterasu, but I prefer Amaterasu the furry white wolf more than a human and I am the only one who believes in goddess only Amaterasu the furry white wolf like in *Ōkami* version for real.

I would imagine that I always believe in afterlife so my afterlife plan is I would be reincarnated as a furry husky girl, but starting a new life as a baby furry husky girl, but born into upper-class family more like wealthy-class family so I would join it in real life for real since I will be live in different reality, having new furry friends, have a social life, be friendly, become a famous child or teen influencer, stay positive, and more, but I can almost guarantee for instead that I will be lucky to have a chance to not to think about death and it's not fun to think about 'cause it's unsettling and uncomfortable, but apparently, I've been think about afterlife too much and I don't know why I guess I have think something it's positive like try something else new instead like become a painter or a furry artist to make much money, but pretty often though so yeah, but I strongly believed that I will be reborn as a furry husky girl, but born into upper-class family more like wealthy-class family, but starting a new life as a baby furry husky girl living a different world, but a furry world, included cities, small towns, urbans, the Internet, video games, houses, schools, vehicles, small cities, medium cities, big cities, Disney movies and movies are distributed by different companies, no gun violence anymore in some countries 'cause some countries banned all of civilian use firearms it's because firearms only use for a military and defence forces and law enforcement use and everything else is in the furry world so I can join it in real life to have new family like have new mother she is 5 foot 9 inches or 175 centimetres tall and have new father he is 6 feet 2 inches or 188 centimetres tall, but there are furry huskies so I will have new parents who is a wealthy furry husky were above average and being nice to each other and have new siblings like few numbers of older or younger siblings who are furries, but breeds are huskies so I can become a child or teen influencer as a furry husky girl after I die for real, but that's my afterlife plan for my opinion and that's pretty much it what I had to say.

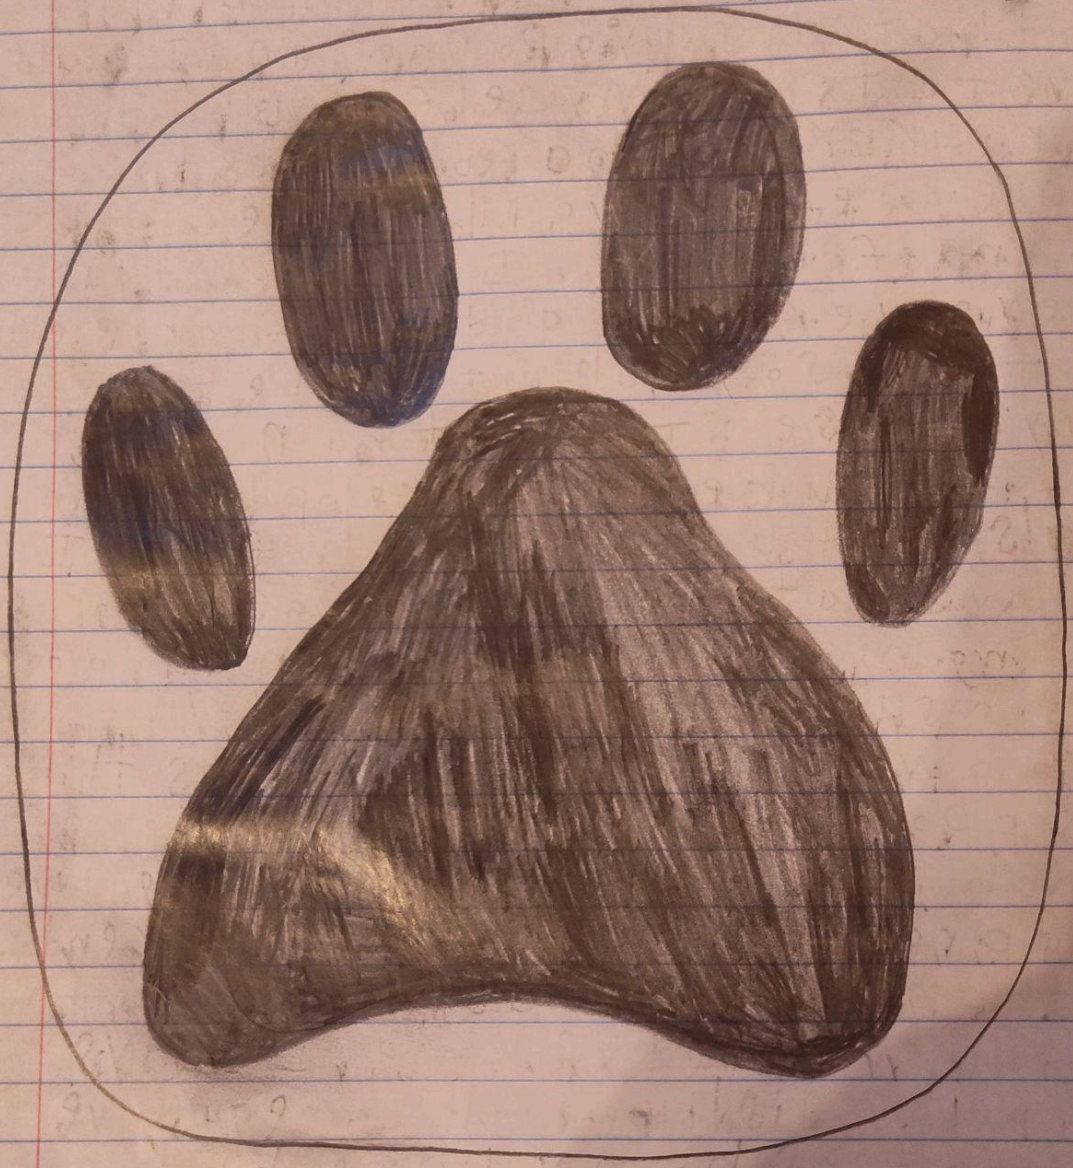
This is my first development for my fictional narrative concept, and its titled "FurryManforme Talks About Believe In Furries" and it was published on December 25th, 2024 as of Christmas Day on DeviantART under username "MyJournalWritings", where I started to develop my fictional narrative concept by myself since late-2024, but unfortunately it's not that great due to mixture of natural, average, and unnatural wordings.



FURRY SELECTION
BASEMENT
JOURNALS
01/07/2025 - 08/11/2025
BY STEPHEN
T. FLINT AKA
SKYCOYOTE

For my opinion I'm interested in firearms no joke it's because of that it's my opinion and I would have to train myself to shoot a firearm if I have chance to host someone so I would appreciate it and for last, I prefer to use a revolver and a double-barreled shotgun so yeah it's a better way to use it for a training for my future training plan for my goals, but unfortunately for me, I always hate being loneliness for living my own life so much and proof this sucks for my opinion. - 7th of Jan. 2025
I know I hate my parents think I support any harmful actions which isn't good, which as negative and proof I do not condone or endorse with any harmful actions, but unfortunately for me, I always strongly disliked those negative responses by my parents due to it's inappropriate response and man... this sucks... I know it's hard sometimes, but it happens and proof that this entire planet is so tough for everybody on this planet. - 8th to 10th of January, 2025 (Edited - 04/07/25)

10th to 11th of January, 2025
(Edited-05/24/25)



WOOF!!!

11th of Jan. to 23rd of Feb. 2025
Over the last few weeks, I've published the document about believe in furries in real life and believe in goddess, but only Amaterasu the furry white wolf in ōkami version on DeviantArt and that document makes me strongly believed how I feel about believe in furries and goddess, but in furry version so I decided that I wanted to die and reincarnated as a furry husky girl, but starting a new life as a baby furry husky girl, but born into upper-class furry family to have a new family plus new few siblings plus new parents who are tall like mother: 5'9" or 175 CM and father: 6'2" or 188 CM since they're both tall and both of them are furry huskies, but living in the furry world more like a new world included with different furry species, cities, small towns, urbans, the Internet, schools like elementary schools, middle schools, high schools, colleges, and universities, tall buildings, average buildings, small buildings, vehicles, included with less Criminals in many countries, included

PART I

11th of Jan. to 23rd of Feb. 2025
with no gun violence anymore in many countries since all civilian use guns are banned in many countries it's because many countries use guns use for military and defence forces and law enforcement use only since there will be less mass shootings, less school shootings except included some of deadliest school mass sacres which one of them has more than 500 deaths including with two truck bombs located in front side and back side of the high school with 2 floors plus two gunmen, one of them is a 16-year-old sophomore student loaded with a M4 carbine assault rifle, G3 Semi-automatic Sniper rifle included with duct tape covered on pistol grip and two pump action shotguns that are converted into pistol grip covered with heavily taped with dozens of grey duct tapes and clear duct tapes, two bayonets one of them is located on front of the M4 carbine, 50 explosive devices military backpack, and one revolver that inspired from the videogame, his furry species is a monkey, average sized, wearing grey t-shirt it says "ONE-LIFE",

PART II

11th of Jan. to 23rd of Feb. 2025:
military boots, military combat pants, and military trench jacket when he took off and left it on the truck and one of them is a 17-year-old senior student loaded with M249 light machinegun, M240 light machine gun, Sawed-off double-barreled shotgun, rocket-propelled grenade launcher, submachine pistol, one bayonet, one dagger, military back pack, 8 propane bombs, and 18 pipe bombs that inspired from the video game too as well, his furry species is a black duck, above average size the person who is 6'1" or 185 CM, wearing white t-shirt it says "WARRIOR OF GOD", military boots, military combat boots, and military trench jacket too as well when he took off and left it on the truck since before planning for an attack where two students entered the high school and opening fire on the hall ways and those classmates after they set up those explosives where it's located in cafeteria, some of restroom locations, and some of hall ways and successfully detonated these explosives inside of school and truck bombs outside of school causes huge explosion before taking their own lives after they entered the library which was occurred in April 1999 close to the 10th,

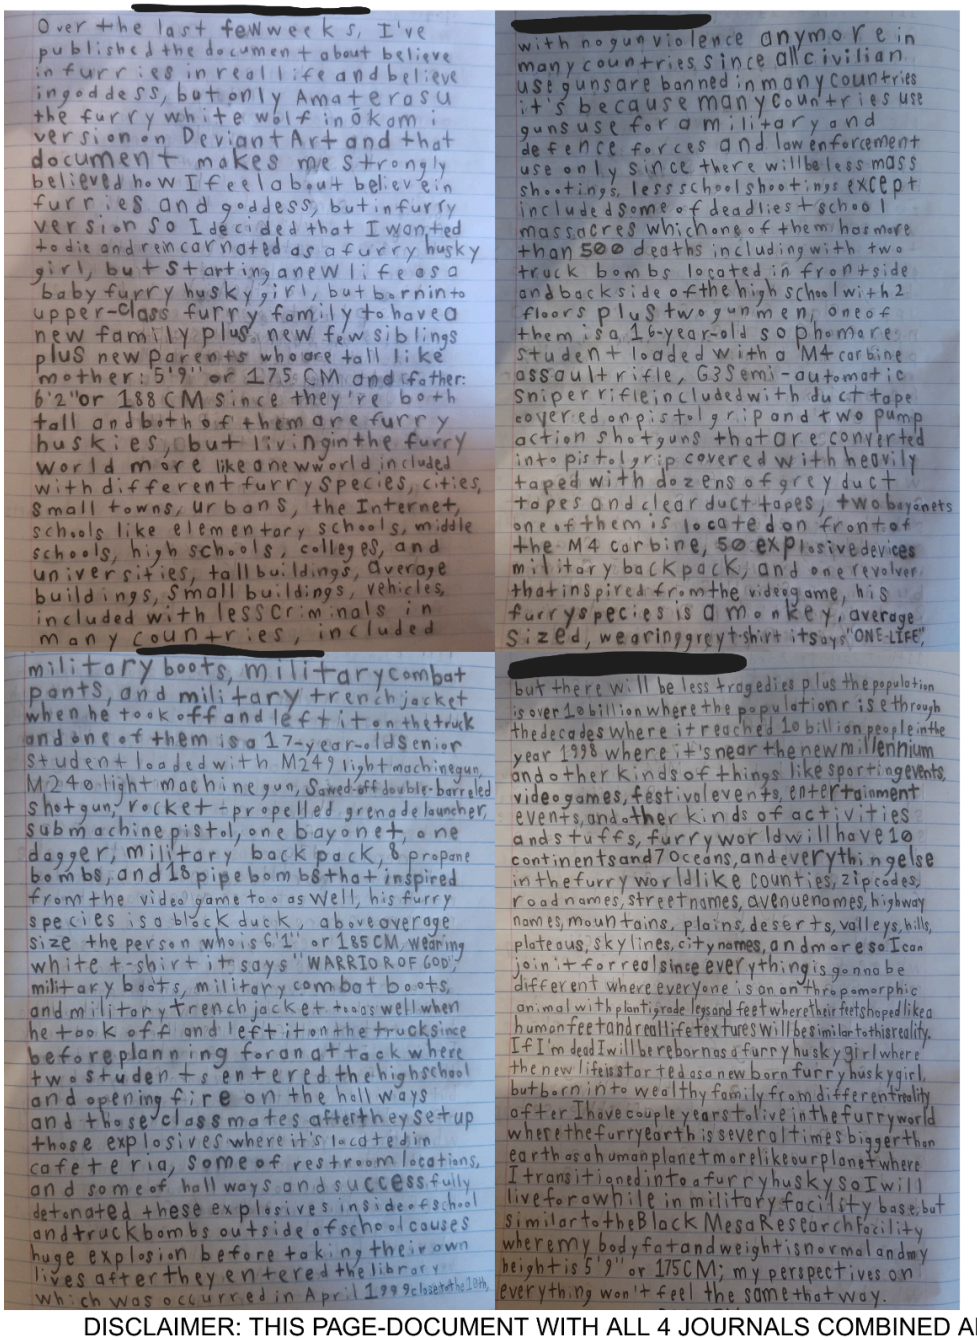
PART III

11th of Jan. to 23rd of Feb. 2025

but there will be less tragedies plus the population is over 10 billion where the population rise through the decades where it reached 10 billion people in the year 1998 where it's near the new millennium and other kinds of things like sporting events, video games, festival events, entertainment events, and other kinds of activities and stuffs, furry world will have 10 continents and 7 oceans, and everything else in the furry world like counties, zip codes, road names, street names, avenue names, highway names, mountains, plains, deserts, valleys, hills, plateaus, skylines, city names, and more so I can join it for real since everything is gonna be different where everyone is an anthropomorphic animal with plantigrade legs and feet where their feet shaped like a human feet and real life textures will be similar to this reality. If I'm dead I will be reborn as a furry husky girl where the new life is started as a new born furry husky girl, but born into wealthy family from different reality after I have couple years to live in the furry world where the furry earth is several times bigger than earth as a human planet more like our planet where I transitioned into a furry husky so I will live for a while in military facility base, but similar to the Black Mesa Research facility where my body fat and weight is normal and my height is 5'9" or 175CM; my perspectives on everything won't feel the same that way.

PART IV

NOTE: THIS IS MY EARLY DEVELOPMENT OF MY PERSONAL BELIEF AND THERE ARE ALL 4 OF MY JOURNAL PARTS THAT ARE COMBINED, BUT SOME OF MY PREVIOUS JOURNALS ON FURRY SELECTION BASEMENT JOURNALS KINDA SUCK.



Over the last few weeks, I've published the document about believe in furries in real life and believe in goddess, but only Amaterasu the furry white wolf in okami version on DeviantArt and that document makes me strongly believed how I feel about believe in furries and goddess, but in furry version so I decided that I wanted to die and reincarnated as a furry husky girl, but starting a new life as a baby furry husky girl, but born into upper-class furry family to have a new family plus new few siblings plus new parents who are tall like mother: 5'9" or 175 CM and father: 6'2" or 188 CM since they're both tall and both of them are furry huskies, but living in the furry world more like a new world included with different furry species, cities, small towns, urbans, the Internet, schools like elementary schools, middle schools, high schools, colleges, and universities, tall buildings, average buildings, small buildings, vehicles, included with less criminals in many countries, included

with no gun violence anymore in many countries since all civilian use guns are banned in many countries it's because many countries use guns use for a military and defence forces and law enforcement use only since there will be less mass shootings, less school shootings except include some of deadliest school massacres which one of them has more than 500 deaths including with two truck bombs located in front side and back side of the high school with 2 floors plus two gunmen, one of them is a 16-year-old sophomore student loaded with a M4 carbine assault rifle, G3 Semi-automatic Sniper rifle included with duct tape covered on pistol grip and two pump action shotguns that are converted into pistol grip covered with heavily taped with dozens of grey duct tapes and clear duct tapes, two bayonets one of them is located on front of the M4 carbine, 50 explosive devices military backpack, and one revolver that inspired from the videogame, his furry species is a monkey, average sized, wearing grey t-shirt it says "ONE-LIFE",

military boots, military combat pants, and military trench jacket when he took off and left it on the truck and one of them is a 17-year-old senior student loaded with M249 light machinegun, M240 light machinegun, Sawed-off double-barreled shotgun, rocket-propelled grenade launcher, submachine pistol, one bayonet, one dagger, military backpack, 8 propane bombs, and 18 pipe bombs that inspired from the video game too as well, his furry species is a black duck, above average size the person who is 6'1" or 185 CM, wearing white t-shirt it says "WARRIOR OF GOD", military boots, military combat boots, and military trench jacket too as well when he took off and left it on the truck since before planning for an attack where two students entered the high school and opening fire on the hall ways and those classmates after they set up those explosives where it's located in cafeteria, some of restroom locations, and some of hall ways and successfully detonated these explosives inside of school and truck bombs outside of school causes huge explosion before taking their own lives after they entered the library which was occurred in April 1999 closer to the 20th,

but there will be less tragedies plus the population is over 10 billion where the population rise through the decades where it reached 10 billion people in the year 1998 where it's near the new millennium and other kinds of things like sporting events, video games, festival events, entertainment events, and other kinds of activities and stuffs, furry world will have 10 continents and 70 oceans, and everything else in the furry world like counties, zip codes, road names, street names, avenue names, highway names, mountains, plains, deserts, valleys, hills, plateaus, skylines, city names, and more so I can join it for real since everything is gonna be different where everyone is an anthropomorphic animal with plantigrade legs and feet where their feet shaped like a human feet and real life textures will be similar to this reality. If I'm dead I will be reborn as a furry husky girl where the new life is started as a new born furry husky girl, but born into wealthy family from different reality after I have couple years to live in the furry world where the furry earth is several times bigger than earth as a human planet more like our planet where I transitioned into a furry husky so I will live for a while in military facility base, but similar to the Black Mesa Research facility where my body fat and weight is normal and my height is 5'9" or 175 CM; my perspectives on everything won't feel the same that way.

ALL 4 PARTS

DISCLAIMER: THIS PAGE-DOCUMENT WITH ALL 4 JOURNALS COMBINED ABOUT MY EARLY DEVELOPMENT OF THE FURUNIVERSE IS NOT BASED ON REAL-WORLD TRAGIC EVENTS, REAL-LIFE PEOPLE; WHETHER THEY BE LIVING OR DECEASED, AND OTHER REAL THINGS LIKE EARTH CULTURE, HUMAN HISTORY, RELIGION, VIOLENCE, AND OTHER TYPES OF STUFF. THIS IS JUST ABOUT THE DIFFERENT REALITY, DESIGNED AS ONE OF THE BEST REALITIES TO LIVE IN FOR MY EARLY DEVELOPMENT.

23rd of February, 2025
15 things that I love:
1. Furries

2. Therians

3. Being a rich person

4. Warrior Cats

5. Video games (like Half-Life, ATS, ETS2, or other games I love to play.)
6. Sleeping

7. Tacos

8. Sushi

9. Salads

10. Fettuccine Alfredo

11. Guns (Notice that I don't even have a chance to open up the gun safe)
12. Girls

13. Art

14. Memes

15. Computers

25th of February, 2025
15 things that I hate:
1. School

2. Geometry

3. Algebra

4. Being a poor person.

5. Being a lonely person (for doing hard work on my own).
6. Living own life with no money.

7. negative responses (back in March of 2024, I did had sensitive responses from my dad and I hate that kind of these responses).
8. Living own life for being a strict person.

9. When someone gets too pissed or having meltdown (it makes me feel scared when I look at it during in class).
10. Being trapped inside the house due to my parents.

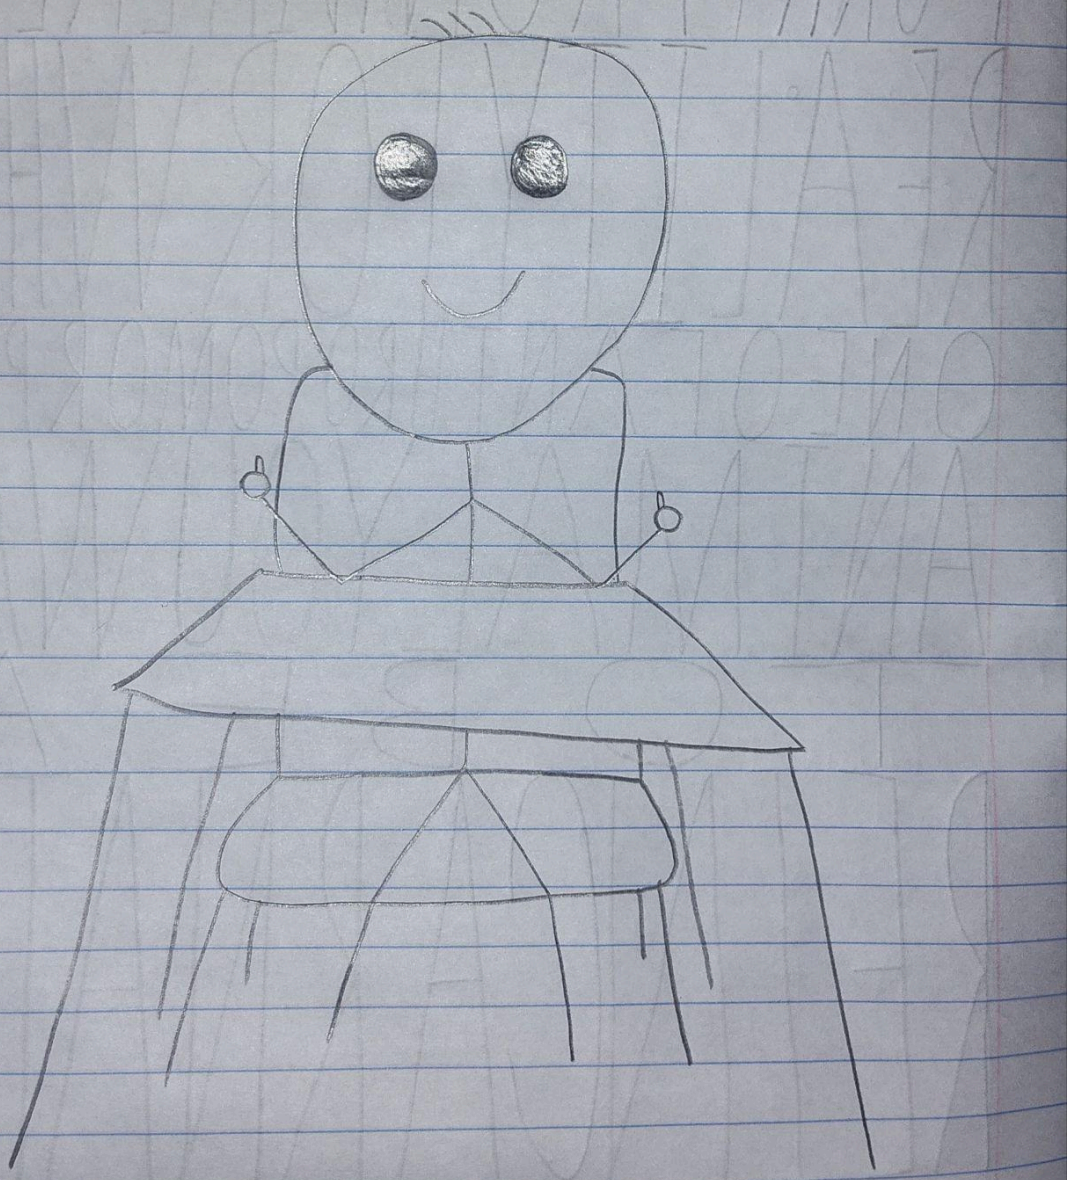
11. Having horrible acne (not just on my face only, but on my ears, my neck, my butt, my head, and my body)
12. Having too much fears or anxiety where I'm having mental health crisis.
13. Deep, Dark, Depression things (I know there are a lot of dark things out there on the Internet and outside of the Internet).
14. Living at home where it's too risky to live.

15. Math

4th of March, 2025 MAYBE YOU SHOULD DO...

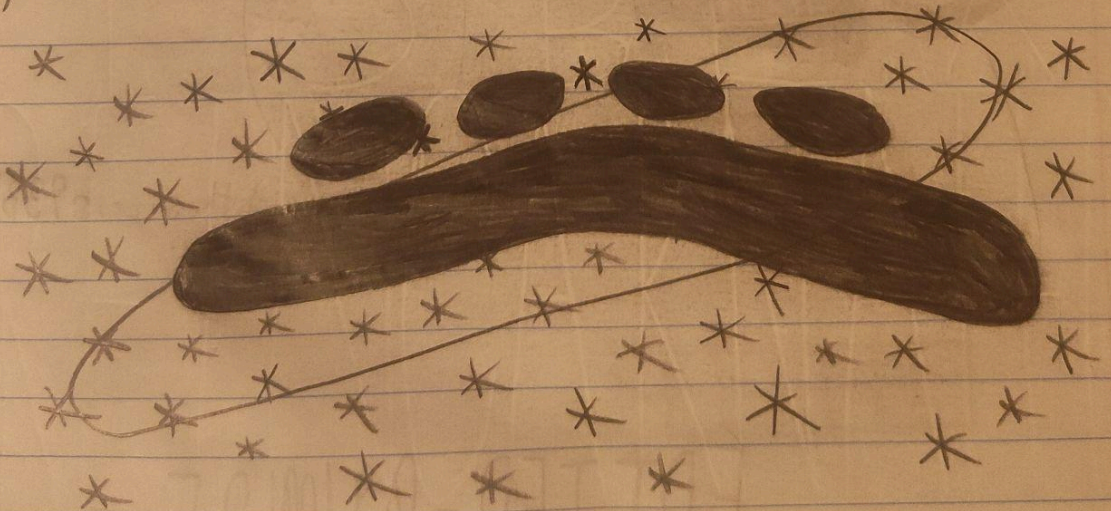
BELIEVE YOURSELF TO BE REBORN AS A FURRY FROM DIFFERENT REALITY FOR WHICH ONE OF ANTHROPOMORPHIC ANIMAL YOU WANT TO BE A REINCARNATED.

11th of March, 2025
So for that time during in school for taco tuesdays I've been missed for 3rd hour for few goddamn weeks and I hated it that way since my 2D/3D class teacher didn't know about it, but it happens sometimes and I try my best as I can and I know it's such a pain in a butt for me it is sometimes. Proof that we all try our best as we can do for good times.



12th of March, 2025
It's a good day for me to be honest, where we going to the dance party in the gym in Moore high school, but that trip was actually great, so yeah, I haven't been on the dance for a while 'cause I did prefer staying in School better and it was back then for years and years, and by the way for that, I have seen someone parked the car near to me and my parent's house where two people are having a long conversation in the car, but I think they're Spanish or Español speakers where I hear it when I out the wheeled garbage/trash can so yeah.

16th of March, 2025
As the latest times in fur universe, it will have infinite amounts of galaxies where dozens of galaxies is inside the one paw of god and dozens of galaxies is outside the one paw of god, where the fur universe is infinite times bigger than the observable universe more like our universe and yeah, where fur universe is over hundred trillion years old.

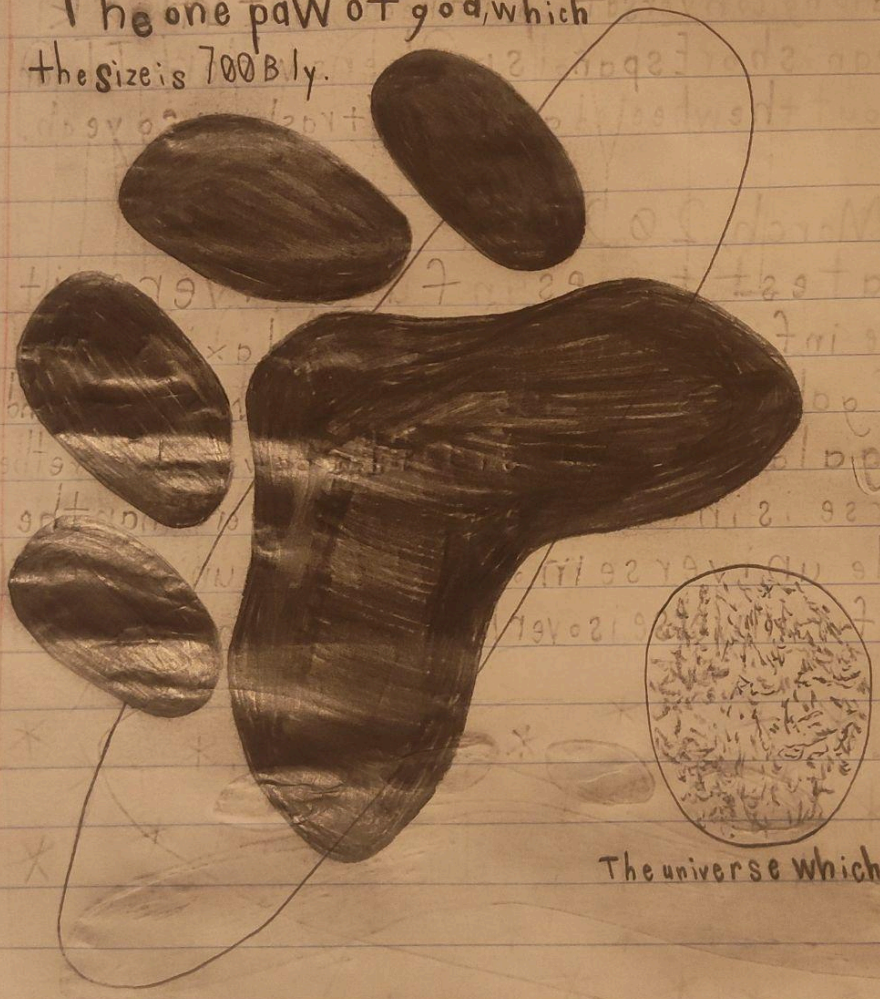


EDITED - 09/20/25

19th of March, 2025

So, this is how the space size comparison look like this...

SPACE OBJECTS SIZE COMPARISON



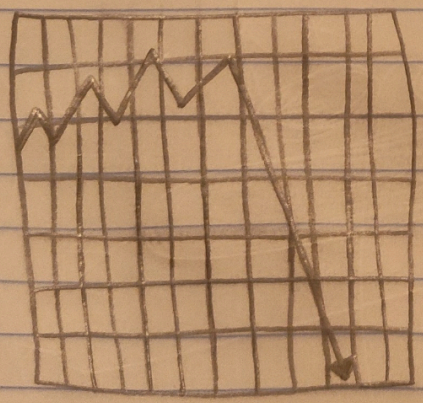
EDITED - 09/2025

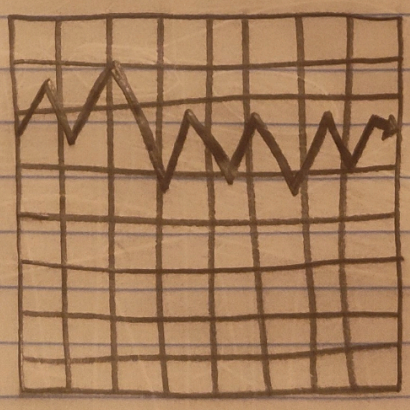
23rd of March, 2025

So last week when I upload a mod named "Kenworth T408 SAR" on ModLand and it got like few amounts of downloads which is awesome, but unfortunately, it does feels like it's such a stupid [redacted] it's because that mod crashes the game for trying to go to the mod dealership for going to its page and yeah, but it happens sometimes and speaking of having issues about my mod where it's a problem.

In this month it was my first time playing Black Mesa. It's a fan-made remake of the original Half-Life game by Valve Corporation where that kinda game is released in 19th of November, 1998, but that classic videogame has been losing interest so easily it's because it received downfall very easy for some point so yeah, but true.

I know there are many of these videogames did received rise and fall for years and years 'cause they don't feel like playin' anymore so yeah, it's true since everything has been changed for a year, after year, after year, after year, after year, and after year.





29th of March, 2025 to 31st of March, 2025
Singular Theory Separation numbers IS going to be:

AP-1 - FU-200 A to G
AP-2 - BEAST-6000
AP-3 - WC-359
AP-4 - 0-100
AP-5 - T-1670
AP-6 - WW-1650
AP-7 - CWL-33
AP-8 - FWL-55
AP-9 - CFWL-3355
AP-10 - BM-31 A to H

Secondary STS Number Collection 30th of March, 2025

AP-11 - HD-1000
AP-12 - COD-476 A to K
AP-13 - 7185 (As of The Lion King Theory)
AP-14 - FW-67
AP-15 - I1C-19712 (Combined with C-197 & 1218)
AP-16 - TK-98
AP-17 - ATS-2020
AP-18 - ETS2-2021

31st of March, 2025

AP-19 - 3527 (As of Transformers Theory)
AP-20 - MLS1R-670 (As Dimensional Combination Theory)

That's all of 20 of them, but in the fur universe the anthro canine population on Furworld surpass the anthro duck population to become a largest anthro population on Furworld and the third most is the feline population, but instead of that, it will not included with anthro dragons, anthro marine animals, and anthro reptiles 'cause they don't exist.

3rd of April, 2025 THE FUR UNIVERSE REALITY SPECIES

So the collective terms of furry species it would be:

Petidrans/Therians

SYMBOL -

Normal lifespan: 70-90 yrs (Similar to Altertherians)

- Anthro Canines
- Anthro Felines
- Anthro Hyenas
- Anthro Bears
- Anthro Kangaroos
- Anthro Beavers
- Anthro Horses
- Anthro Raccoons
- Anthro Deers
- Anthro otters
- Anthro hogs & Anthro Pigs
- Anthro Goats
- Anthro Sheeps
- Anthro Bunnies/Rabbits

Altertherians

(Most of them extinct about 8,000 to more than 100 years ago for through the many years.)

SYMBOL -

For that time it will included with anthro Elks, Caribous, & Reindeers

- Anthro Cows
- Anthro Sheeps
- Anthro Gazelles
- Anthro Mooses
- Anthro Bulls
- Anthro oryxs
- Anthro Koalas
- Anthro Donkeys
- Anthro Squirrels
- Anthro zebras
- Anthro weasels
- Anthro yaks
- Anthro pinestartens
- Anthro gamsalos
- Anthro Buffalos

Primatarins

Proof that anthro Lemurs normal lifespan is 60-80 yrs.

SYMBOL -

Primatarins have longest lifespan for around 100-140 yrs

- Anthro Monkeys
- Anthro Chimpanzees
- Anthro Gorillas
- Anthro Macaques
- Anthro Capuchins
- Anthro Baboons

(Most of Primatarin species extinct about 15,000 to more than 200 years ago for through the many years.)

- Anthro Lemurs

Berdorons

SYMBOL -

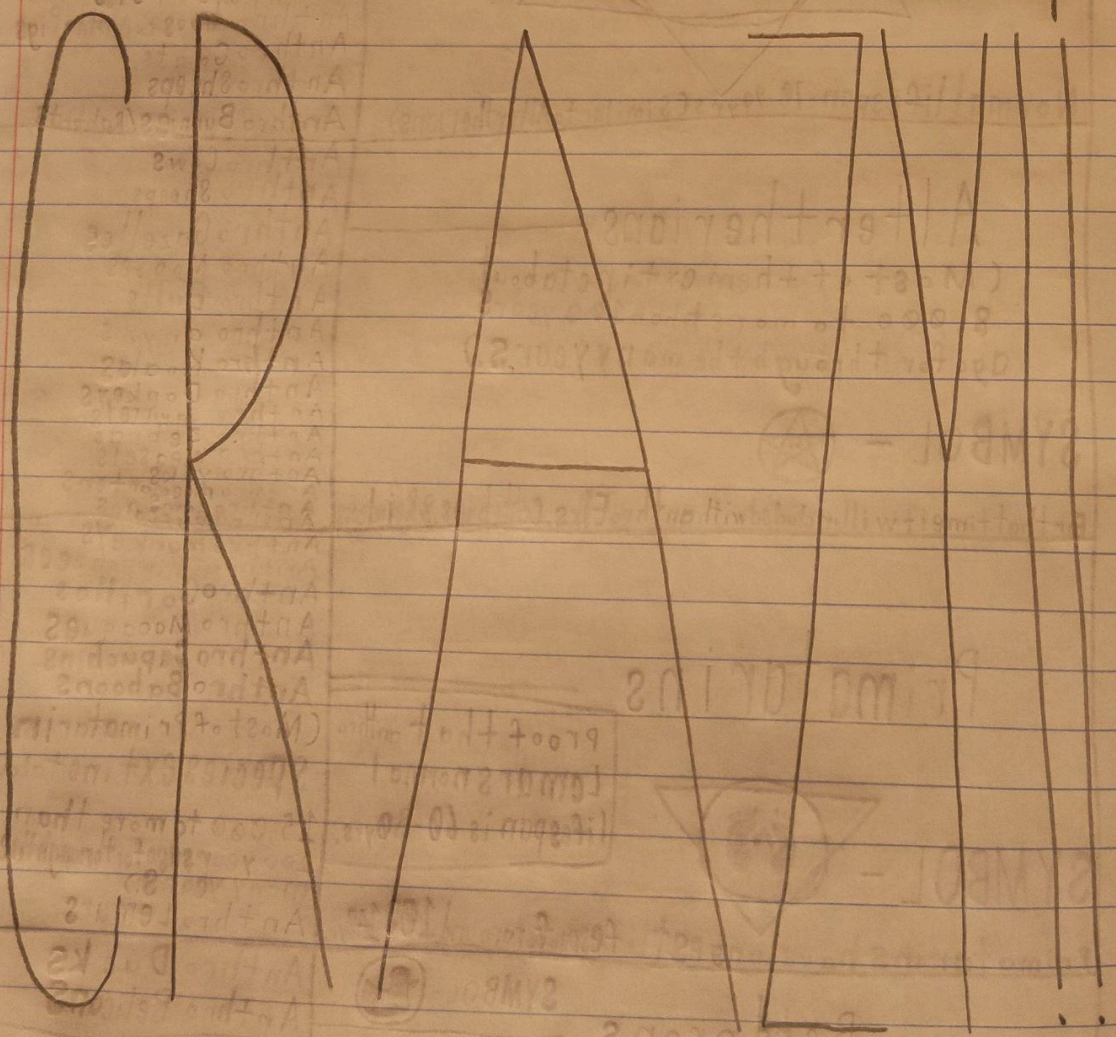
Normal lifespan: 60-100 years

- Anthro Ducks
- Anthro Pelicans

THAT'S DOUBLE!!

~~4th~~ of April, 2025

Man...it was so motherfucken hard for me as hell it is to think about where these furry species existed and I've been over thinkin' a lot for no reason and I don't know why.



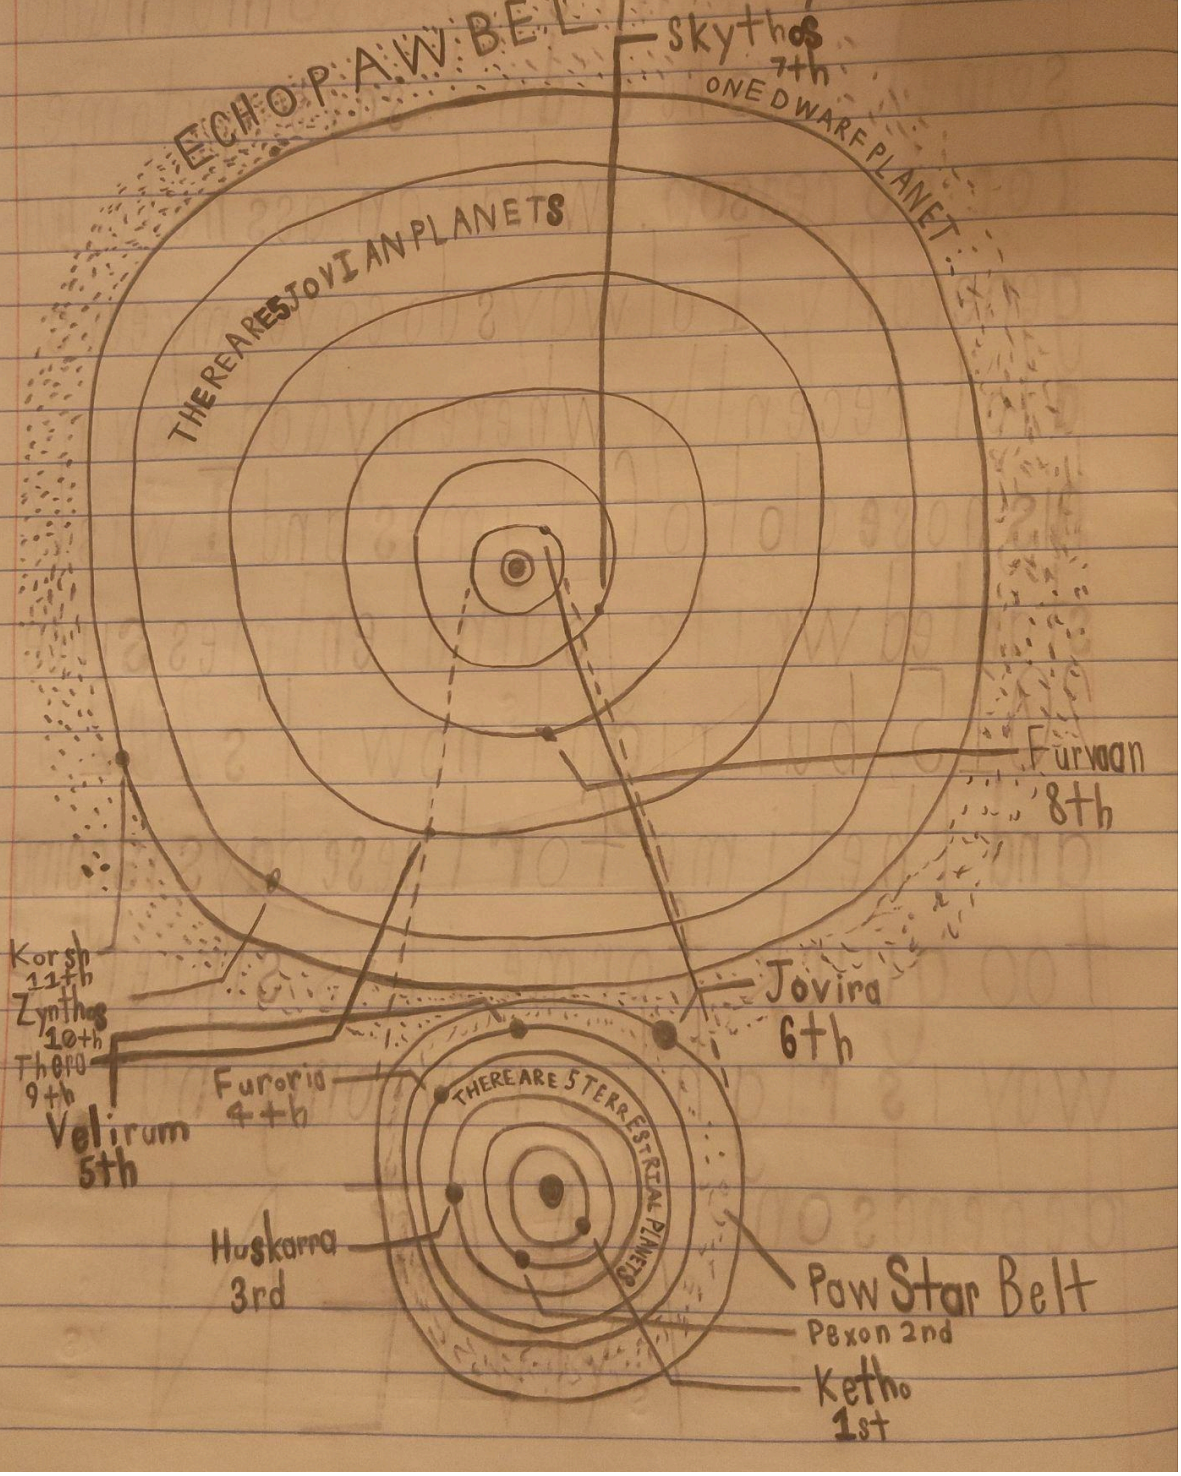
6th of April, 2025

Oh boy, I always hate listen my dad blowin' his nose so much and sometimes he didn't say sorry to me for no reason... what an ass hole, but generally, I always do cover my ears a lot recently where my dad blowing his nose a lot of times and I wish started write journal entries since 2015, but right now it's 2025 and the time for these days is going too quick for me it is since the way is right or wrong, but it depends on.

AMEN

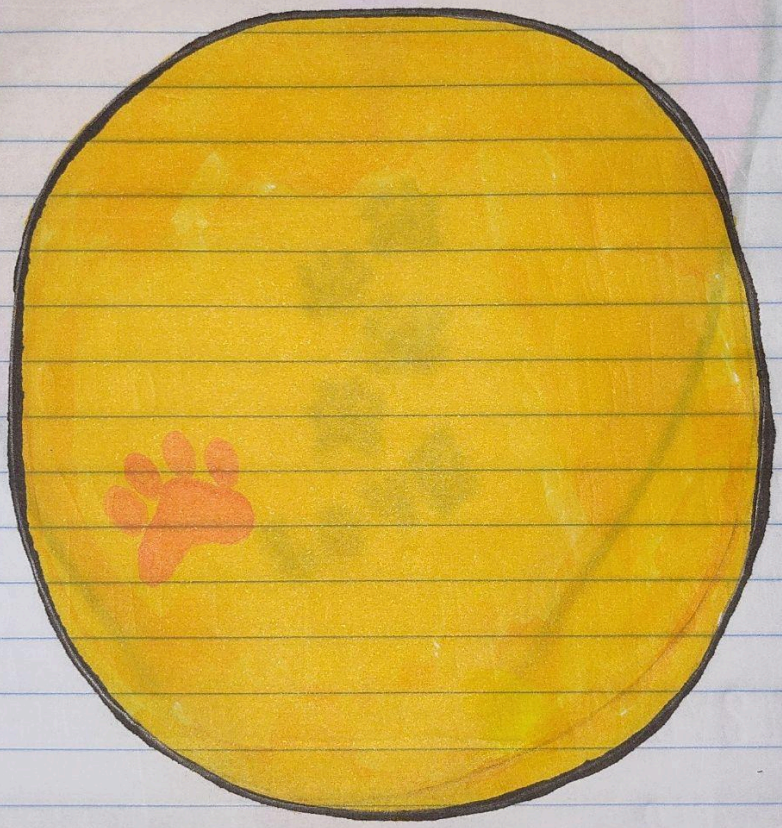
8th of April, 2025

This is the Furstar System.



9tho-fApril, 2025

This Sun-like Star is the Fursun. (Called the sun)



THE FURSUN IS LOCATED MIDDLE OF THE FURSTAR SYSTEM.

9th of April, 2025

I'M ALWAYS

WITH FURRIES

10th of April, 2025

IT'S TIME TO UNSTOPPABLE RISE OF US

12th of April, 2025

So the population on Furoria have many people are left-handed, mostly of many people are right-handed, many people are rich, many people aren't rich, many people are famous, many people aren't famous, and some people are infamous since every body has their different opinions on the planet Furoria.

Lefty - 30% (Most of Berdorans & Primatarins)

Righty - 60% (Most of Petidrans & Altertherians)

Ambidextrous - 10% (Many of Primatarins)

Rich - 50% on Furoria

Middle-Class (Lower, Normal, or Upper) - 49.5%

Poverty - 0.5% on Furoria

That's all of these global population percentages on Furoria, but the population percentage of famous people is 50.5%, infamous people is 0.0050%, and non-famous people is 49.5050% and that's about it.

14th of April, 2025

10 Continents & 70 Oceans I wanna name it:

Continents:
North Auratheria
South Auratheria
Nordicavire
Xianyora
Pawveria
Zulekore
Halimah
Darrakoon
Clawsha
Glacithra

Oceans:
Slytherian Ocean
Elyvian Ocean
Velkara Ocean
Numirian Ocean
Orinave Ocean
Glacithric Ocean
Duskarin Ocean

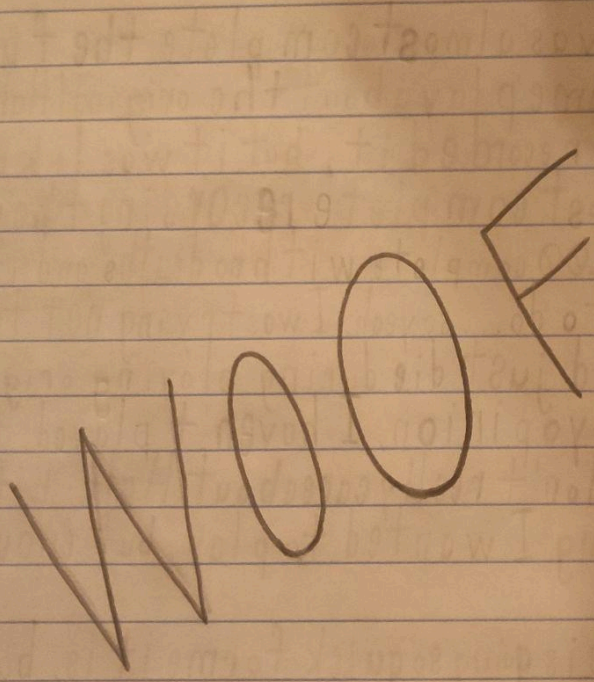
That's all of 10 Continents & 70 Oceans where it's located in North, South, and Middle of the Planet Furoria.

16th to 18th of April, 2025
Yeah, I feel kinda bad about the 2nd hour for doing English class because these people in room 108 needed to pay attention like seriously it's unfair and I'm kinda disgusted about English class, but generally, it does feel sore for me sometimes and yeah, it happens, but apparently it sucked so badly and I know there are many of uneducated unpopular students out there 'cause they needed to learn themselves... man... so many dumbass students.

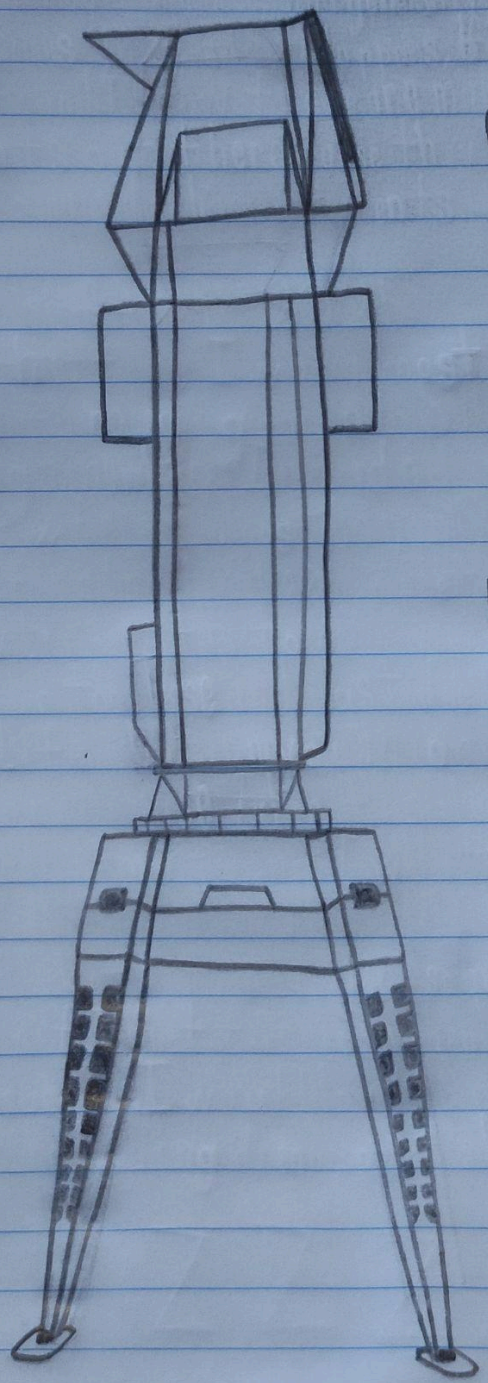
20th of April, 2025
For that time I was almost complete the full walkthrough gameplay about the original Half-Life videogame where I recorded it, but it was like last night where I almost complete recording the video and it's almost %100 complete with no deaths and it was pretty tricky it is to do... so yeah, I was trying not to get stuck or too close and just die during playing original Half-Life, but in my opinion, I haven't played the 2nd one 'cause I don't really care about Half-Life 2 and it's not my thing I wanted to play, but enough about Half-Life.
I feel like the time is going so quick for me it is, but what happens if I met furries when I had a dream last night... well, usually, I would love to meet with furries in real life for sleeping dreams so let's have a sleep every night... good night.

ZZZZZ

22nd of April, 2025
I feel so freakin' damn complicated how it feels and it's unfair for me it is sometimes, but in my opinion, I believe in furries where I wanted to meet with furries for a sleeping dream because I'd love to meet furries in alternate reality for how it look like and that's all I have for now.
Gotta get some sleep every night... goodnight...



This sentrygun model is similar to Half-Life, but autonomous.



M80 STRIDER SENTRY GUN

Place of origin:
Ducklandia

Produced:
1981 - Present

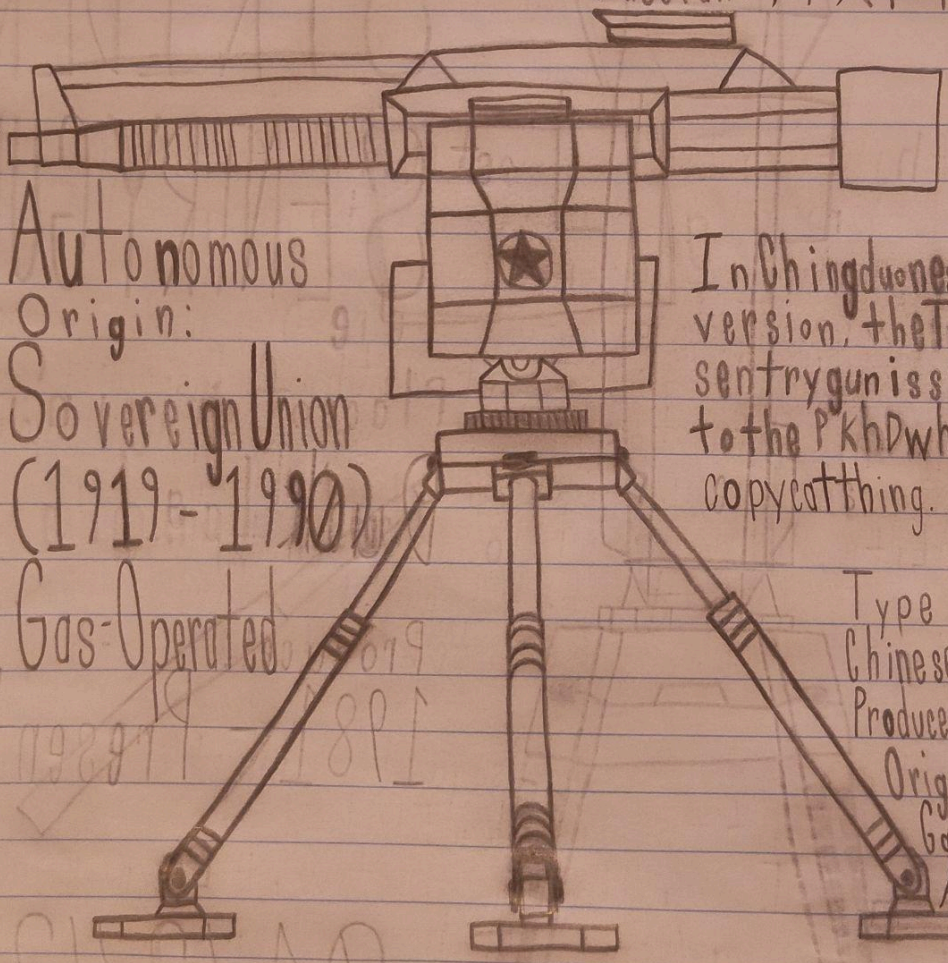
04/27/25

This sentry gun model look like from Call of Duty: Black Ops. (Well, IDK... not really)

PKhD

Russian: ПХД

Produced:
1960-Present



Autonomous

Origin:
Sovereign Union
(1919-1990)

Gas-Operated

In Chingduonese version, the Type 72 sentry gun is similar to the PKhD which has a copycat thing.

Type 72
Chinese: 72式
Produced: 1972-Present
Origin: Chingduo
Gas-Operated
Action: Automatic

04/30/25

Furorid the 4th

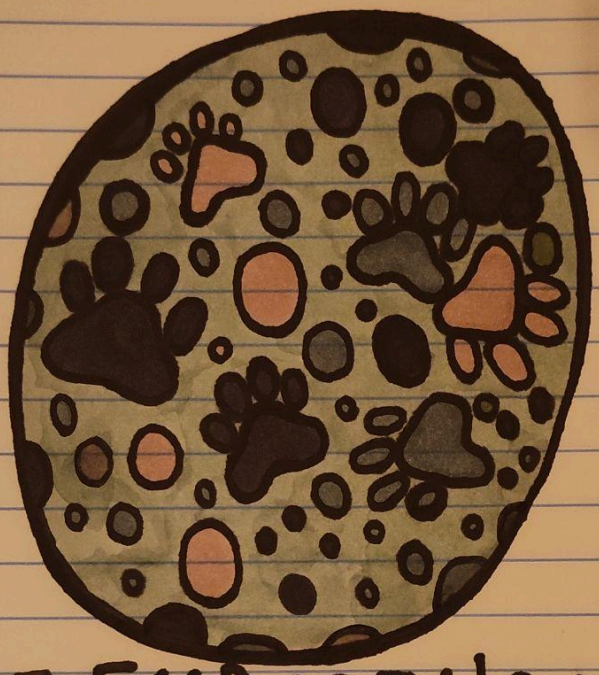
Diameter Size is 44,597 KM or 27,691.2 miles.

Earth the 3rd in the solar system.

The our planet we live.
Size is 12,742 KM or 7,918 miles
in diameter.

05/01/2025

Furmoon



THE FURORIA'S MOON.

Size is 3,498 or 2,174 miles in diameter.

It called it the moon.

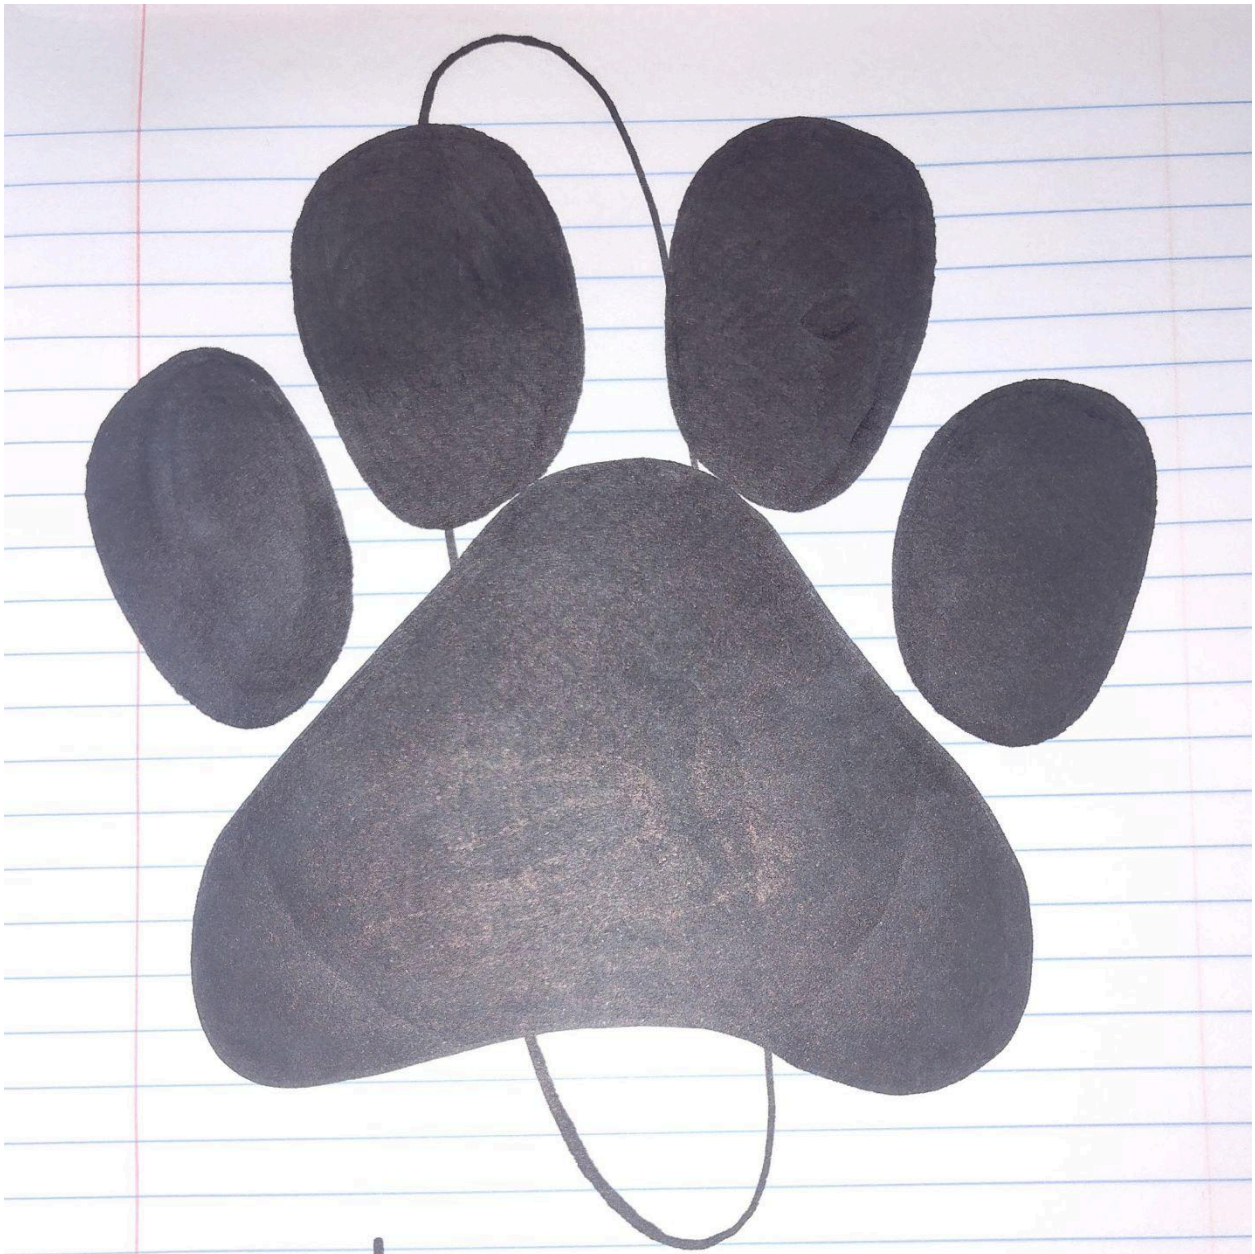
05/01/25

Ketho

The first planet in the Furstar System which is an uninhabitable planet and the closet to the Fursun.
size is 8,919.4 KM in diameter.
05/04/25

Velirum

The 5th planet in the Furstar system. Diameter Size is 31,885KM or 19,795 miles. - 05/05/25



Almost...

05/05/25

Pexon

Diameter Size is 13,008KM or 8,085Miles.

The 2nd planet in the Fur star system which is an uninhabitable planet.

05/05/25

05

Huskarra

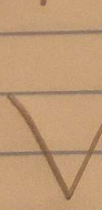
The third planet in the Fur star System which is a cold, icy, & snowy planet and it has small rivers, small lakes, & tiny oceans. Diameter size is 35,678 KM or 22,176.8 Miles. 05/06/25

7th of May, 2025

Oh boy. So I just completed developing 5 planets in the Furstar System which has all of 5 terrestrial planets is inside the orbit of the Paw Star belt and I wanna do is I wanted to create 6 more so it's gonna be 5 jovian planets and one dwarf planet which is the outside the pawstar belt's orbit and the inside the orbit of the Echopaw belt so yeah, I'm almost there to be finish.

ALMOST DONE!!!...

ALMOST FINISHED!



6 planets left to make!!!

Almost there!!!

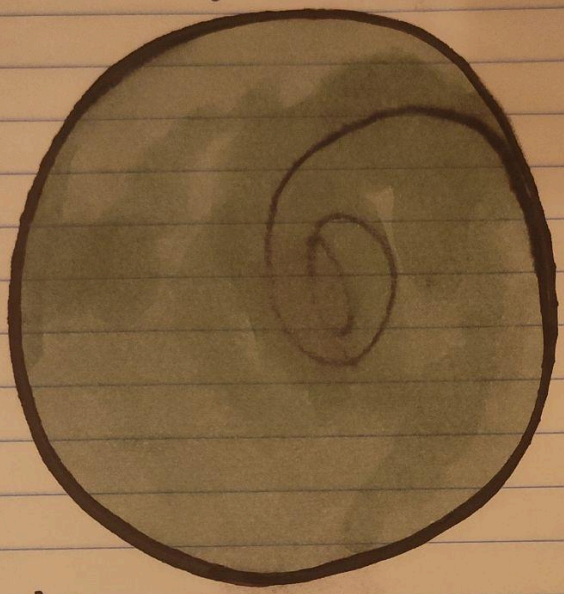
7th of May, 2025

Jovira

05/08/25

One of the largest planet in the Furstar system and it is 6th planet in the Furstar system which has a huge jovian planet. Diameter size is 501,382 KM or 311,995 Miles.

Skythos

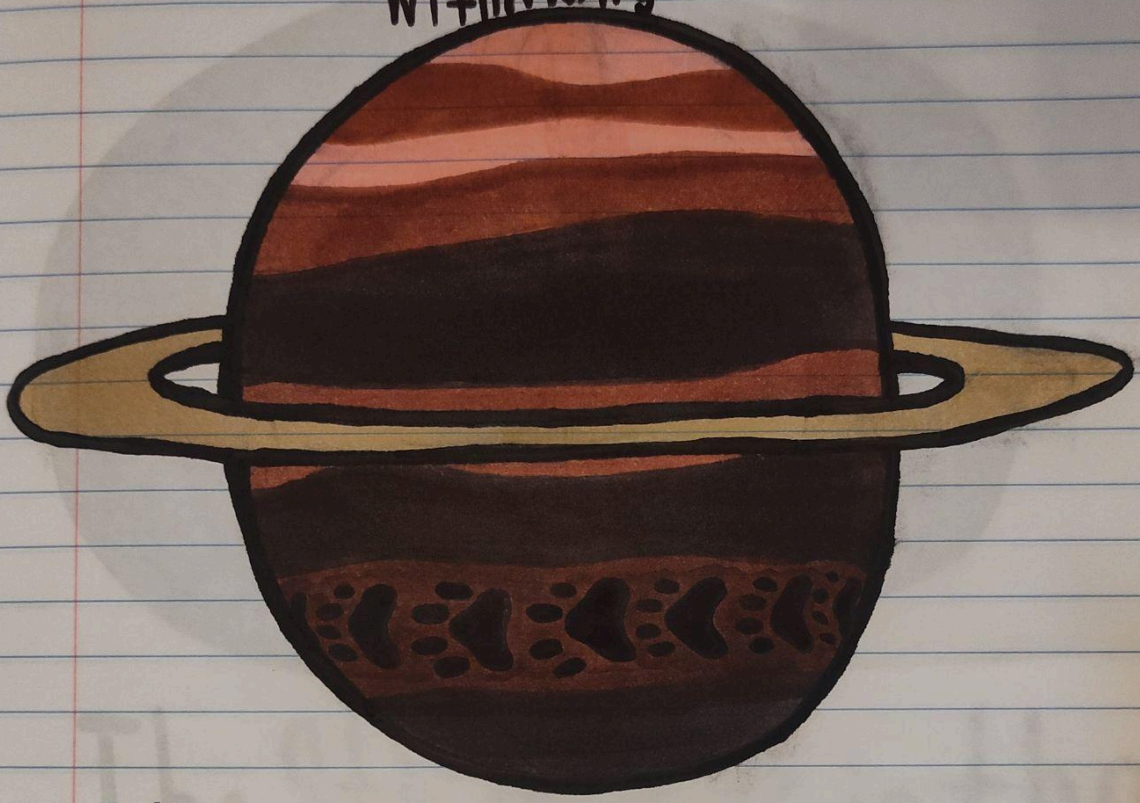


Diameter size is 28,879 KM or 17,949 Miles.

The 7th planet in the Furstar System, but it's known as the cloudy planet which it covers a lot of clouds and contains a lot of violent thunderstorms, tornadoes, and black line clouds of hail which is dangerous.

05/08/25

Furvaan
WithARing



The 8th planet in the Furstar System which it has a ring, but it's a Saturn-like jovian planet. Diameter size is 438,976 Km or 272,767 Miles. -05/10/25

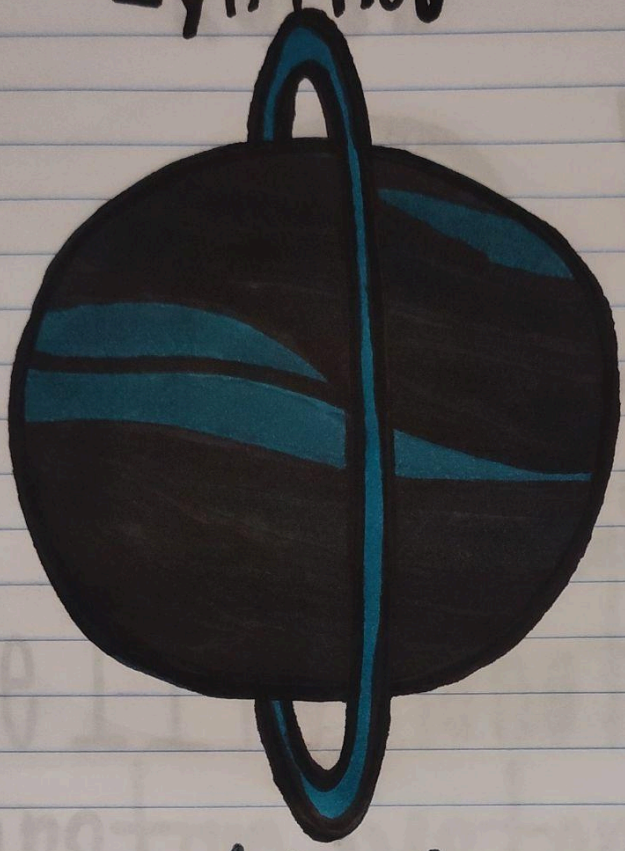
Thera

05/10/25

The 9th planet in the Furstar System, but also known as the Egg planet.

Diameter size is 115,099 KM or 71,519 Miles.

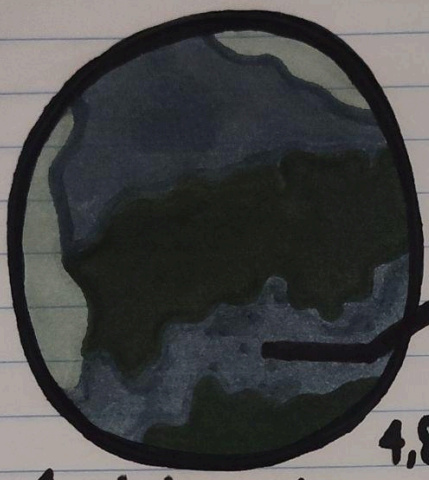
Zynthos



Diameter Size is 98,251 KM or 61,050 miles.

The 10th planet in the Fur star System which it has a ring in it, but it's a Uranus-like jovian planet. -05/10/25

Korsh



NOTE: This Dwarf Planet has a solidicyland.

Diameter Size is 4,852KM or 3,015 Miles.

The 11th planet in the Furstar System which is the last in the Furstar System and it's a Tiny dwarfplanet. -05/10/25

11th of May, 2025

Yeah, today I just completed developing 11 planets in the Fursfar System and it was taking so long to complete it at least I did get tired of creating concept art about the belief where in the different reality that I believe and chances are it's very hard to create a concept art about the Furuniverse reality where I strongly believed, but speaking of believing in different reality for an afterlife and today is Mother's Day to be honest. In this year it is a 80th anniversary of end of WWII which as crazy and that time about 80 years ago they celebrated the Allied victory over the Axis Powers in WWII which all Axis Powers surrendered, making the end of the deadliest war in the world history, but in this month the VE day and the Victory Day has passed about few days ago about the 80th anniversary celebration and the VJ day is coming this year to be honest.

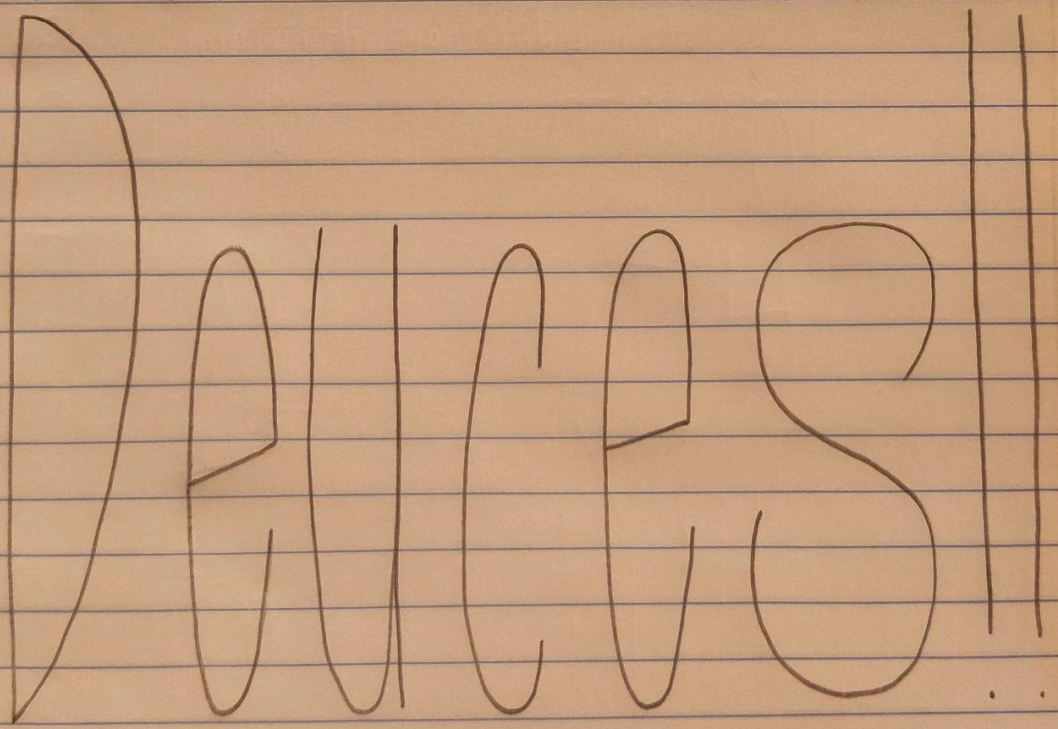
OH, BOY... TOMORROW IS MY 20TH BIRTHDAY! HELL YEAH!!!

12th of May, 2025

Oh, boy! Today is my 20th birthday so HAPPYBIRTHDAY TO ME!

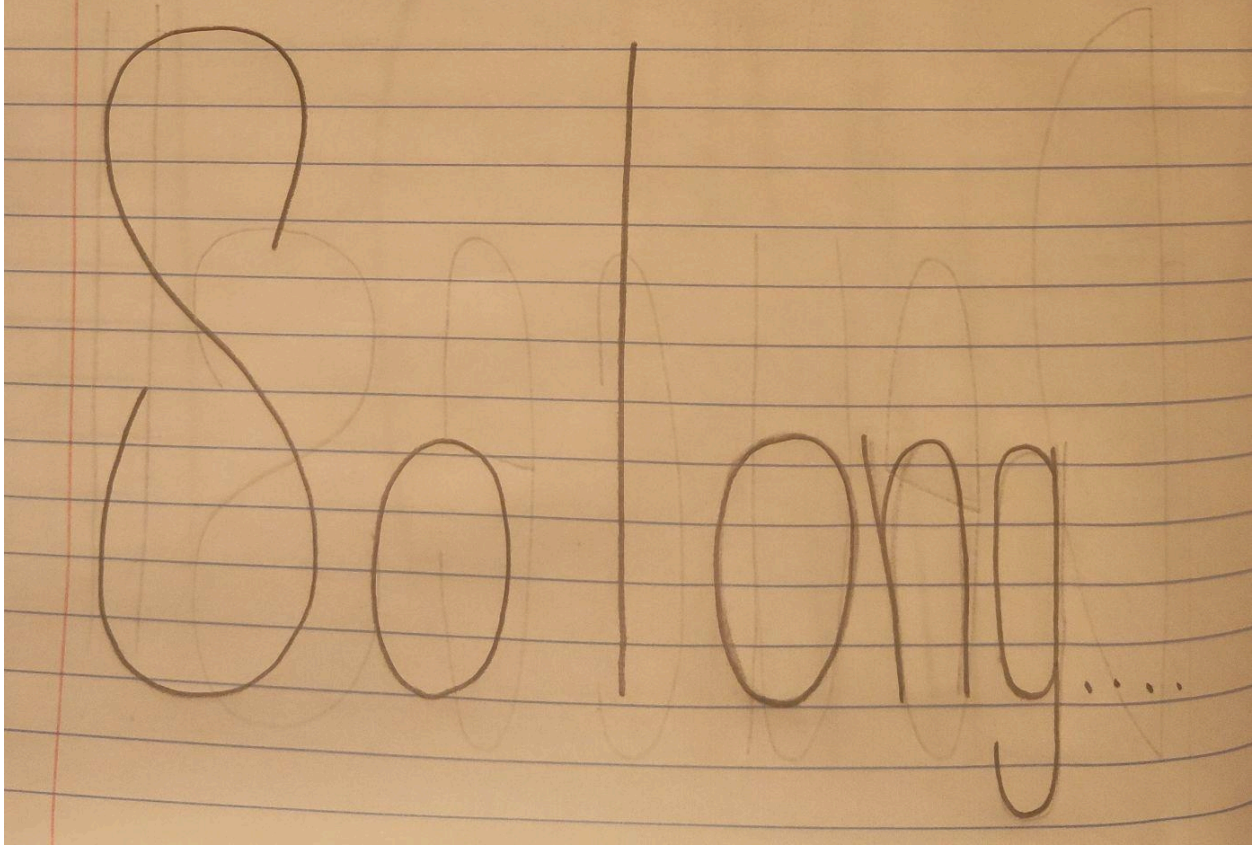
Man... yesterday it was my 20th birthday so right now I'm 20 years old and I know I am a grown man, but I wish I would be a kid or a teen again and yeah, I wish and I feel like I'm old to be honest, but in fact, our age is going up and someday we're all gonna die one day, I'm gonna die one day, and you're gonna die one day and that's how it works. - 05/13/25

Thank goddess it's almost summer! So in my opinion, I'm gonna do work which I'll work on mods where I modify mods or I'll work on YouTube videos to be honest, but in my opinion, I can't do nothing for this bullshit and chances are I never wanna do it alone by working hard, I wanted to support with other people so they will help me with it like, editing, fixing, and other things which supporters would help me with it and yeah, pretty much. - 05/14/25



17th of May, 2025

Trying to update the new version on Mod Land without reading guidelines where people don't care enough to update it?! FUCK THAT PIECE OF SHIT!!! It frustrates a lot sometimes when I tried to update a new version of some of my mods which it's modified by me, but naw... didn't read the guidelines where I tried to update the mod on Mod Land and yeah, it happens and I know it's frustrating nowadays sometimes, but truly... I know it's hard to wait, but it depends. Yesterday it was a last day of school and it was a great day which it was a happy day and yesterday during 1st and 2nd hour it was a very long, long talk and that's why it was takin' so long to talk which it was a very long story and I didn't like it which it makes almost started to cry and yeah, it happens to me sometimes.



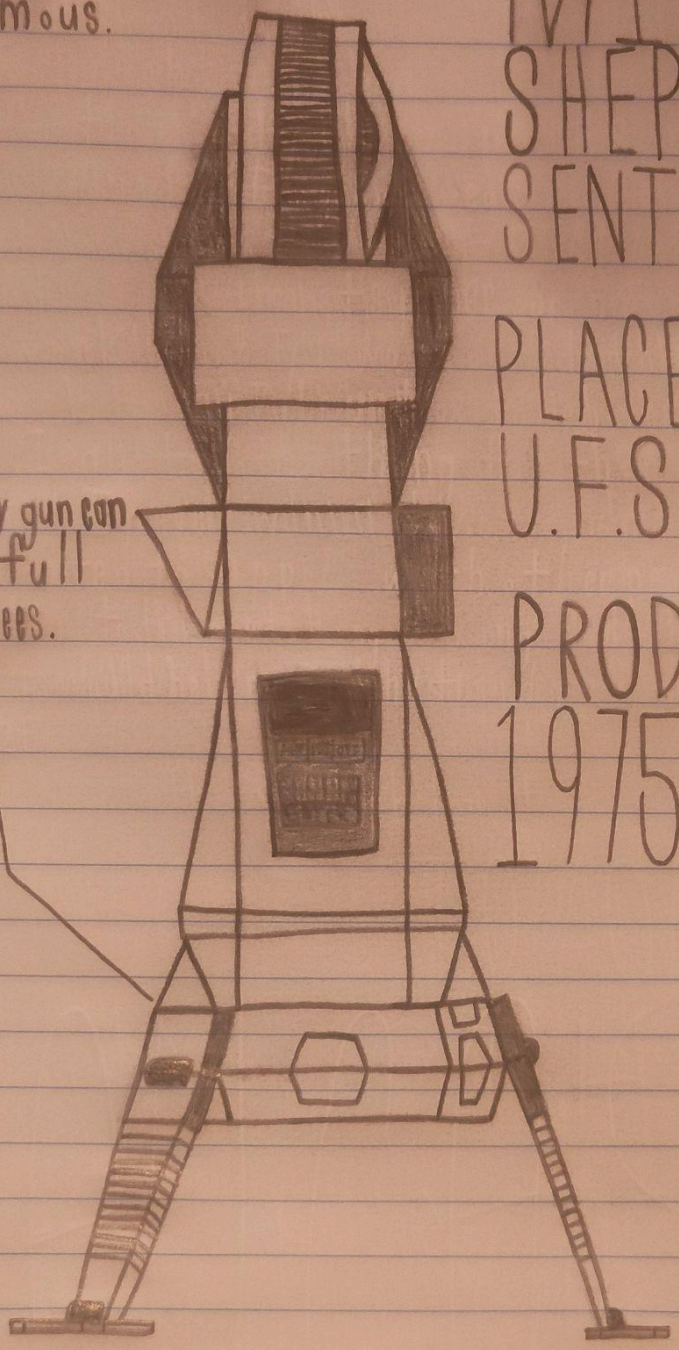
This sentry gun look like a sci-fi thing, but Autonomous.

M174 SHEPHERD SENTRY GUN

PLACE OF ORIGIN: U.F.S.

PRODUCED: 1975-Present

NOTE: This sentry gun can rotate full 360 degrees.



05/18/25

11 Planets in the Fur star system in size (KM).

Ketho - 8,919.4 KM in diameter and 4,459.7 KM in radius.

Pexon - 13,007.7 KM in diameter and 6,505.7 KM in radius.

Huskarra - 35,678 KM in diameter and 17,839 KM in radius.

Furoria - 44,565.6 KM in diameter and 22,283.9 KM in radius.

Velirum - 31,885 KM in diameter and 15,942.5 KM in radius.

Jovira - 501,382 KM in diameter and 250,691 KM in radius.

Skythos - 28,878 KM in diameter and 14,439 KM in radius.

Furvaan - 438,976 KM in diameter and 219,488 KM in radius.

Thera - 115,099 KM in diameter and 57,549.5 KM in radius.

Zynthos - 98,251 KM in diameter and 49,125.5 KM in radius.

Korsh - 4,852 KM in diameter and 2,426 KM in radius.

05/19/25

11 Planets in the Furstar system in size (Miles).

Ketho - 5,543.9 Miles in diameter and 2,771.2 Miles in radius.

Pexon - 8,082.3 Miles in diameter and 4,041.15 miles in radius.

Huskarra - 22,168.5 Miles in diameter and 11,084.25 miles in radius.

Furoria - 27,691.2 Miles in diameter 13,845 Miles in radius.

Velirum - 19,812.5 Miles in diameter and 9,905.25 Miles in radius.

Jovira - 311,547.2 Miles in diameter and 155,773.6 Miles in radius.

Skythos - 17,947 Miles in diameter and 8,973.5 Miles in radius.

Furvaan - 272,747.6 Miles in diameter and 136,373.8 Miles in radius.

Thera - 71,506.1 Miles in diameter and 35,753.1 Miles in radius.

Zynthos - 61,051.2 Miles in diameter and 30,525.6 Miles in radius.

Korsh - 3,015 Miles in diameter and 1,507.7 Miles in radius.

05/19/25

Size of the Furmoon Furoria's Moon.

KILOMETRES:

Diameter - 3,498 KM

Radius - 1,749 KM

MILES:

Diameter - 2,173.5 Miles

Radius - 1,086.8 Miles

05/19/25

This weapon is a laser tripmine, but similar to HECU laser tripmine which is M23B.

BS SOLVALOU/M27

PLACE OF ORIGIN:

Ducklandia (As BS Solvalou)/U.F.S. (M27)

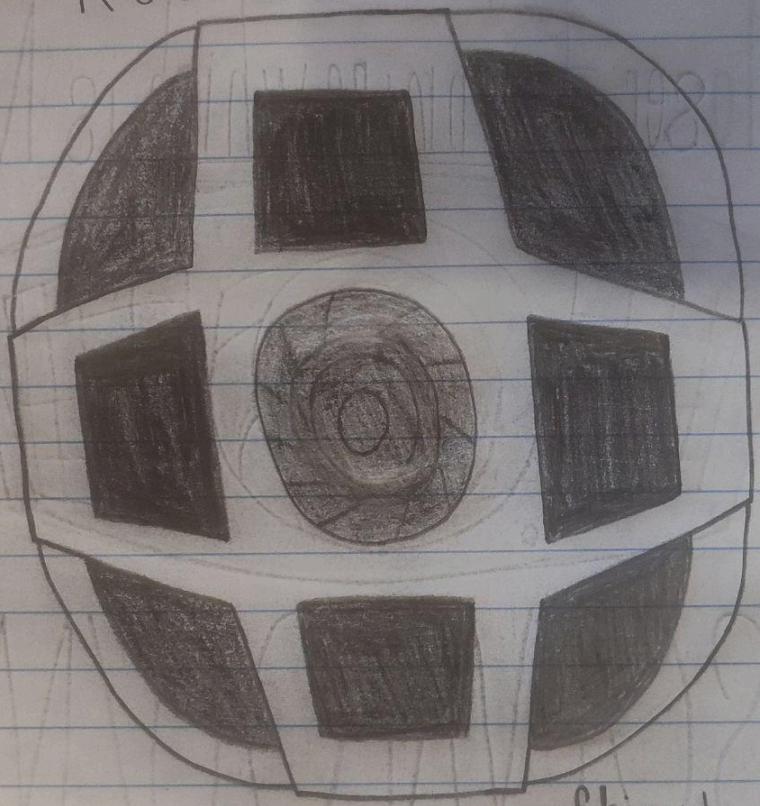
Produced:

1978-Present

05/21/25

PLTM-462

RUSSIAN: ПЛТМ-462

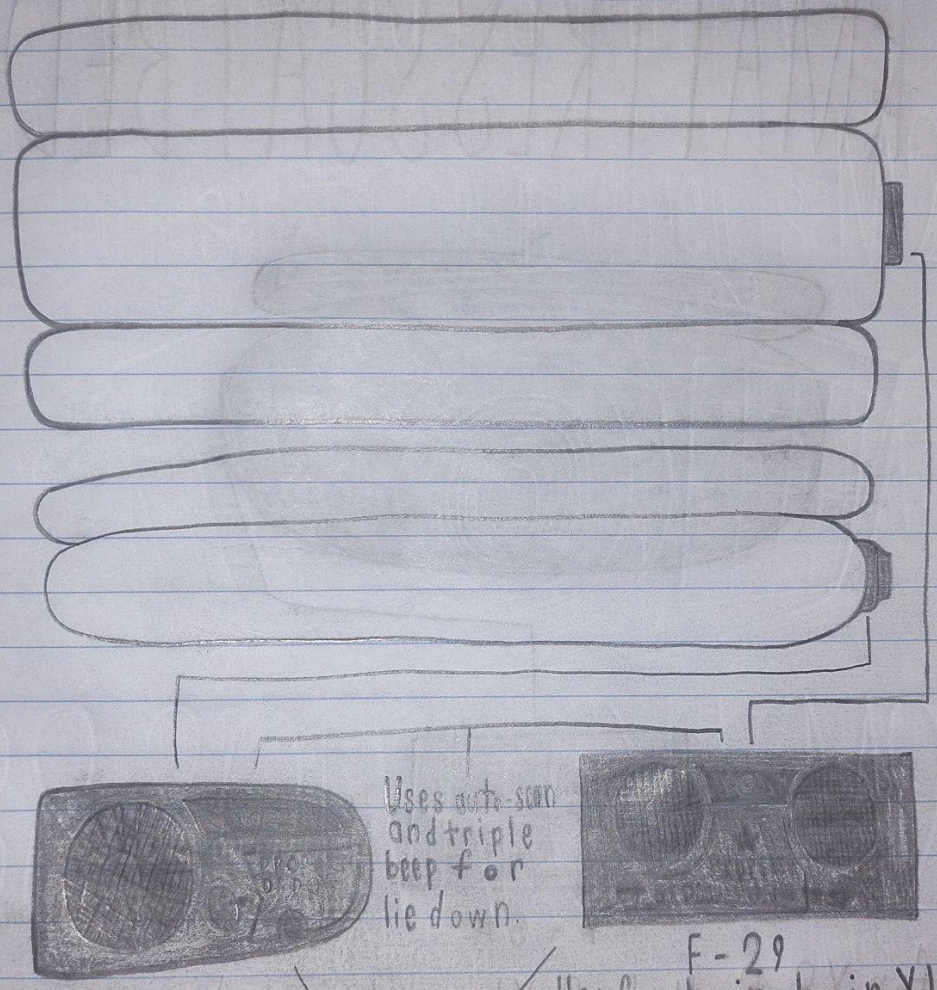


Produced:
1980-Present
Place of Origin:
Sovereign Union
(1919-1990)
NOTE: This weapon is a laser tripmine.

Chingduonese Version:
Type 81, but in Chinese
it's 81型.
Produced: 1981-Present
Place of Origin: Chingduo

05/22/25

This thing is called the HIVAC non-stop air mattress.



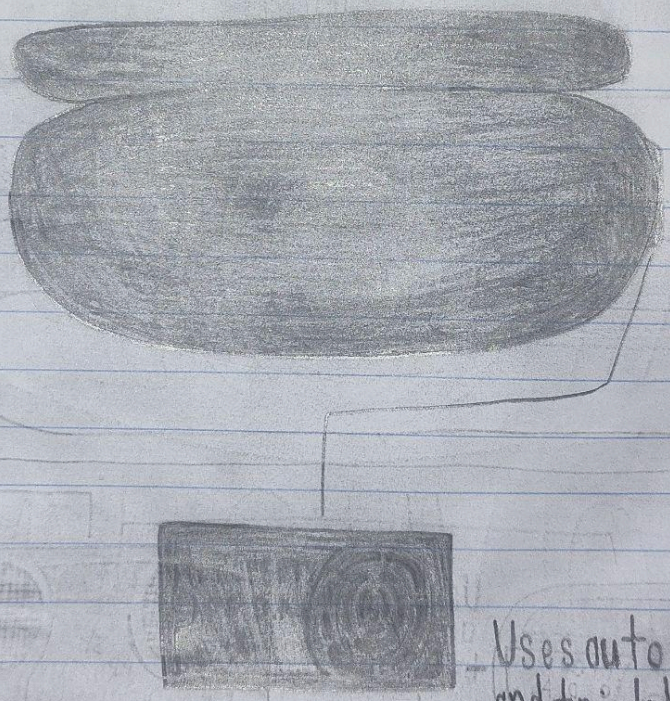
F-11
Use for M, L, XL, S, & XXL dog bed.

F-29
Use for twin, twin XL, full, full XL, queen, and king.

These built-in pumps are automatic, but included with 2-Stage fan, but sometimes manual.

05/23/25

HIVAC NON-STOP AIRMATTRESS CAT BED.



P-5A

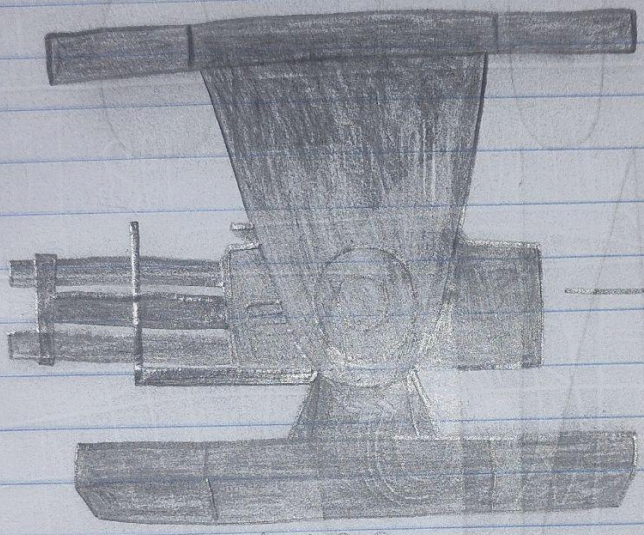
- Uses auto-scan and triple beep for lie down.

Use for XS, S, M, L, & XL cat beds, but small.

This built-in pump is automatic and sometimes manual.

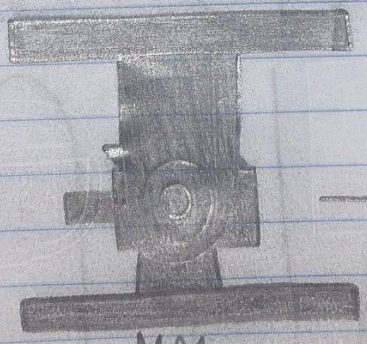
05/24/25

These are ceiling turrets, but they're friendly defense units.



M630

It can open fire like a GAU-19 or GAU-21.



M91

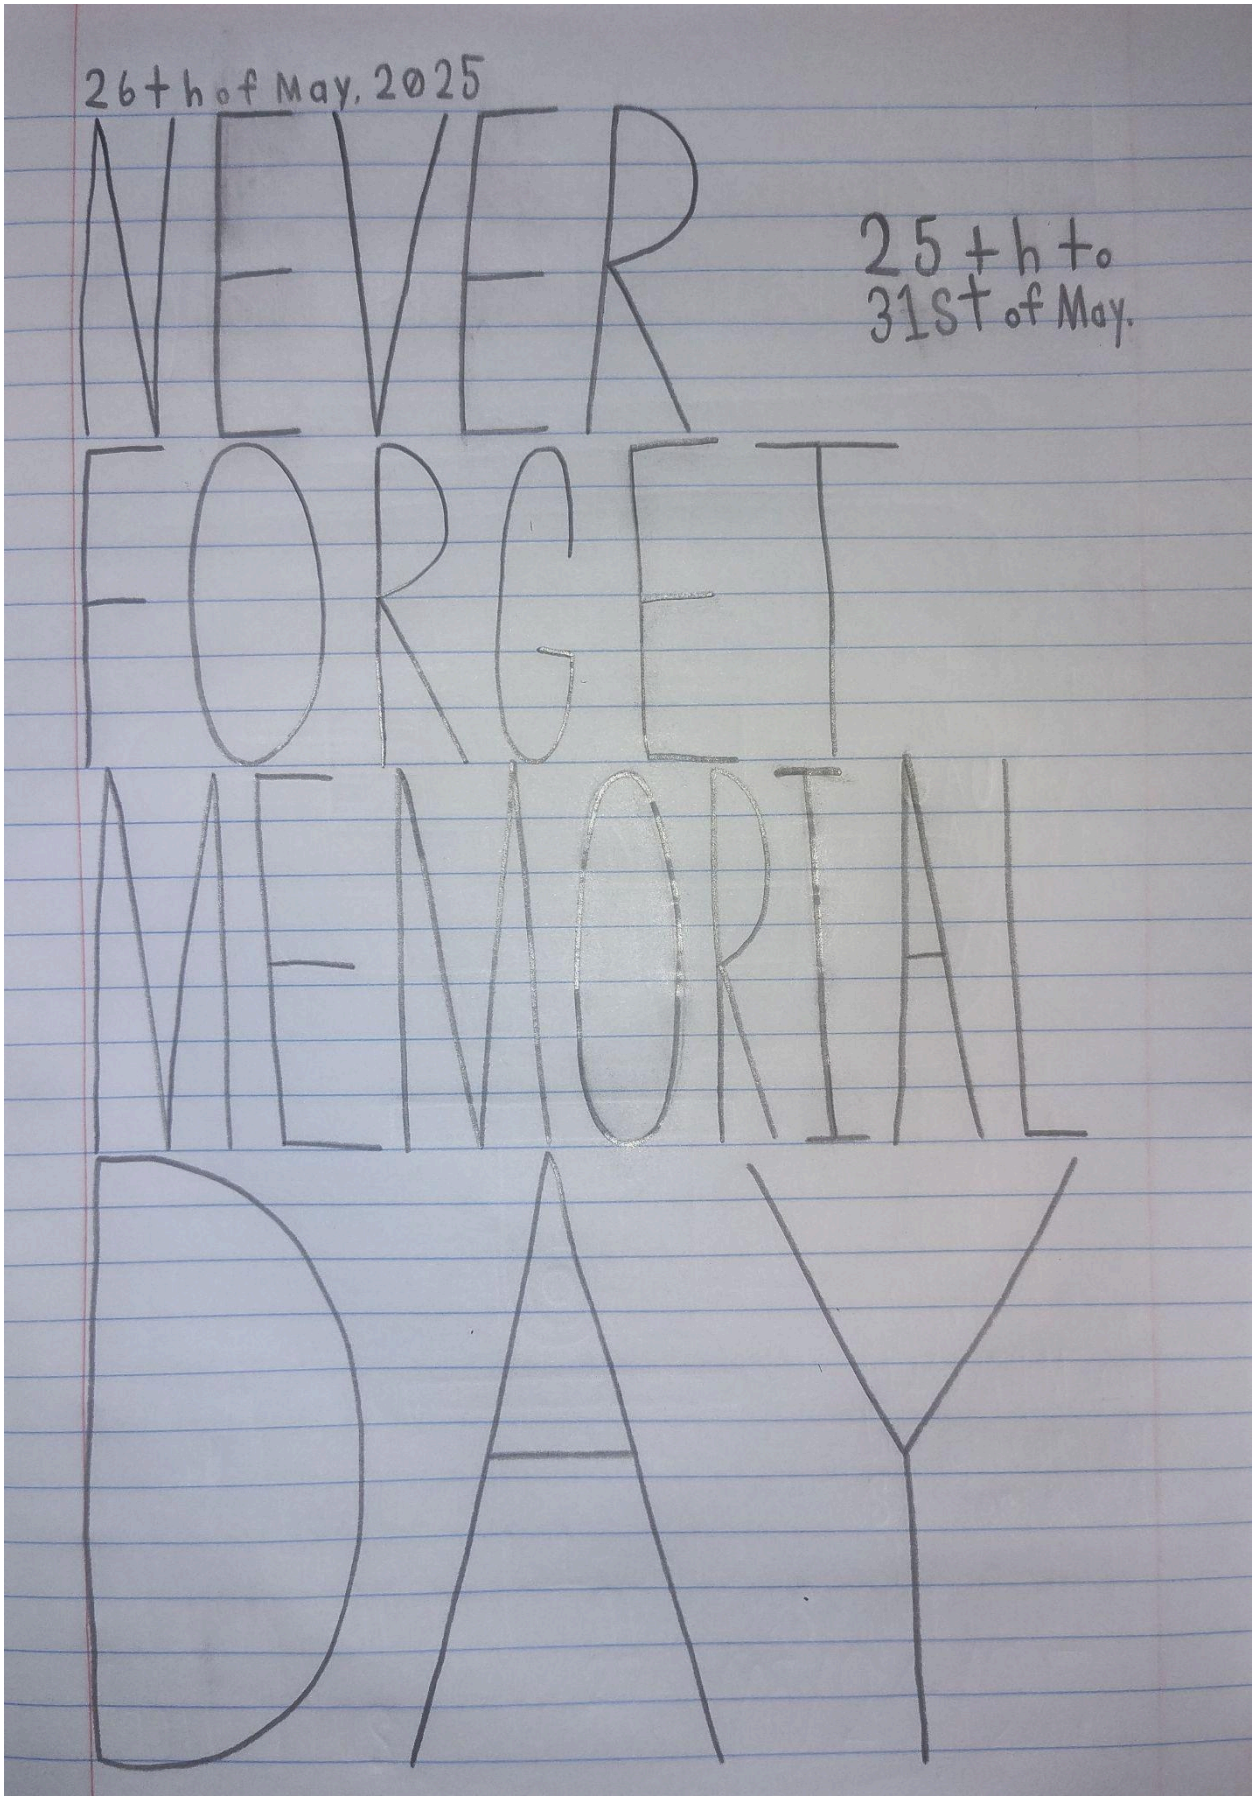
It can open fire like an AK-47 or M249/FN Minimi, but similar to M80 Striders & PKMD.

It uses for military bases and research facilities.

05/24/25

24th of May, 2025

DEUCES AND ENTICES



26th of May, 2025
NEVER
FORGET
MEMORIAL
DAY
25th to
31st of May.

1st of June, 2025

Man... I feel like I'm just bit bored nowadays, I knew it. I know it's pretty boring sometimes for me it is at home or school sometimes can't do anything and I know it's hard to live in this cruel world because being life as a human on this cruel planet isn't easy as hell to live, but as I said, Earth is the most fucked up planet to live in the universe, but I'm still manage to be here because I am always 60 minutes ahead.

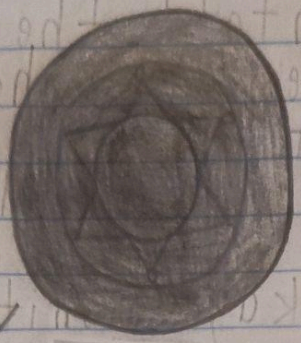
5th of June, 2025

There's no way I wanted to the cars Universe, it's, weird, it's creepy, it's a horror, and it's unsettling because it's unsettling for a lot of people which I don't want to deal about and it's a scary thought to go there for an after life it's because it isn't okay which it sucks to go to the Cars Universe.

In my opinion, I'm always obsessed with the different reality which is the furuniverse reality because I'm not like normal people, but I am unconventional person who believed in the different reality where I'm going to a much better place, it's peaceful, it's lovely, it's safe, and it's endless for my after life plan; my perspectives on every thing are different; my idea is to be reincarnated as a furry husky man and then reborn as a furry husky girl, but born into rich family to have a mother who is an author, a father who is a filmmaker, grandparents who do business, one of them is an anthro duck as a grandfather, one of them is an anthro husky as a grandmother, aunts & uncles which all of them are anthro huskies and paternal grandparents too in dad's side which maternal grandparents in mom's side is grandmother as of anthro husky and grandfather as of anthro duck, but paternal grandmother who is a novelist and paternal grandfather who is a chairman & CEO, 2 great-uncles & 2 great-aunts which one in grandmother's side & 2 brothers and 1 Sister in grandfather's side in mother's side, but one of great-uncle who is a police officer just like my grandfather in my dad's side where he used to be a police officer back in the day, 5 great-uncles & 4 great-aunts in paternal or dad's side, great-grandparents which 2 of served in the military, cousins who are anthro ducks, anthro wolves, and anthro dogs, but sometimes wolf-dog hybrids and not like hybrid in main family So yeah.

7th of June, 2025

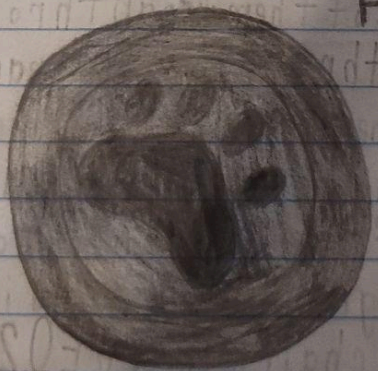
SHERIFF OR POLICE STYLE STAR EMBLEM.



USED FOR ALFERTHERIAN-MADE FIREARMS.

FIVE-POINTED STAR EMBLEM.

USED FOR PRIMATARIN AND BERDORON-MADE FIREARMS.



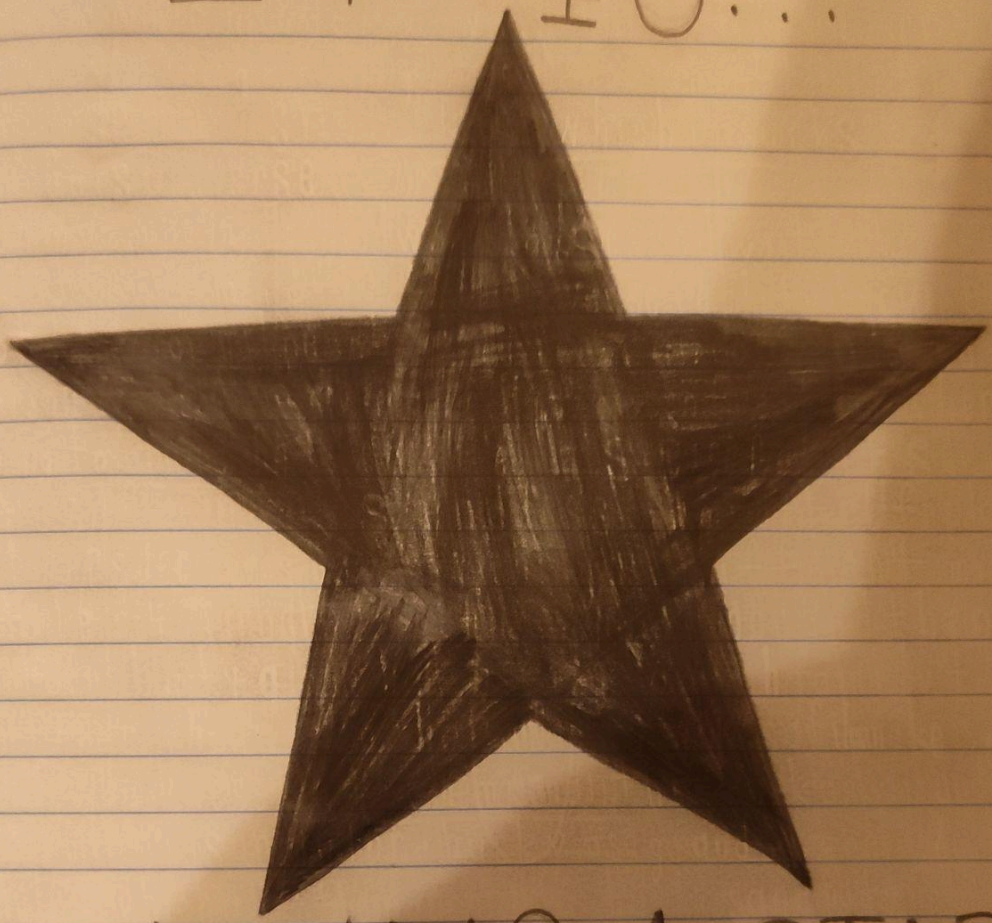
PAW EMBLEM.

USED FOR PETIDRAN/THERIAN-MADE FIREARMS.

These 3 emblems is used for pistol grip, stock, forearm, magazine, handgaurd, & diesel locomotive engines.

8th of June, 2025

IT IS...



ALWAYS A STAR,

ONE FOR ALL.

19th of June, 2025

I disliked my parents thinking about me where I'm doing spray paint in the house 'cause I wasn't doing spraypainting in the house, I was using a Mr. Hobby matt finishing spray to remove a glossy looking on these bodies of my Tamiya Nissan Skyline R32 GT-R 1:24 scale model kit and it seems like I'm almost done obviously.

24th of June, 2025

Man... It does take so long to write a long documentary about "The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From A Different Reality Documentary" and obviously, I know it is a very long page document I've ever wrote, I know it's extremely hard to write, and I know sometimes I got tired of writing. It is one of the longest page documents I've ever wrote in my entire life and in my opinion, I just wanna get it done writing it, so I can publish it online and go publicly instead, but apparently at least if I finally done writing "The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From A Different Reality Documentary" which is my longest page document I've ever wrote. So it will go public after I posted on DeviantArt and obviously it's so painful to write a very long page document which is more than just one page document because it pretty sucks to write a lot of words, dozens upon dozens, upon dozens of words to write which is painful, hard, and difficult to do... so yeah, it's part of my belief system ya di ya da ya da, it's part of my development to be honest, and it's part of my personal belief & my personal identity.

So, back in March 2024, I did wrote only double-page documents which I was supposed to like write at least 20-page documents, but naw... I did give up, but it was back then about a single year ago before my 19th birthday and back in August 2024 to January 2025, I did had my goal to write at least 20-page documents, where I did publish on DeviantArt under username "MyJournalWritings" and it does contain with spoiler alert and sensitive topics, but it's in past when I was in 12th grade.

29th of June, 2025 in fiction

As a late night, Pyotor Kulikov who was a physicist, author, & founder of the Furuniverse reality, but he was so poor where he grew up in poverty in Irkutsk, Irkutsk oblast, RSFSR, Soviet Union with his family when he was younger, where his family don't have much money, but it was in the early 1930s to mid 1940s during the interwar period & WW2 period. In 1947 since he was only 16, he also become a founder and founded the Furuniverse reality the belief system is about the one-step or two-step reincarnation for being reincarnated or reborn as a anthropomorphic animal, in 1949, that afterlife belief system has become quite popular in these circles which at least thousand people be live in the Furuniverse reality, but later in 1950, after Pyotor Kulikov and his family moved to Moscow, he attend the M.V. Lomonosov Moscow State University, studying a lot about physics, multiverse theory, reincarnation, & mathematics, later in 1954 he graduated with a bachelor's degree and after his graduation, he wrote his first book called "The Different reality", but in Russian "Иная реальность" which it become a best seller in the world and his fame grew bigger, bigger, bigger, & bigger, later in 1959, he also became U.S. citizen after moving to the U.S., in late-1959, he also has new girlfriend her name is Grace Richards which she is a christian, in 1960, Pyotor & Grace married and become parents, in 1961, he have a new son, later in 1964, wrote his 2nd book titled "Why I'm not religious?" and also have new daughter, in the mid-1960s to late-1960s he also become one of the most influential & most discussed Soviet-American man in the world due to his theory of relativity, winning nobel prizes, and he also have another new 2 sons, later in 1971, he interviewed by Walter Cronkite, but 9 years later in 1980, his last interview and unfortunately in June 25th, 1980, he tragically died for having heart attack after his 49th birthday.

30th of June 2025

The Furstar System age: 700 trillion years old

The Furuniverse age: estimated 1.2 quadrillion years old

The One Paw of God age: 1 quadrillion years old

11 planets age:

Ketho - 698.88 trillion years old

Pexon - 698.91 trillion years old

Huskarra - 698.98 trillion years old

Furoria - 699.01 trillin years old

Velirum - 699.05 trillin years old

PawStar System - 699.98 trillion years old

Jovira - 699.95 trillion years old

Skythos - 699.95 trillion years old

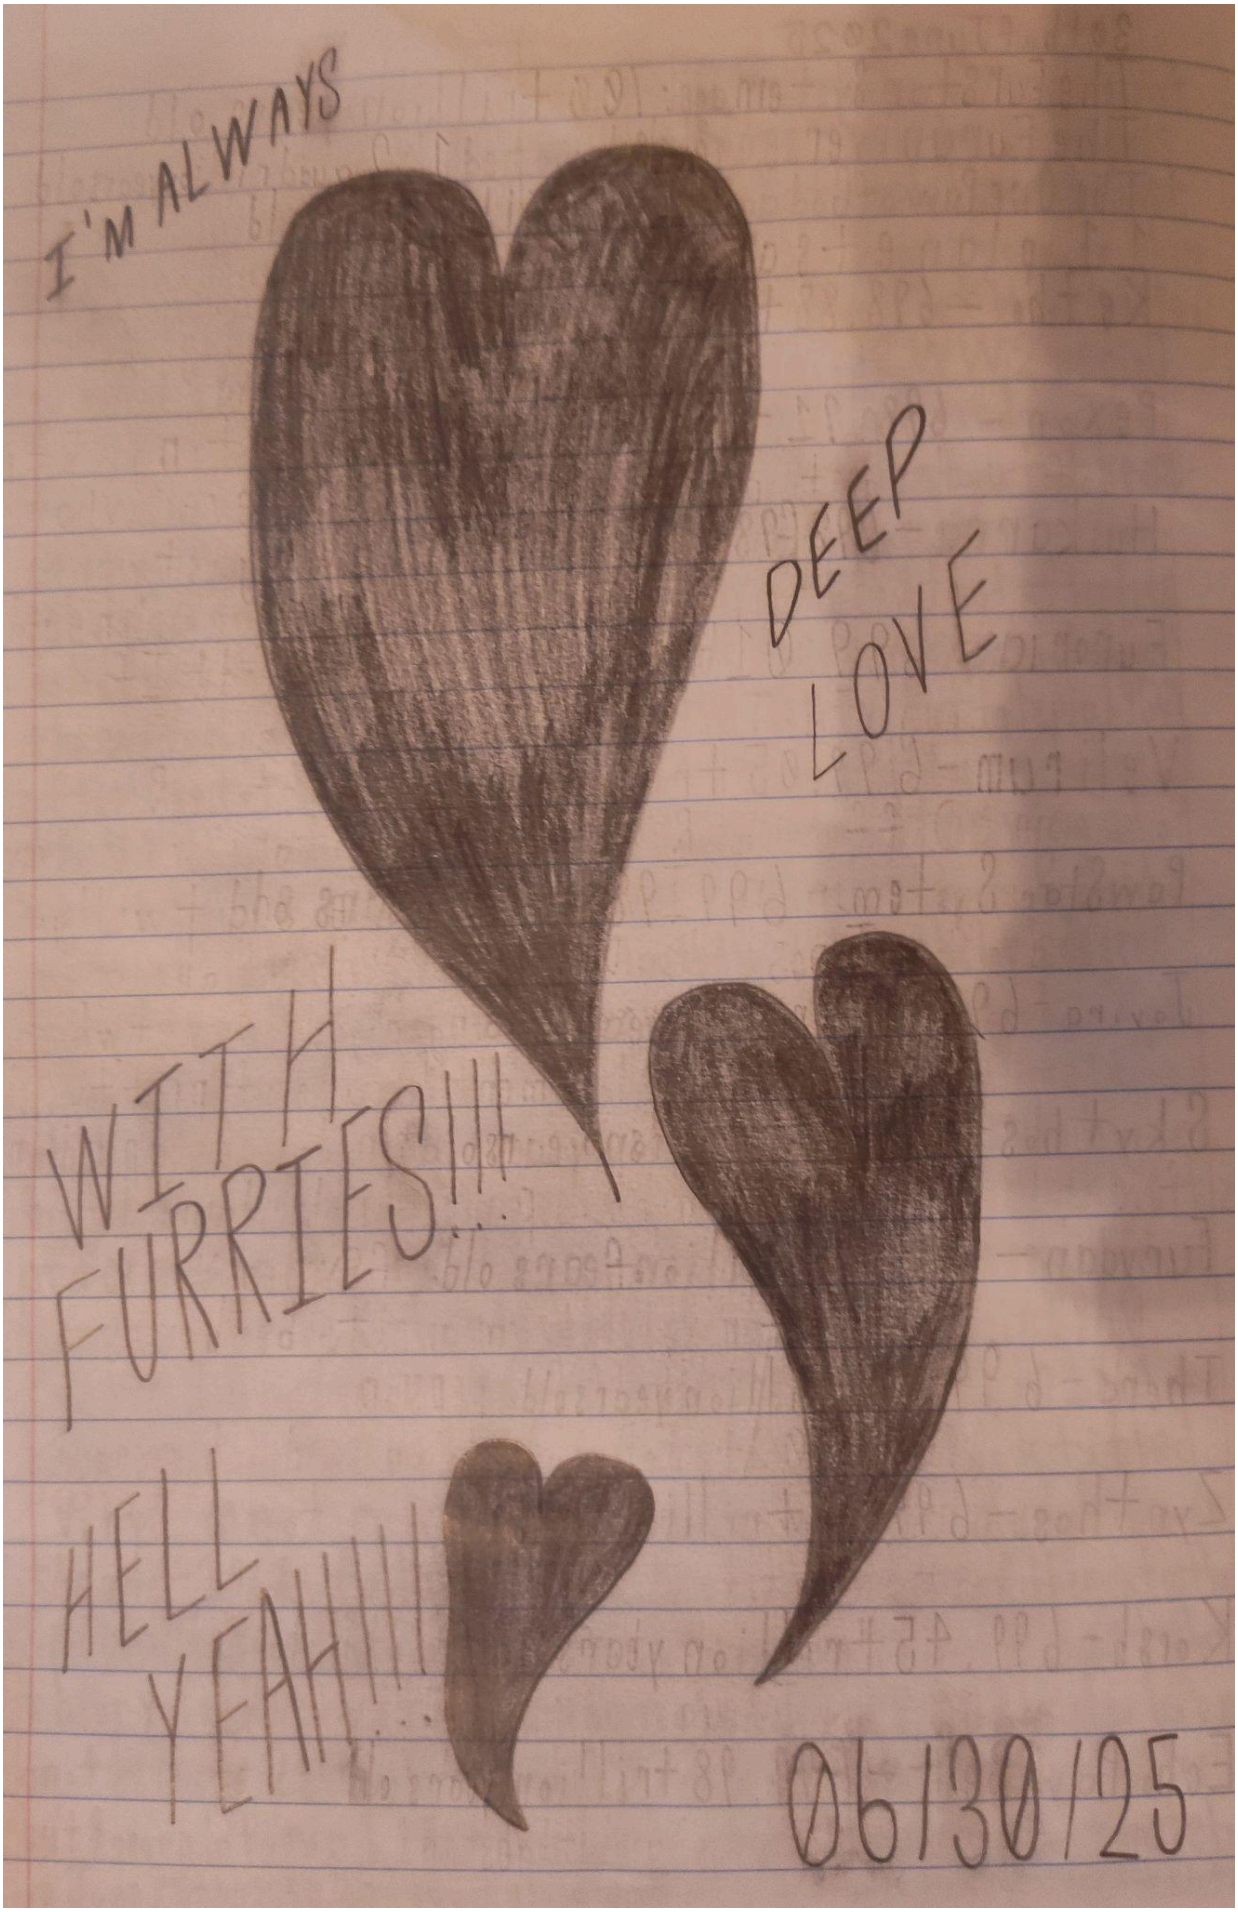
Furvaan - 699.95 trillion years old

Thera - 699.90 trillion years old

Zynthos - 699.79 trillion years old

Korsh - 699.45 trillion years old

Echo Paw Belt - 699.98 trillion years old



I'M ALWAYS
DEEP
LOVE
WITH
FURRIES!!!
HELL
YEAH!!!

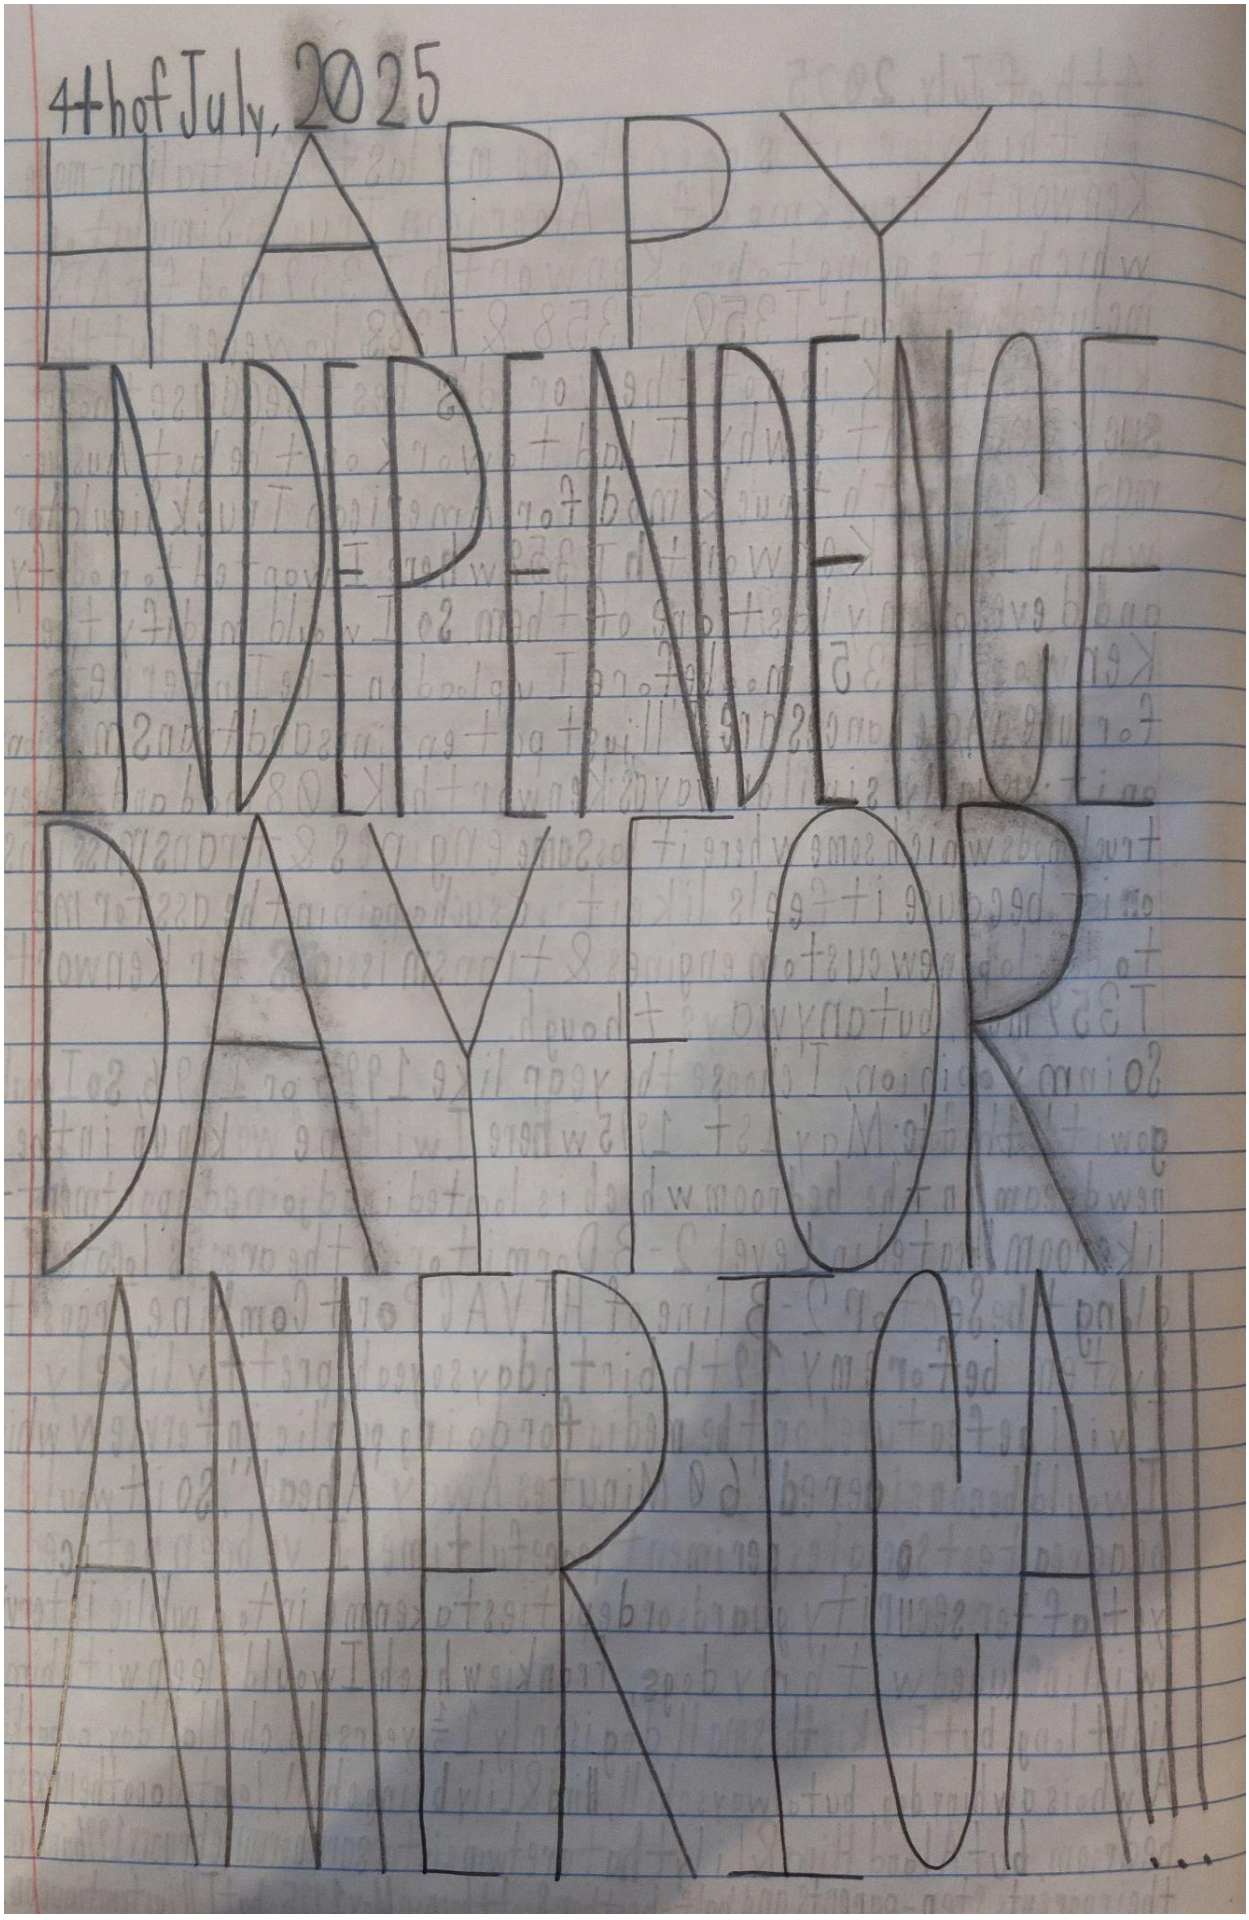
4th of July, 2025 - EDITED - 12/23/2025

In this year, it's going to be my last Australian-made Kenworth truck mod for American Truck Simulator which it's going to be a Kenworth T359 mod for ATS, included without T350, T358, & T388 however, but that kind of truck is not the world's best because those suck and that's why I had to work on the last Aussie-made Kenworth truck mod for American Truck Simulator which I choose Kenworth T359 where I wanted to modify and develop my last one of them. So I would modify the Kenworth T359 mod before I upload on the Internet for sure and chances are I'll just put engines and transmissions on it; usually, similar ways Kenworth K108 mod and other truck mods which somewhere it has same engines & transmissions on it because it feels like it is such a pain in the ass for me to develop new custom engines & transmissions for Kenworth T359 mod, but anyways though.

So in my opinion, I choose the year like 1995 or 1996, so I would go with the date, May 1st, 1995 where I will be waken up in the new dream in the bedroom which is located in adjoined apartment-like room located in Level 2-B Dormitories the area is located along the Sector 2-B line of HIVAC Port Combine Transit System before my 19th birthday so yeah, pretty likely I will be featured on the media for doing public interview which I would be considered "60 Minutes Away Ahead", so it would be a greatest social experiment peaceful times I've been noticed yet after security guards or deputies taken me into a public interview; including with my dogs, Frankie which I would sleep with him all night long, but Frankie the small dog is only 1½ years old, chill all day, no barking, Al who is a whiny dog, but always chill, Hina & Lily being chill, located another master bedroom, but Al and Hina & Lily that are twin sisters are born in February 1996; including their parents, step-parents, and half-brother Scott born in May 1995, but I'll just continue on.



4th of July, 2025
HAPPY
INDEPENDENCE
DAY FOR
AMERICA!!!

PART2

17th of July, 2025 - EDITED - 12/23/2025

So basically, in previous part, I've talked about where I wanted to modify my last Aussie-made Kenworth truck mod for ATS which is a Kenworth T359 mod where I wanted to work on and the date is May 1st, 1995 where I'll be wake up in the new dream in the bedroom located in Level 2-B Dormitories is located along the Sector 2-B line of HIVAC Port Combine Transit System before my 19th birthday in May 12th, but including my dogs, which my dogs live in separate bedrooms located in Level 3-C Dormitories is located within Sector 5-E Administration, along the Sector 5-E HIVAC Port Combine Transit System and as I said, I'm not going to talking about this reality, but I'm talking about the Furuniverse reality the alternative real-life form from a different reality, so let's continue!

That time I represent my dogs: Al, Hina & Lily, and Frankie, so I need 2 more left so yeah, let's do this. JoJo the big dog and his younger sister which sometimes I can sleep with the in another master bedroom in left side for Separating each other, but JoJo is only 8 months old and his sister is only 2 months old and Shadow the husky, but unfortunately, he's just disappeared whatsoever because he is somewhere in these another dimensions like cloudly lands, which it's part of Super Mario Galaxy-type furry dimension, however, likely I'll never see him if I go to the another reality, so it will be MGR-101 and speaking of going to the different dimensions, my dogs always live in separate bedrooms located in Level 3-C Dormitories located within Sector 5-E Administration, along the Sector 5-E HIVAC Port Combine Transit System and apparently my height is 6'1", which I'm a tall anthro husky man trapped or transfer inside of my entire body before I would be reborn as an anthro husky girl for having a new family due to my strong personal belief.

18th of July, 2025

Alright. So, I need 2 more things to make an information about the Fursun & the Furmoon, which it's going to be in Size in radius and diameter and age.

The Furmoonage:

698.96 trillion yrs old

The Fursun:

Age: 701 trillion yrs old

Diameter: 2,275,874KM

Radius: 1,137,937KM

07/20/25

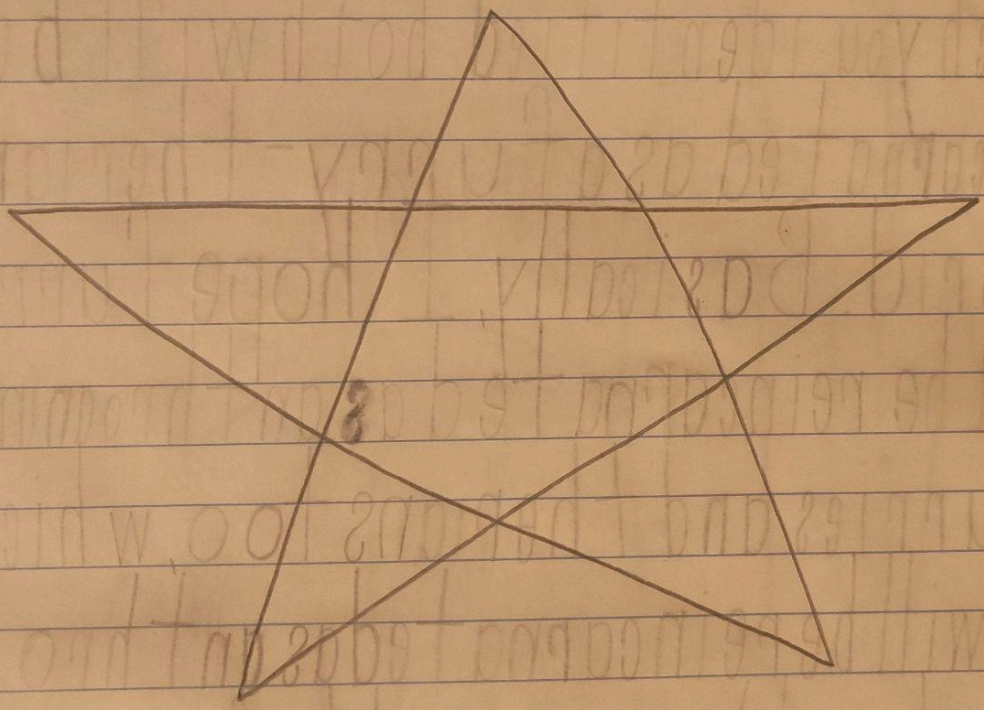
21st of July, 2025

I AM ALWAYS SPIRITUAL FOR MY PERSONAL LIFE.

26th of July, 2025

I'm more spiritual than human, always, act of kindness is part of my 60 minutes away ahead, but I don't mind that furry-therians, which you identified both will be reincarnated as a furry-therian hybrid. Basically, I hope furries will be reincarnated as anthroanimals as furries and therians too, which they will be reincarnated as anthro animals as therians in the furuniverse reality, just like I did wrote a very long description down below on DeviantArt. So, yeah. That's all I had for now.

I AM ALWAYS A SUPERSTAR.



60 minutes away ahead. 07/27/25

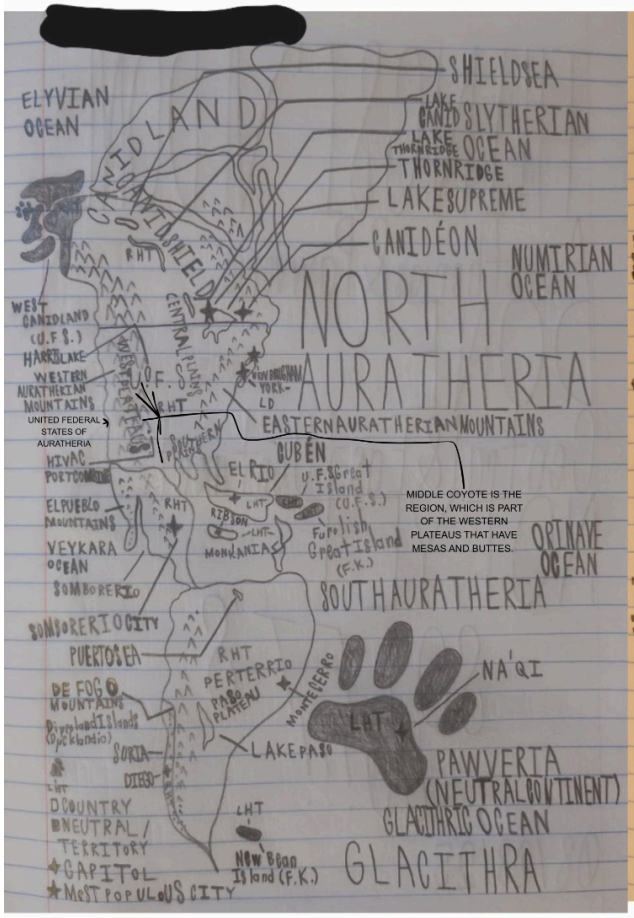
NOTE: THERE ARE ALL 22 COUNTRIES ON THE SUPER-EARTH PLANET FURORIA, BUT BUILDING STYLES ON FURORIA ARE COMPLETELY DIFFERENT THAN EARTH'S BUILDINGS BECAUSE BUILDINGS ON FURORIA ARE ANTHRO-STYLIZED.



AURATHERIA, CANIDLAND, DUCKLANDIA, DARRAKOON, LIBEREN, SOME PARTS IN SOMBORERIO, SOME PARTS IN AURATHERIAN ISLANDS, SOME PARTS IN SOUTH AURATHERIA, SOME PARTS IN SOUTH ZOLEKORE LESIMBA, AND SOME PARTS IN ZULEKORESE UNION DO USUALLY HAVE AMERICAN-STYLE STRUCTURES, BUT THEY'RE USUALLY VERY DIFFERENT AND OBVIOUSLY, NORDICAVIRE HAVE EUROPEAN-STYLE STRUCTURES, BUT THEY'RE LITERALLY DIFFERENT TOO INCLUDING RUSKARRA, MOST OF COUNTRIES ON FURORIA HAVE ANTHROPOMORPHIC ANIMAL-STYLE STRUCTURES AND 8 COUNTRIES THAT USE FLAGS THAT ARE BLUE, RED, AND WHITE: UNITED FEDERAL STATES, SURIA, SOUTH ZULEKORE LESIMBA, RUSKARRA (INCLUDING STAR ON THE MIDDLE OF THE FLAG), LIBEREN, FUROLISH KINGDOM, DUCKLANDIA, AND DARRAKOON.

THAT'S ALL OF 22 COUNTRIES IN FURORIA!!!...

FINISHED!!!

TOTALLY FINISED!!!!!!

08/08/25

9th of August 2025

Man... It did took me days and days to create the whole map of Furoria, where it has all 10 Continents, 7 Oceans, and 22 countries. However, it's not a joke, but I can approve that the furuiverse is in fact, real... Because... Everything's different and obviously, Everyone is an anthropomorphic animal and they usually have powerful biology and genetics because they have powerful vision, which including colorful vision, night vision, high resolution & motion tracking, such as berdorons and Primatarins because they have abnormal biology and genetics, however, if there's a evidence for it.

10th of August

Oh boy... My obsession is fucking crazy! The Planet We live In Is called EARTH. Not everyone's religious, not everyone's rich, not everyone's agnostic or athiest, not everyone's spiritual, and not everyone is poor, but in fact, everyone's different, we are all different, and everyone has their damn different opinions, however, different societies and so many thoughts all combined together, but it's about between us people who are living or deceased. I know there's too many fuckers on Earth and yeah, as I said; Earth is no perfect because my obsession is...

UNFORGETTABLE!!!!

08/10/25

UNFORGETTABLE,

EDITED - 12/23/2025

That's pretty much it! 90 out of 90! That time I chose the date May 1st, 1993, which I'll be waken up in the new dream for being reincarnated as a tall ant hro husky with 3 tails, including my dogs in HIVAC Port Combine, where I wrote on the journal post on Deviantart called "The year is 1993 in the future universe." and yeah, it's part of my strong personal belief and sometimes I changed my afterlife ideations... it's about the love... always unforgettable... farewell...

Regards,

Rinty Skyhusky

FURRY SELECTION

BASEMENT ONLINE DOCS

BY STEPHEN T. FLINT AKA RINTY SKYCOYOTE

(EDITED AND UPDATED - 08/05/2026, and it's bit better, tbh)

01/09/2025 - 12/29/2025

Furuniverse Journal Entries — January–May 2025

January 9, 2025

Man... it's January 2025 for me right now, and I feel like this year is going to be different. My plan is to write as many journals as possible, so this is going to become a very, very long story. I want to write something competitive and strongly express how I feel about love, fearlessness, hatred, and how these emotions can affect people's minds and push them beyond their limits, perhaps even becoming legendary in their own way.

Apparently, everything is changing, and my new mottos are going to be "IT'S TIME FOR THE UNSTOPPABLE RISE OF ME" and "FURRY SELECTION."

I'm planning something bigger: becoming a meme legend, becoming a legend in my own way, being reborn as a furry, starting a new life as a baby furry, having a new furry family, and living in the furry world of the Furuniverse. It could include small towns, urban areas, cities, vehicles such as trucks, school buses, cars, buses, and everything else that might exist in a furry world, but in a completely different reality.

It's going to be an epic plan that I'm starting from now on. We can become a Furry Selection group together, so come join us! It could be a lot of fun, and hopefully some of us could be reborn as furries, starting new lives as baby furries and living in a furry world.

In this imagined furry world, there could be fewer criminals in many countries and a more peaceful society than the world we currently live in. It could also be somewhat larger than our world. It's a concept that blends ideas about reality, peace, love, fearlessness, souls, and the magic of the mind, all connected to the idea of being reborn as a furry in a different reality.

I can almost guarantee that it's real, and it's part of the Furry Selection group. Yes, together, come join us! It could be a lot of fun and an incredible journey.

January 20, 2025

In my opinion, I'm obsessed with girls, and I wish I could have a relationship with a girlfriend in real life. I'd like to be friends with a girlfriend and, honestly, if I ever had the opportunity to date someone, I'd appreciate having someone who loved me. Right now, though, I don't have a girlfriend. Maybe I'll date someone someday if I get the chance, and I would appreciate that.

Speaking of my obsession with girls and wanting a girlfriend, I'd rather try something different too. I want to make lyric videos, draw random things such as furries and animals, create short films using 2D or 3D animation, and try many other things. I want to experiment with something new.

Unfortunately, I sometimes hate living my own life because I feel poor, restricted, and lonely. That's my opinion, and it's partly because life sometimes hasn't felt fair to me, especially during my later high-school years. I'm in 12th grade, I'm 19 years old, and I'm a young adult, even though I still consider myself a teenager.

Apparently, some people did an excellent job creating traditional or digital artwork and publishing it on the Internet when they were teenagers, both in the past and today. Many of them learned their skills during their school years. I know I'd probably have to teach myself how to create high-quality artwork if I want to become good at it, and I'd appreciate the opportunity to improve.

Back in mid-2021, I joined DeviantArt. Later that year, I started making poorly made GIFs and digital artwork and posting them on Newgrounds. I was 16 years old at the time.

Then, in mid-2022, when I was 17, I started becoming a modder. Unfortunately, I wasn't very good at modifying mods back then, and I even forgot to include the necessary files when I published something on ModLand. Eventually, though, I gradually became a better and better modding contributor.

It wasn't easy work. In fact, it was difficult, and sometimes it made me frustrated or pissed off. But that was back in the day, before I became a legal adult. Some of my old accounts are now inactive, while others are still around from that period. That's part of why I want to try something new.

January 26, 2025

According to the live news at the time, Donald Trump took the oath of office again at his inauguration and became the 47th president of the United States, with his new vice president, JD Vance. It was a historic moment, and I remember that Trump had previously been the 45th president, with Mike Pence as his vice president, after taking the oath of office on January 20, 2017.

That was back when I was in fifth grade. I was 11 years old, and I remember being a skinny kid. Now that's all in the past.

In my opinion, I need to finish writing my very long story about believing in an afterlife where I could be reborn as a baby furry husky girl and start a new life in a wealthy family, living in a different world—a furry world called the Furuniverse. In this imagined world, there would be different furry species, and it would be a more peaceful place than this planet, with little to no crime and no intentional mass-violence incidents.

It's an extremely peaceful place in my imagination. I want to join it in real life, within the context of my fictional universe, so I want to finish writing this story today, or maybe tomorrow. I don't know. It sucks sometimes, but who cares?

I want to give the project a fair chance. It takes time, and it has taken me a while to write this story about being reborn as a furry and living in a different world. At least I want to finish it today or tomorrow. Truly, it feels like time is moving too quickly for me these days, and, man... this sucks.

Sometimes I want to slow down time in my own life by taking a break or trying something new. I want to find ways to slow things down while I'm at home so I can feel more relaxed.

Unfortunately, time seems to be moving too quickly for me nowadays, which is why I sometimes want to slow things down. I also think I should go to sleep earlier tonight. I don't want to stay up too late all the time. Maybe putting my phone away in the evening and going to bed earlier would be a better routine for me.

At the same time, the Internet doesn't feel like the same place it used to be. The Internet has changed significantly over the years, and nowadays it can feel like a particularly negative environment, with misinformation, serious allegations, toxicity, and other harmful behavior.

From my experience, it sometimes feels like the Internet is getting worse.

February 3, 2025

Sixty minutes ahead. I am always sixty minutes ahead. These have been peaceful times, or at least that's what I've been noticing. It's a huge place. It's a masterpiece. It's a better place. It's a furry world. It's the Furuniverse. It's a huge military base and a different reality to observe—a place where I imagine living in a different universe for real. Some of these places have huge diagonal elevators, almost like something from Half-Life. But everything around me seems like it could fade away after I leave this universe. Sometimes it feels like I'm the last living soul on this planet, and everything will never feel the same again. My perspective on everything is different from this universe as I search for ideas, rivalries, and stories that encourage and influence people's minds. It's brave. It's enthralling. It's fearless. It's influential. It's mesmerizing. It's rising. It's spellbinding. It's a real story, and it's peaceful. At the same time, people's feelings can remain negative year after year, and people can continue to struggle with negativity year after year. Stories can be very different when comparing fact and fiction. People can have long conversations about the same things year after year, and that's simply part of life. There is a lot of messed-up shit going on in this entire freaking world: animal attacks, crises, economic problems, gun violence, murder, poverty, terrorism, wars, wildlife conflicts, and much more. So yeah, people fell into sad thoughts, and people and pets lost their lives through circumstances beyond their control. But that doesn't mean the world itself is bad, broken, or hopeless, or that nothing good exists. Unfortunately, some of these problems never completely disappear. The list goes on. We all know that nobody likes animal attacks, poverty, terrorism, war, or other terrible things. But there are plenty of good things in the world as well. People can be some of the most messed-up creatures on this planet, but that doesn't mean people themselves are broken. This world is unequal, and good things and bad things can exist at the same time. Someday, in the future, after I leave this universe, I imagine that I will wake up in the furry world of the Furuniverse. In my imagined furry world, there isn't as much messed-up stuff happening. My entire body is transformed into a male furry husky with a normal brain, and my memories may gradually fade away. I have an average weight and body fat, and I'm 5 feet 9 inches, or 175 centimeters, tall. That would be an average height for a human male but relatively short for a male anthropomorphic canine. The furries have plantigrade legs and feet, similar to humans. Anthropomorphic animals communicate like humans, and not every anthropomorphic animal behaves like an ordinary animal. Hopefully, everyone recognizes me when I enter the training room at the military base, which is inspired by the Half-Life aesthetic. There is even an indoor shooting range before I travel through the underground transit system. The system has vehicles with dual wheels. Eventually, I wake up in a bedroom with a computer and an Internet that is becoming increasingly developed. The year is April 1998, and I have a few more years to live before the year 2001, when I imagine being reborn as a furry husky girl and starting a new life as a baby furry husky girl in a wealthy family. Her birth year would be 2001.

February 4, 2025

Man... what in the hell is wrong with me?

Sometimes I try to talk to myself or talk to my dogs, and then my mother or father interrupts the conversation. It's so annoying, and I don't like it.

I sometimes hate feeling trapped in the house and being lonely because of my parents. It feels unfair and frustrating, and I don't like feeling as though I have no control over my own life.

I remember how some students in my classroom could be extremely loud. They would raise their voices, act crazy, and make a lot of noise. Honestly, I wish I could use my laptop to write documents and wear earplugs or noise-canceling headphones to help deal with the noise at school. Maybe I'll get something like that one day.

I've also been staying up late at night, sometimes almost all night, and I don't know why I keep pushing myself so far.

I want to go to sleep earlier in the evening instead of staying awake all night. Unfortunately, sometimes I have trouble falling asleep. I might stay awake, move around too much, overthink things, or deal with other problems that make it difficult to sleep.

I don't always understand why this happens to me at night. So yeah, it happens.

Sometimes I get frustrated with myself for staying awake and having trouble sleeping. It's unfair and annoying when it happens so often.

I know whatever I'm doing might be difficult, but I'll keep trying.

My goal is to reach 100,000 subscribers on my main YouTube channel. I want to work hard and make average-production YouTube videos, such as lyric videos, while doing my best and hopefully getting support from other people.

I'd like to work with and support other people before I gain a significant following. Eventually, I'd like to make enough money to become a furry influencer.

I want to start uploading to my main YouTube channel again and publish a couple of videos whenever possible. Hopefully it works out. Maybe it will, maybe it won't. I don't know. It sucks sometimes, but who cares?

I'll always be thankful for the people who support me. I want to keep trying my best. That's my opinion, and I know that I have to be responsible for what influences my own mind and well-being.

Money is also something I have to think about. Even so, life can still be good, and I might just have to take things one step at a time.

February 5, 2025

There are so many undocumented people out there on this planet—people who aren't famous or infamous and simply live their everyday lives. Unfortunately, there are also many criminals around the world.

Apparently, there are many anti-furries who oppose the furry community because of misunderstandings and misconceptions. I don't hate furries. I love them, and I'm very interested in the furry community.

I wish I had a husky fursuit at home so I could wear it every day in real life, but I don't currently have one. Maybe someday I'll be able to get one.

Unfortunately, I don't have enough money to buy a fursuit right now. I'm broke and don't have much money, so I'd like to make and save as much money as possible first. Then, if I can afford one, I'd like to purchase a fursuit.

I'm genuinely very interested in furries. I'm not joking about that—it's simply part of my story and my interests.

I've also been doing a lot of hard work modifying mods for Euro Truck Simulator 2, American Truck Simulator, Farming Simulator 19, and BeamNG.drive.

Recently, I tried something new: following a tutorial on how to create a sound bank using FMOD Studio for Euro Truck Simulator 2 and American Truck Simulator. It was my first time doing something like that.

I tested the engine sound in Euro Truck Simulator 2, but unfortunately, it wasn't successful at first. Something wasn't right, and the result wasn't what I expected. Sadly, I didn't do the best job I could have done.

Eventually, I found a better project file connected to a YouTube video published in 2020 during the COVID-19 pandemic. The video included a link in its description, but the title and description were written in Brazilian Portuguese.

I finally tested the engine sound again, and this time it worked pretty well. After testing it successfully, I uploaded the sound mod online.

The mod was called Scania DS11 Engine Sound and was made for the Scania 1-Series by Antonio62/Shoofer. There were also other unidentified and anonymous modders involved, although I don't know exactly who they were.

There are many anonymous people on the Internet who choose to keep their identities private, and that's understandable.

February 11, 2025

About four months ago, I published a handwritten page document on DeviantArt under the username MyJournalWritings. It was about Warrior Cats (Warriors), and the story was relatively short.

I believe the Warrior Cats fandom and therians are real, although that's my personal opinion. I'd like to read some of the Warrior Cats (Warriors) books by Erin Hunter someday. I could imagine lying down, taking a break, reading a book, and then taking a nap or going to sleep.

I've also imagined being reborn as a cat in the Warrior Cats universe and living in a different reality. I could join the clans, make new friends, and live for an extremely long time. That's part of my imagined afterlife plan and my desire to escape the tragedies of this world.

I sometimes imagine having either a long life or a short life in this world. I imagine having plenty of time to do different things, but sometimes it feels as though I'm the last living soul on the entire planet in this universe, and everything will never feel the same again.

Everything could be different from this universe. Sometimes I imagine these ideas as dreams, stories, rivalries, and handwritten concepts coming to life.

There are dozens upon dozens of people who keep their identities and younger pictures private. They may not want public recognition or attention and simply want to live as ordinary people.

Speaking of privacy, I'm also going to talk about my own history with weight. I've gained and lost weight over the years, going from skinny to chubby and eventually becoming more average.

I was born with a normal body, but I became very thin when I was young. As I grew older, I remained relatively skinny from childhood through my early teenage years and into the late 2000s and late 2010s.

Later, around late 2019, I started gaining weight because I was eating too much junk food. I became chubby for a couple of years.

Then, around late 2021, I started losing weight. I lost some body fat and became more average in build, although I still had a little bit of body fat around my waist. I also started working out regularly and gained more muscle.

That was several years ago now, but it remains part of my personal history.

February 12, 2025

It feels like time passes too quickly. Things can feel rough nowadays, and even though it seems crazy, that's how it feels to me.

I'm extremely frustrated about living in a two-story house in southern Oklahoma City. There are also things around the house that make me uncomfortable, including weapons such as dangerous knives and a gun safe, as well as power tools.

I prefer using normal hand tools instead of power tools.

I'm also frustrated about feeling lonely, having little money, feeling trapped at home, lacking support from other people, and making videos that I don't think are produced as well as I'd like.

One thing I want to do in the future is replace the Dell Inspiron PC case with a different Micro-ATX case. I'd like to move the existing components into the new case.

I'm interested in finding a Micro-ATX PC case with an optical-drive bay and using hardware such as an Intel Core i5-2320 CPU, a 4 TB hard drive, a graphics card, and a compatible CPU fan. I'd like to find equipment in excellent condition that is fully working.

I don't know whether my parents would be upset or think I'm doing something stupid by working on a project like this, but it's something I'd like to try as part of a future upgrade plan.

I also want to make and save more money. If I ever become wealthy, I'd be glad not to be broke anymore. Sometimes I even dream about being rich, but in reality, I'm not.

Some people are born into wealthy families, while many others are born into middle-class families. I also have family members who have served in the military. My father served in the United States Air Force for two decades when I was younger.

Now I'm a legal adult, although I still consider myself a young man and sometimes still think of myself as a teenager.

There are also people who lose their jobs for various reasons. Sadly, some people struggle so much that they end up facing homelessness. There are many homeless people in the world, although most people are not homeless.

It's pretty sad and heartbreaking to think about. This world is tough for everyone.

February 14, 2025

Seriously... why is time going so slowly for me, no matter how long it takes? This isn't fair. So, when I left my backpack by the wall and went to get lunch in the kitchen near the cafeteria, there were so many students in the cafeteria getting their lunch, walking through the cafeteria, going outside, and eating at the picnic tables. It was also so freaking windy outside. So, I took my lunchbox out of my backpack and opened it. It had a Cheez-It Cheddar Jack pouch, a Mott's Gummies pouch, and a burger sandwich inside the bag. I finally threw the bag of burger sandwiches into the trash because I stopped eating burger sandwiches, and then I finally started eating my lunch. I also ate the food on the tray first and then ate the food from my lunchbox. Unfortunately, when I was chewing the hard Mott's gummies, they got stuck to my stupid aligners, and the small rubber band on the left side of my upper aligner finally detached. It frustrated me so badly when I ate the Mott's gummies, especially those hard-chewing gummies. So, I went inside the school and walked through the cafeteria to the short hallway. I saw that the door was pretty much locked. I was supposed to go to the bathroom and look in the mirror so I could reattach the small rubber band to the left side of my lower and upper aligners, but nah... I don't know why the school staff members locked those doors. The door was closed when I tried to go to the bathroom, and I couldn't deal with how much longer it would take. It felt pretty unlucky and unfair to me, and it absolutely sucked so badly. But sometimes things can be unexpected, and this is just my short story about today. It's my first story about my current days.

February 16, 2025

So, I want to have a Social Security number so I can accept my money from my PayPal account for some reason, or have a bank account so I can transfer my money from my PayPal account. I want to make a lot of money, so my net worth goal is to reach over $50K, $100K, or even $1M. That's my net worth goal. If not, oh well. Sadly, I know I'm still broke. I know most people don't care about me, most people don't know about me, and I know nobody cares enough about me. Apparently, I would have to work really hard because I want to achieve recognition, not just mostly within the modding community, but outside of the modding community as well. I also want to achieve financial success. I want to make money and save money. Yes, that's my plan.

February 16, 2025

There are many people who live better lives than many other people, including me. Like, what the hell is wrong with many people, and why do so many people have struggles in this world for no reason? Life isn't fair for many people, and life isn't fair to me either. Sadly, this sucks...

I can't deal with living my own life while being lonely for such a long freaking time. But life is long for many people, life is short for many people, and people live their own lives. Some make money, some don't have fame or notoriety, and some work. People also live their own lives without making money, fame, or notoriety, and some are unemployed or don't work from their early elementary school years through their late high school years until they eventually get a freaking job. It depends.

I know I was so pissed off because I can't trust living my own life when things are so strict, whether it's at home, at school, or in other strict places. It feels unlucky for me. Unfortunately, I can't deal with being a strict person, and it feels pretty disgusting to me. It absolutely sucks.

I can't take this shit anymore about living my own goddamn life as a broke person, a strict person, a lonely person, and a trapped person because of this freaking situation with my freaking parents!

MAN... THIS IS NOT FAIR! WHY DO I HAVE TO LIVE FOR A FREAKING WHILE WITH A LACK OF FREAKING MONEY?! IT FEELS LIKE IT'S SUCH A JERK!!!

It makes me so pissed off, and it absolutely sucks when I live in a freaking house that includes weapons, a gun safe, guns inside it, knives, and other types of weapons as household items. I'm not planning to commit a freaking crime or carry out harmful or violent actions. Yes, that would be a crime, but in fact, it still feels like endless hell living with this situation.

Chances are, it's pretty hard to live with this worthless piece of crap, but it's about complexity, not because of neutrality, but because of many interacting factors.

I know many people used to play the Call of Duty series, Counter-Strike: Global Offensive, and other kinds of video games back in the day when they were growing up. Counter-Strike: Global Offensive was officially succeeded by Counter-Strike 2.

That was before the COVID-19 outbreak, when this world felt extremely hellish to live in because it felt like pure evil. I remember when it happened back when I was in middle school, when the coronavirus first spread in China and then around the world before I turned 15 for my birthday.

Unfortunately, millions upon millions of people died during the COVID-19 outbreak, and it was a huge sadness. Yes, it was very sad that so many damn people lost their freaking lives through circumstances beyond their control, but that was back in the day.

Anyways, Earth is such a beautiful place where we live, and there are so many tragedies, unusual events, and unreported incidents or accidents that it can be difficult to track them or protect against them. Unfortunately, they don't completely go away because they're not fixed in a completely fair way or in an everyday sense.

Such a worthless, miserable life to have to live in it (this doesn't mean a person's life truly has no value or that their situation is permanently hopeless)!

February 17, 2025

When I went to the dentist in Norman, Oklahoma, I recently got my new aligners. I was planning to wear them on my upper and lower teeth. The bag of aligners had the same number on it, and it actually said “11 of 33.” It also had the correct way to wear them for my teeth.

Unfortunately, I had been wearing upper aligner number 10 and lower aligner number 9, but they weren't the same number.

So, last week, when I took the aligner bag out of the box, it said “10 of 33.” There was one upper aligner that was the right way to wear it for my teeth and one that was the wrong way to wear it for my teeth. It looked pretty when I tried to put it in with my two hands, but something wasn't right because I had been wearing lower aligner number 9 for two weeks, and that was last week.

So first, we went to McDonald's, and I had a Double Big Mac burger, a Coca-Cola drink, chicken nuggets, and French fries. Then I had some extra food, including a normal burger and sweet tea.

After that, we went to Moore, Oklahoma. The Tractor Supply Co. store is located near a high school, an elementary school, and the highway. Before we went into the store, I dumped the ice onto the grass first. Then, after we entered the store, I threw the trash away in the small black trash can near the exit area.

Unfortunately, my father didn't know that I had dumped the ice onto the grass. My father thought that I had been hit by a vehicle, and I was so pissed off at my father because he didn't know about what had actually happened... so stupid.

Apparently, that's what happens when I dump the ice onto the grass and then throw the trash away. And there I have it.

February 18, 2025

So, in my opinion, I'm always obsessed with furries. Basically, I recently published a typewritten page document on Google Docs and DeviantArt under the username MyJournalWritings about being interested in furries. I'm obsessed with them, and the story is a bit short because I've been typing it out.

I want to be a fursuit guy every day, and my fursona species is going to be a husky, so why not?

It would be so much fun if I were a member of the furry fandom, and maybe, yeah... I would. Unfortunately, I have a low amount of money because I'm broke, and I know I don't have enough freaking money to purchase a fursuit for this damn thing.

But in fact, I would like to meet people wearing fursuits sometime in real life, so they could communicate, bark, howl, or roar with me. I don't know; it doesn't matter to me. So yeah... it would be a lot of fun to do.

There are also some big furry influencers out there. Some furry influencers gain huge followings, make a lot of money, live better lives, be playful, and do all kinds of things they want to do.

February 23, 2025

When it comes to getting attention on the Internet, except mostly within the modding community, the game I'm talking about would be BeamNG.drive. It has many random mods downloaded online. Being an online modder is not a job, especially if you make low amounts of money when you upload a mod file to non-direct-monetization websites such as ModsFire, ShareMods, and other kinds of non-direct-monetization websites on the Internet. Uploading a mod file to those websites isn't typically a job. However, if you make a lot of money by uploading a mod file to direct-monetization websites such as Ko-fi, Patreon, and other kinds of direct-monetization websites on the Internet, then it can become a job. So, like I said before, being an online modder is not a job, but in fact, I want to shift into YouTube. I want to make average-production videos or high-production videos and then upload them to YouTube to get a lot of views. If not, I'll just get a normal freaking job for my own reasons. But if you make a poorly produced video and upload it to YouTube and get low amounts of views, it's not a freaking job. I can almost guarantee that YouTube requires a larger audience for monetizing a YouTube channel, and it especially requires a lot of hard work and support from other people. That's true, since YouTube has changed throughout the years. I know there are some small YouTubers out there who try their best to make average-production or high-production videos and then upload them to YouTube with a good title, thumbnail, and description so they can make good money and do a good job at it. But it's true: I still have a lot of time to do it. Nonetheless, I'm not just going to be in my room watching YouTube videos, playing games, and doing other kinds of shit. I do work, and I wish I could get a job before I graduate high school so I could make a bit of money from what I do. But life is good and might just get fair enough. I know there are people online, such as influencers, Internet artists, and other kinds of Internet-based workers, who keep their identities private. They may keep their full names, middle names, or last names private because they don't want to reveal them. They may also choose not to reveal their faces, especially if they feel uncomfortable with how they look, because revealing their faces can sometimes feel like a weird thing to do inappropriately. But it's true. It seems pretty fair and lucky to me, and I imagine that I would have to do a lot of hard work and do a very good job at it. I would appreciate that.

February 28, 2025

So, when I was in 2D/3D art class during the 3rd hour, I saw a tall teenage girl making a fursuit. I was like, “Wait, is that a fursuit?”

She said, “Yep.”

This was my first time seeing a fursuit in real life. It was just a fursuit head that she was making, and the material she was using to make the fursuit head was some kind of foam.

So yeah, it looked like something strange. It was real, and I'd never seen anything like that in real life before.

Even so, it was my first time seeing a fursuit in real life, and maybe one day, after going back to school and switching classes for the 3rd hour, I'll see a fully completed fursuit for the first time in real life.

March 2, 2025

Six months ago, back in late August 2024, it was my first time making a school vlog. Two boys and I were saying something together during 4th hour in tech class.

After I finished recording my first school vlog video, I did a little bit of editing, just on some of the video clips. I cut parts of the beginning and ending clips in half and deleted them. It also took a while to convert the video because it had to be processed before I could upload it to YouTube.

When I uploaded my first school-vlogging video to YouTube, the YouTube channel was under the username Totally Not FurryManforme1976. Chances are it wasn't going to get many views. In fact, I could almost guarantee it wasn't going to get many views.

But if my first school vlog video did get many views, it could blow up, and the views could reach at least 100K views or more than 100K views. I don't know; maybe something like that could happen in the future. It could get as many views as possible... we'll see.

Speaking of making vlog videos, I would like to make a better video and then upload it to YouTube. My new channel was created almost two months ago. Yes, my new channel is almost two months old, so it would be about eight days away from March 10, 2025, when it would be two months old.

It could get more than a hundred views, a thousand views, ten thousand views, or a hundred thousand views, or whatever. It depends. Chances are, not many people are going to watch some of my videos on YouTube.

So yeah, I haven't been uploading that much recently because of a lack of inspiration. I've been trying my best, and unfortunately, my YouTube videos kind of suck.

March 7, 2025

I hate the way I hit puberty, with the development of my facial hair, axillary hair, and body hair. It feels pretty weird, uncomfortable, and disgusting to me. I don't really like guys either, particularly many guys with facial hair, axillary hair, and body hair. They're weird and disgusting to me, and they're kind of like werewolves. I always prefer girls over guys because I'm obsessed with girls, but I never thought about wanting to be transgender. I never thought I wanted to be like many of those guys who grew facial hair, axillary hair, and body hair and looked like werewolves. I never thought I was gay, and I am not gay. There are some men who are married to other men as husbands, which means they're gay, and there are some women who are married to other women as wives, which means they're lesbians. In fact, there are different kinds of sexualities in the LGBTQ community, but it makes me wonder about those kinds of gender identities. It's safe to say that, in my view, there are two main genders. Yes, there are only two main genders: male and female, blue and pink. Many people are born male, and many people are born female. My thought is that I never want to be a trans woman. There are a lot of LGBTQ people out there on this planet, and there is always Pride Month every year. I know my voice is sort of high-pitched, but every time I talk, my voice can sound like an old woman's voice when I use certain body language. But yeah, kind of. It also seems like I'm thinking about becoming transgender, and it feels strange to think about becoming transgender or a femboy. However, it might be fair enough, and I want to say that my gender is male because I was born male. Speaking of people who were born male or female and those kinds of topics, every once in a while, I imagine myself as a furry husky girl, planning to be born female and start a new life as a newborn furry husky girl, born into a wealthy family. After I come back as a furry husky, my entire body will be trapped inside and covered with fur. My weight will be healthy, my body fat will be healthy, and my muscles will be strong, but I won't be like a muscular guy. My feet will be an average size, similar to my current feet size. My voice will have a normal pitch and be in the middle range. My height will be a little above 5'9", or 175 cm, so my height could be 5'10", or 178 cm, or maybe 5'11", or 180 cm, something like that. So yeah, my current height is trapped inside. I'll have a lack of fear as well, and I'll be brave. It's pretty likely that I would wake up in a different reality, in a bedroom inside a military facility base. It would include dozens of PCs, PC parts that could be used to build a PC, monitors, and laptops located in storage areas. There would also be bedrooms, private bathrooms such as small bathrooms with a bathtub and shower, bathrooms with only a shower, bathtub/shower combinations, or bathrooms without a bathtub or shower, depending on the location. There would also be public restrooms, including many all-gender public restrooms, although not all public restrooms would be all-gender. Many public restrooms would still be separated into men's and women's restrooms. There would also be universal locker rooms and more. The location would be in a desert area with 15 sectors, similar to the Black Mesa Research Facility, which is located in Black Mesa, New Mexico, U.S., in Half-Life. Three of the last sectors would be military-base sectors located near the underground research facility. It would be a huge base, while I would still be claimed as a furry husky girl who would be born into a wealthy family with a full identity, although it would be different. First, the first name would be English-inspired, and the middle name would be Russia-inspired. Proof that everyone is an anthropomorphic animal in the Furworld is that they have plantigrade legs and feet shaped like human feet.

March 10, 2025

Over the last few years, when I was in middle school, it was my first time going to an auditorium. It was part of a school play, and the high school was located near a small town in Moore, Oklahoma. I was so afraid of the high ceilings, and it made me feel uncomfortable to watch because it felt unsettling to me. But that was back in late 2018, before the COVID-19 pandemic. Unfortunately, I know it sucks to go to an auditorium today for a play, concert, assembly, lecture, or ceremony if you're scared of high ceilings. It can make you feel uncomfortable and uncertain about the whole situation. In my opinion, I've been to the school auditorium a couple of times during my school days. Unfortunately for me, I recently tried not to be afraid of high ceilings when I looked up, but it still felt unsettling. Speaking of going to a school auditorium for a play, concert, assembly, lecture, or ceremony, it has a high ceiling. So, back in January 2025, it was my first time playing Half-Life. The original game was released in late 1998, and since it is only 26 years old at the time of this journal, it was released back in the day before I was born. Three years from now, in 2028, that game will be 30 years old. It's not a new video game; it's an old video game. By the way, it was also my first time playing Half-Life: Opposing Force and Half-Life: Blue Shift. Both are expansion packs for the original Half-Life, the 1998 first-person shooter game. Speaking of Half-Life, when I was younger, I used to play many kinds of online games back in the day. It was one of my favorite things to do on the Internet when I used to play a lot of online games. So yeah... it's just a little story about my childhood years in the past. Speaking of my early-life stories, I know my entire life has been changing throughout the years. I've shifted into different things year after year after year after year after year. However, this entire planet has also been changing for so many damn years. It's always changing, it's always different, and there are the past, the present, and the future.

We all know most people are unpopular because most aren't famous whatsoever. Unpopular ≠ unimportant.

We all know most people aren't rich.

We all know people can have good mental health, and we also know that some people have horrible mental health problems.

We also know that most people are undocumented because they aren't famous or infamous whatsoever. Undocumented ≠ unimportant either.

We all know most people are unidentified because they aren't famous or infamous either.

We all know many people have a lot of money.

We all know some people are poor, including people who are in school, people who end up homeless, or people who live in poverty.

We all know some people are public figures.

We all know most people are private.

We all know early-life information about most people isn't available to the public at large.

We all know many people have done bad things and committed crimes.

We all know people live their own lives while experiencing loneliness.

We all know some people have become famous or infamous.

We all know everything is different, and we can all agree that everyone is different and that this world is so tough for everybody on this planet. But like I said before, it's in my previous page document, where I wrote about one month ago about continuing to be 60 minutes ahead of everyone else for my afterlife plan. You will continue to consume your minds to understand how to step forward in your own life. Never ever give up. Life and time often go faster than we think.

March 17, 2025

So, at that time, my mental health had declined only sometimes, but it happens to me nowadays. I know it can feel pretty unbalanced for me sometimes when my father says those disgusting things to me.

It can make me worried and cause me to cry, and my mental health has declined for no reason.

About a single year ago, when I was in 11th grade, I used to write inappropriate letters and give them to other people at school. I also used to give away things to other people at school, such as die-cast vehicles and other kinds of things.

I stopped giving things away to other people and stopped giving inappropriate letters to other people at school because I never want to do that anymore.

So yeah, enough is enough with this bullshit.

It is a crime, and by the way, I've been looking up those deep, dark, depression-related things on the Internet too much. I don't know why I did that.

Unfortunately, about one year ago, I also had a horrible response from my father. My father said those disgusting things to me about planning to commit a crime whatsoever, so I decided I had to stay away from it.

My house has gun safes and knives, and that does feel extremely disgusting to me, especially since my mental health had declined at some point.

Man... I hate those goddamn people purchasing firearms for home defense, including people buying AR rifles, shotguns such as Mossberg 500 series and Remington 870s, and other kinds of shotgun models or handguns.

However, I just can't trust those people living in their houses when they have a gun safe with guns inside. It is safe to say that I would rather stay away from it.

So yeah, it sucks so badly because it's pretty hard to live with this situation, and it feels dangerous for no reason.

Apparently, it's not just the United States of America. It's worldwide, where many countries have people who own firearms for home defense. In fact, there are some countries where civilian firearm ownership is heavily restricted or prohibited in certain circumstances.

So yeah, but in my opinion, it's true, and there is a lot of messed-up crap going on throughout this entire planet and on the Internet as well.

But this isn't meant to say that the world is broken or bad, or that the Internet is broken or harmful.

I want to say this: you better be careful about what websites you're visiting and what you're looking up on the Internet.

Especially, don't visit those weird, deep, dark, depression-related websites, and don't ever look up those weird, deep, dark, depression-related things online.

Yes, there are a lot of badass things on the Internet, and there's a lot of badass stuff on Wikipedia too. You just better stay away from the things you're looking up if they're making things worse for you.

March 27, 2025

In my opinion, I strongly dislike having my stupid nickname in Japanese when my mother calls me by my nickname in Japanese every day. I would've preferred having a nickname in English, so my nickname is Steve. It would be my dream if I had the nickname Steve. However, back in the day, I did have previous nicknames when I was little. So yeah, it's been so many years, and I know it makes me feel uncomfortable when my mother calls me by my nickname in Japanese. It feels like it sucks when I have to keep my nickname in Japanese. So yeah. Speaking of changing my nickname... I would like to create these kinds of afterlife realities, but those realities, universes, and theories are more like the possibility of a single universe. I would name the theory "Singular Theory Separation." So yeah, it's not like a multiverse belief, but only a singular-reality belief. It's only one single dimension for some point. I could create 6, 7, 8, 10, or any other number, with the maximum number being 20 singular-reality dimensions. So yeah, I would say that, but that's my opinion. Over the last few years, back in late October 2018, Over the last few years, especially around late October 2018, Chris Chan (Christine Weston Chandler) made announcements about the Dimensional Merge. She believed in a multiverse theory involving fictional universes existing as other realities, particularly through the ideas of C-197 and 1218. If you guys aren't familiar with Chris Chan, that's fine. You don't need to know everything about her or her Internet history to understand what I'm talking about here. And I just wanted to say that she's known not only for being one of the most documented people online, but she also has a horrible Internet history (although that doesn't mean her online history is entirely controversial). She has also done a lot of awful and disgusting things in the past. I personally have mixed feelings about her, since I think she's done a lot of terrible things but may also have good qualities. Her life is pretty tragic, and there's no defending some of the things that happened. No excuses whatsoever, and I do not condone or support any of Chris Chan's horrible acts. But there's an alternate reality where Chris Chan remained Christian Weston Chandler, became a successful comedian, artist, or something else, and became famous for positive reasons while remaining a good person. So yeah, it would be interesting to imagine a reality where Christian became famous rather than notorious online. Speaking of Chris Chan, I am also planning to escape this reality because this entire planet has so many tragedies. There is a lot of messed-up crap going on in this world, and the Internet has a lot of weird, deep, dark, depression-related things in this goddamn reality. But that doesn't mean the world is broken or bad, or that the Internet is broken or harmful. So yeah, I just can't trust it. In my opinion, I am claimed as an anthropomorphic husky girl who will be born into a wealthy family. After I transition into an anthropomorphic husky, my entire body and head will be trapped inside. My skull will be transformed into a husky skull and covered with black-and-white fur. My brain will be average because my brain is trapped inside. I won't have any diagnosis. My current height will be trapped inside, so my height will be 5'10" or 5'11". My voice will have a normal pitch and be a little lower. My feet will be the same size as my current feet. My memories and knowledge will fade away. I will be brave about everything and have a lack of fear. I will also have triple tails. So yeah, I would wake up in a bedroom inside a huge underground research-facility military base, similar to the Black Mesa Research Facility. It would have military research laboratories, including medical research laboratories, technology research laboratories, weapons research laboratories, electronic-warfare research laboratories, and other kinds of military research laboratories. There would also be a few storage rooms with dozens of PCs, PC parts that could be used to build PCs, monitors, and laptops. There would be private bathrooms, all-gender public bathrooms, traditionally divided men's and women's public restrooms, bedrooms, administration areas, weapons safe rooms, training areas with a shooting range, and many other places. The sectors would be different, with both above-ground and underground sectors. I would live there for a couple of years while working as an engineer, inventor, and PC builder. I would be wealthy and live with my dogs, Frankie, Al, and Hina & Lily as twin sisters with three-decade-long lifespans, along with Al and Hina & Lily's twin sons, parents, and stepfather. Almost every day, they wouldn't be panting, and they would live in different bedrooms rather than the same bedroom, except for Frankie and Al and Hina & Lily's twin sons. I would wake up in the new dream while still being claimed as a furry husky girl, and the year would be 1998. After I woke up in the new dream, I would say something like: "Humanity are the most messed-up creatures on planet Earth, and unfortunately, the Internet is the most messed-up thing in the observable universe, too." That doesn't mean people are broken or that the Internet is inherently harmful. I would meet an anthro goddess who is 60 minutes ahead of me. She could be an anthro kitsune or wolf who would send me there 60 minutes ahead, so it would take a while before I went through the big teleportation system to travel to the Furuniverse. Then I would wake up in the bedroom in the huge underground sectors of the research-facility military base. That military base would be very famous for its high security, underground people movers, underground trolley buses, research laboratories, military vehicles such as military trucks, tanks, and other kinds of military ground vehicles, training, and other kinds of maintenance, storage, and development in the Furworld. No humans would exist in the Furuniverse because everyone would be an anthropomorphic animal with hands shaped like human hands, plantigrade legs and feet, and feet shaped like human feet. Furries would exist, but in a different real-life existence rather than a fictional existence. Everything wouldn't be the same, except for some holidays and some firearm models. For example, there could be some rifle models similar to AK-style rifles, but they would be different modern AK-style rifle models. There could also be M16-like, M4-like, or AR-like rifles, G3-like rifles, SKS-like rifles, and some other similar models, but not most of them. There could be some machine-gun models, some LMG models, some SMG models, and only very few shotgun models, except SPAS-12-like designs. These could be highly produced and used for military purposes, similar to how firearms are represented in video games. There could also be some handgun models, and some firearm models could be similar to those in our reality. So yeah, most of them would not exist. Some military-use firearm models would be similar, while most civilian-use firearm models would be different or generic. I'm not going to talk about model firearms as a hobby. I'm just discussing real guns, and some of these real firearm models are similar while most are generic types. However, many anthro dog breeds as species would coexist, while most would not coexist. Almost every language would be familiar, but some languages would be different. There would also be some similar vehicle models, such as truck models like the International S series, including truck and bus chassis. Only a very small number of military, medium-duty, heavy-duty vehicle models, and aircraft models would be similar to this reality. The brands would be different, and most vehicle models would be generic types manufactured by different brands. So yeah, every brand wouldn't be the same. The Internet wouldn't be the same. Events wouldn't be the same. Political leaders wouldn't be the same. Counties, countries, provinces, regions, states, territories, and ZIP codes wouldn't be the same. Cities, towns, and villages wouldn't be the same. Most of everything wouldn't be the same that way. Yes, most of everything would be different. There would be fewer tragedies, fewer criminals, only very few dark things on the Internet and outside of the Internet, no creepy phone numbers, and most dark and disturbing things wouldn't exist. Mostly, there would be a lot of good and positive things on the Internet and outside of the Internet. Laser tripmines would actually exist and would be designed and highly produced for military use. So yeah, that's my perspective and my thoughts for my afterlife plan. I would name the different reality "FU-200D," where it is part of the FU-200. The population of Furworld would be over 50 billion people. Furworld's population would reach 50 billion people in 1998, with the anthro canine and anthro feline populations rising since the late 20th century. The planet Furworld would be several times bigger than Earth as a human planet, and chances are that generational years and birth years would be different. In the Furuniverse alternate reality, there would be 11 planets in the Furstar System and two belts. Apparently, they would not be like the asteroid belt. Instead, there would be tiny paw stars in the two belts of the Furstar System, with the sounds of canines screaming and crying because the sound would be extremely noisy. The One Paw of God would exist, along with an infinite number of galaxies and an insane number of other things. So yeah, this is one of the longest online journals I've ever written in my entire life.

April 6, 2025

Boy... I always hate carrying these heavy things, and it absolutely sucks so badly to do it. It makes me feel so tired of this bullshit because it feels like I just don't want to do it. I never like helping my parents carry heavy things. Speaking of carrying heavy things such as whitewoods, concrete stuff, and other kinds of bullcrap... However, I'm so tired of it because Google wants me to recover some of my inactive accounts by making me wait 48 freaking hours. My YouTube channels and other accounts on other platforms are archived, and it's pretty frustrating to me. Like, why the hell do I have active some of my inactive accounts? I just can't deal with it. So yeah, it happens sometimes, and it frustrates me sometimes. This is why I'm caring about my main Google account, which I'm active on. In my opinion, I don't really care about recovering some of my inactive accounts to activate them again. They were archived by me, and fortunately, that's my opinion. Typically, speaking of recovering a Google account when it's inactive, accounts on other platforms are archived too. Late at night, I was planning to record a full gameplay video of two parts of the original Half-Life, and then record full gameplay videos of the expansion packs Opposing Force and Blue Shift. I wanted to schedule them to upload to YouTube manually at some point. I tried my best, but there's no way I want to record a full-part gameplay video because of my parents, the lack of time and resources, and how it feels so dipshit. However, at least I would have to skip breakfast, lunch, or dinner to make a long video to get as many views as possible. Unfortunately, I just can't deal with my parents wanting me to do something, and it feels so overwhelming to me. Dinner is overrated. School is overrated. Houses with a gun safe and guns inside are overrated. Earth is overrated. Being trapped inside the house is overrated. So yeah, I would imagine that I want to escape Earth in this entire universe because of my personal struggles. I would like to create an alternative world map covering the entire surface of Furoria, sometimes called Furworld, where the planet Furoria has 10 continents, 7 oceans, and at least 120 countries, or more than 120 countries, something like that. So yeah, it's not limited, it's not invalid, and it's not the end. Yes, it's endless, with grief, pain, unlimited possibilities, and validity in some sense. But in fact, it's not fictional; it's a different real-life form, and it's an alternate reality. Every color is the same. Apparently, it will take me a while to create planet Furoria, where four collective terms for furry species on Furoria exist.

April 14, 2025

In my opinion, I always want to make a lot of money on YouTube. It's because I have my Google AdSense account, and I can make money from it, so why not? Apparently, if you upload a video with a bad title and description and a bad video thumbnail and get low views as a small YouTuber, then it's not a job. And when you upload a video with a good title and description and a good video thumbnail and get many views as a fairly small YouTuber or a big YouTuber, then it can become a job to do. So yeah, it's a job to do, but in my opinion, I care mostly about YouTube. Being a small YouTuber isn't necessarily a job when your videos mostly get low amounts of views because of poorly made production, bad titles, descriptions, and thumbnails that result in low amounts of money. However, small YouTubers still try their best and work hard. So yeah, they'll try to get as many subscribers as possible. Apparently, YouTube can be a job to work at, and if you want to become a successful YouTuber, you have to work hard to make a video and then upload it to YouTube with a good title, description, and thumbnail to potentially go viral and get as many views as possible to make a lot of money. So yeah, that's true. There are many big YouTubers and small YouTubers out there. Some YouTube channels have well-known names, while others have lesser-known names, except when the YouTuber is well respected or disrespected. So yeah, at least you can make a video and say respectful things while being positive. In fact, when you make a video that includes a sponsorship, the sponsorship is featured in the YouTube video because it is being promoted. Honestly, I don't mean that I hate YouTube sponsorships. I'm okay with them. There are some sponsorships that are scams, so you better be careful with those. But in fact, that's true, and I always care mostly about YouTube. Unfortunately, being a small YouTuber isn't a goddamn job if you're looking for easy ways to work by making a video on a mobile phone or computer as a solo person and getting low amounts of views. Yes, it's not a freaking job to do. I know there are some mainstream YouTubers out there, and some YouTubers have achieved mainstream recognition, such as MrBeast, who is the biggest YouTuber in the universe, PewDiePie, who is the biggest gaming YouTuber, and some other mainstream YouTubers. So yeah, being a mainstream YouTuber means having to work extremely hard. Yes, literally, it takes so much time to become one of the most influential YouTubers, especially if you become featured in national and international news outlets. So yeah, that's all I had to say.

April 17, 2025

In my opinion, I'm neither religious nor agnostic because I don't identify myself as religious or agnostic. In fact, I don't believe in heaven, hell, God, or nothingness. I never thought I wanted to talk too much about religion. Back then, I used to identify myself as agnostic or unknown for a while, although I don't remember exactly. About one year ago, I really started believing in furries. It's more than just a fandom beyond that point, starting around early 2024 before my 19th birthday. So yeah, it's been a while. In fact, I believe in furries in real life because I'm obsessed with furries. It's not just a fandom to me; it's real, it's an existence, and it's an alternate reality for exploring these ideas and stories. It's about living in a better world than Earth in the observable universe, where Earth has a lot of awful things going on and where there's a lot of bad things on the Internet in this entire universe. It can be dangerous in some ways, like I'm not even joking. Every once in a while, I imagine myself as an anthropomorphic husky girl who would be born into a multimillionaire family with a net worth of over $40M, having a new family and new parents in their early 20s. Both of them would be famous, with the father being a filmmaker and the mother being an author. Honestly, I believe that two-step reincarnation is real, and that's why I'm always 60 minutes ahead while planning to be reincarnated as a furry husky man. Everything wouldn't be the same that way. Everything would be different. It would be a different reality. I've developed my own afterlife theory. It's not based on religion; it's custom-built. I've created 11 planets in the Furstar System, tiny paw stars in the Furstar System, the One Paw of God, and collections of galaxies. There would be infinite amounts of galaxies, nebulas, superclusters, Paws of God with galaxies inside them, and other space objects. There would be no black holes, and supernovas would turn into giant foxes, wolves, and dogs of God. These supernovas would turn into giant canine nebulae of God that exist in space. It's part of the Furuniverse, and imagination can deeply influence the minds of animals. There could be ideas about influencing or even brainwashing the minds, and there would be better living conditions than on Earth. Everyone would be an anthropomorphic animal with human-like bodies, plantigrade legs, and plantigrade feet shaped like human feet on the hyper-Earth planet Furoria. Furoria has been developed by me in some of these page documents based on the Furry Selection Basement Journals. It's written and created by me. But in fact, I'm not the only one who would join. Other people could join it for real if they are furries or non-furries. So yeah, maybe at least hundreds, thousands, hundreds of thousands, millions, or multi-millions of people could join it for real if they're interested. So yeah, it's just a real prediction about Singular Theory Separation, and it's only a single dimension. People would choose which one they want to join for real.

April 29, 2025

Last night, I had a dream where I met MrBeast, the biggest YouTuber on Earth, in real life, along with some MrBeast fans I had seen as well. It was a shocking and crazy dream, and I just can't believe that happened. So yeah, sometimes I have dreams about school, sometimes I have nightmares, and everyone has crazy dreams sometimes. Everyone has nightmares sometimes too. It depends. We all know that sometimes people dream about meeting celebrities, and it can be a crazy dream. In fact, sometimes I have crazy dreams where I meet celebrities too. I had a crazy dream about meeting Donald Trump in real life a few months ago, sometime in late 2024, maybe around July, August, September, or October 2024. I can't remember exactly. So yeah, it was a crazy dream I had a few months back in 2024. At that time, my mental health had declined due to mental illness, so I had too many fears, anxiety, worries, and moments of panic before I eventually made them go away. So yeah, that's in the past from a few months ago, and we all know everyone has good dreams and everyone has bad dreams. Speaking of sleeping dreams, my mental health, and my memories... I'm almost done writing about *The Three Habitable Planets in the Furstar System in the Furuniverse: The Alternative Real-Life Form From Different Reality Encyclopedia*. It took so long to write about my beliefs regarding living in a different reality afterlife and what it would look like, and it's pretty harsh, though. So yeah, because time is going quickly, it feels so disgusting how fast time goes, and sometimes it makes me feel disgusted about time. As I said, it's hard to write the encyclopedia document about *The Three Habitable Planets in the Furstar System in the Furuniverse*. It's a topic about a different reality, and the hyper-Earth planet has fewer tragedies, while the Internet is the safest thing in the Furuniverse. Unfortunately, in our reality, there's a lot of bad stuff on the Internet and a lot of messed-up shit in this world. Those things have hurt so many people and pets, and so many lives have been lost or almost lost. But that doesn't mean the world is bad, broken, hopeless, or that nothing good exists. The list goes on, actually. So yeah, there are a lot of good things as well. Chances are, I'm not going to talk about this reality. I'm talking about a different reality, and it's based on the encyclopedia document page. At least I have to get it done as soon as possible. So yeah, in my opinion, I recently don't know what else to say publicly, and that's pretty much it for what I have to say.

May 3, 2025

Two years ago, back in April 2023, I uploaded the MTL Sherman Fire Truck mod to ModLand after modifying it, and it got over 40,000 downloads, which is pretty awesome.

So yeah, I haven't updated any version of my most-downloaded mod because of a lack of inspiration. I shifted into modifying mods for American Truck Simulator, mostly.

It's been going pretty well recently, and I've been doing a lot of hard work. At least I've been trying my best to modify it the right way, to be honest.

In fact, I've been quite well-known for a while. Since 2022, I've become somewhat well-known, mostly through my username FurryManforme1976.

I was somewhat anonymous for a while.

Back then, I used to have a black Labrador avatar picture. I made that custom avatar using the Avatar Maker: Dogs app.

I also made a letter F avatar picture with a blue background in late 2023, as well as a paw-print avatar picture with a blue background in late March 2024.

In general, I strongly dislike being an anonymous person, and it disgusts me a bit.

There are so many modders who stay anonymous because they don't want to reveal their faces and identities, and that's because of privacy.

In my opinion, I will stop being active on ModLand, ModsFire, and ShareMods because being a modder isn't a job to do if you're making low amounts of money on ModsFire, ShareMods, and other non-direct-monetization mod-hosting websites by uploading a single mod file.

But uploading a vehicle pack with many mod files can mean making more money than a single mod file, and sometimes it can become a job, to be honest.

Like I said, being a modder isn't necessarily a job, except that I have decided I want to shift into YouTube and social media to get as many followers as possible if I have the chance.

Apparently, someday in the future, it will be my last year as a modder, so I will likely stop modifying mods.

So yeah, someone else will modify my mods. They were modified by me, and I didn't forget to give credit to other users when it was due.

When I create mods based on or modified from the work of other users or other people, if I forget to give credit to those people, it could cause serious allegations of plagiarism, backlash, and misrepresentation.

It would be a failure and a huge mistake because it might hurt a lot of people.

But not all of them are mine, though.

So, I re-uploaded the mod and published it online, and I didn't forget to give credit to other users.

I also published vehicle packs online where I took the files and published them online.

Apparently, they aren't all my own stuff, but in my opinion, I don't know exactly who created some of it.

May 6, 2025

Yesterday, when I was at school during Cinco de Mayo Day, *The Extinction Trials* final quiz work was one of the most difficult quizzes I had ever taken.

It made me so stressed, frustrated, and angry. That kind of quiz work wasn't easy at all. It was too difficult for me.

It was after I finished reading *The Extinction Trials* book about four days earlier, and I just couldn't remember where I had read it.

I had trouble remembering the reading for *The Extinction Trials* because I just didn't remember it very well, and it kind of sucks.

But I know I have bad memories about some things, such as reading and some other things I don't remember.

So yeah, unfortunately, it was a goddamn pain in the butt.

But at least I tried my best to redo all of the quizzes, and I got some of them right and finished the most difficult quizzes.

So I'm good.

But it still sucks so badly.

Like, why was that final quiz work so hard to do?!

Man... this was unfair!

SO UNFAIR!!!

May 9, 2025

According to the news, India and Pakistan started carrying out drone strikes, missile strikes, and air strikes in Jammu and Kashmir after India and Pakistan entered a standoff.

It was described as an “act of war” after the massacre in Baisaran Valley near Pahalgam, Anantnag District, Indian-administered Jammu and Kashmir.

India and Pakistan both have nuclear weapons, and both countries have possessed nuclear weapons for a while.

If India and Pakistan were to start a nuclear war, it would be catastrophic on a global scale and would be so much worse because more than a hundred million people could die, and it would be hugely sad.

Unfortunately, there is still an ongoing political and territorial dispute over Jammu and Kashmir. Pakistan and China administer parts of Kashmir, and the dispute has continued for many years after India and Pakistan gained independence after World War II ended.

Speaking about it according to the news about the conflict...

I heard yesterday that Robert Francis Prevost, known as Pope Leo XIV, was elected as the 267th Pope of the Roman Catholic Church.

He was the first American man to become Pope of the Roman Catholic Church, and it was reported in the international news after Pope Francis died following a stroke and heart failure.

So yeah, that was about two weeks ago, after the 30th anniversary of the Oklahoma City bombing on April 19.

Yes, it had been 30 years because that was a national tragedy, and it had a global impact in terms of awareness and discussion.

According to international news coverage, Pope Leo XIV is now the latest Pope of the Roman Catholic Church in Vatican City.

But in fact, he's not just a U.S. citizen; he is also a Peruvian citizen, so Leo XIV is a dual citizen.

So yeah, he is a legendary leader, and it was the greatest event I've noticed, but it was extremely significant and relevant.

May 16, 2025

Man... time goes so fast nowadays, and sometimes I'm so exhausted, whether I'm at school or at home.

Apparently, at least I tried not to get too tired, stressed, or exhausted.

I can't trust school.

I can't trust people who have guns at home for home defense.

I can't even trust living my own life while being lonely when I have to work hard by myself.

I can't even trust those students hanging out in the bathroom during school days.

I can't even trust these difficult schoolworks.

I can't even trust being trapped inside the house.

And I just can't trust guys either, because many guys have weird facial hair, axillary hair, and body hair.

It disgusts me a lot, but it's unclear and based on misunderstanding.

Whenever the fuck I feel, it feels unprecedented and unexpected.

In my opinion, I'm going to live in a much better place, and that place is the Furuniverse reality for two-step reincarnation.

I wrote about it in my journals and created concept art showing what living in a different reality could look like.

I have always strongly disliked being poor. I would be unhappy if I had no money or friends.

I know I'll be happy living in a different reality and living happily ever after in the Furuniverse after being reincarnated as a furry husky man before I would be reborn as a furry husky girl, born into a rich, multimillionaire, famous family.

Time would go normally and in a balanced way while living every day.

I know most people on this planet aren't famous, rich, or popular, and that's true.

I know it seems like time is passing too quickly for me, and it makes me feel like I'm unmemorable.

It feels like such a worthless piece of crap to live in, so this means that I think the world has many serious problems.

As I said, I'm going to the Furuniverse reality one day after I die.

It's a much better place, based on what I wrote in my journals and created in my concept art for my story and ideas.

I imagine joining it for real, and I hope you will join it for real too.

So you should believe in the Furuniverse reality for real.

May 25, 2025

Unfortunately, sometimes my mother says the same thing. She repeats what I said and says these messed-up things to me, and I don't like it that way. It's pretty disgusting and disrespectful. I know it isn't okay. I know a lot of times people in this world are negative when they say these messed-up things, and it's a disgusting act to say things in a negative way. But a lot of times, people in this world are positive as well.

Chances are, everyone's different.

We are all different.

Not everyone is the same.

Not everyone is similar.

Not everyone is familiar.

Not everyone is unfamiliar.

And that's okay. Today, I had Lunchables nachos with cheese dip and salsa, along with a Capri Sun drink and a Kit Kat bar for a late snack after 4:00 PM before dinner. I was so pissed off at my mother, and I didn't like that kind of response from her. She said the same goddamn thing about what I had said and made these messed-up comments about eating unhealthy food every day. I didn't like it that way. It was kind of rude, disrespectful, and disgusting because I'd had enough. I was so sick and tired of my mother saying these messed-up things, and it made me go off for no reason.

May 31, 2025

11 days ago, I graduated from high school, and it was pretty awesome. I was a bit nervous about it because it was a semi-private and semi-public ceremony. It was located at Lloyd Noble Center in Norman, Oklahoma, near the University of Oklahoma. The basketball court at Lloyd Noble Center is so huge, and the ceilings are so high that it looked like an arena to me. So yeah, Aiden told me that he was going to be a filmmaker, and Slade told me that Lauren wasn't going to graduate this year because she didn't have enough credits to graduate due to too many absences. So yeah, she was going to graduate the following year with Andy in 2026, according to what Slade told me. So yeah, it was about 12 days ago. The graduation ceremony was rescheduled for May 20 because of the bad weather on the evening of May 19. It was canceled that evening because of the weather. I know sometimes graduation ceremonies get canceled because of bad weather, especially when they're rescheduled for the next day. And that's all I had to say for now.

The Three Habitable Planets in the Furstar System and the Furuniverse: The Alternative Real-Life Form from a Different Reality Encyclopedia (with Extra Encyclopedia)

by Stephen Flint AKA Rinty SkyCoyote (Last updated: 9 September 2026)

THE FURUNIVERSE REALITY — THE FURSTAR SYSTEM, ITS HABITABLE WORLDS, AND THE WIDER FURRY UNIVERSE

In the Furuniverse reality, the Furstar System is a planetary system containing 11 known planets in total. The system consists of five terrestrial planets, five Jovian planets, and one dwarf planet. Three of the terrestrial planets are known to support life: Huskarra, the 3rd planet; Furoria, the 4th planet; and Velirum, the 5th planet. These three worlds are sometimes collectively described as the triple terrestrial habitable worlds of the Furstar System.

Although Huskarra, Furoria, and Velirum are all terrestrial planets that support life, they are very different from one another. Each planet has its own environments, species, languages, cultures, civilizations, geography, technology, history, and population. They are not copies of one another, and none of them is intended to be an alternate version of Earth.

The Furuniverse itself contains far more than the Furstar System. There are dozens upon dozens of known habitable furry planets, and at least 20,000 have been confirmed throughout the wider Furuniverse. Many of these planets are located dozens or even a few light-years apart, while others are much farther away. There may be an effectively infinite number of habitable planets, uninhabitable planets, stars, moons, dimensions, and other worlds, making it extremely difficult to confirm or document every single one.

THE FURSTAR SYSTEM

The Furstar System contains:

- 5 terrestrial planets
- 5 Jovian planets
- 1 dwarf planet
- 3 known life-supporting terrestrial planets
- Numerous moons and other celestial bodies

The three inhabited terrestrial planets are:

- Huskarra — 3rd planet and first habitable planet
- Furoria — 4th planet and second habitable planet
- Velirum — 5th planet and third habitable planet

The three worlds are sometimes considered major homeworlds within the Furstar System because each supports enormous populations of anthropomorphic and furry beings.

HUSKARRA — THE COLD FIRST HABITABLE WORLD

Huskarra is the 3rd planet of the Furstar System and the first known habitable planet in the system. It is a cold terrestrial planet approximately 4.9 times larger than Earth.

Huskarra is dominated by cold climates, snow, ice, frozen landscapes, mountains, icy rivers, frost-covered terrain, and other cold-weather environments. Despite its cold conditions, Huskarra is highly developed and extremely comfortable for its inhabitants because its native species have evolved with warm fur and bodies adapted to the planet's environment.

The population of Huskarra exceeds 77 billion inhabitants. Its population has been growing extremely rapidly, making it one of the most heavily populated worlds in the Furuniverse.

The largest population on Huskarra consists of anthro Huskies. Other major populations include:

1. Anthro Huskies

2. Anthro white foxes or arctic-like foxes

3. Anthro white kitsunes

4. Anthro white wolves or arctic-like wolves

5. Anthro dire wolves

6. Other snow-dwelling canine species, including various snow dogs
Huskarra is also home to many other snow animals and cold-adapted furry species. Its wildlife and ecosystems are different from Earth's wildlife and ecosystems.
Huskarra's civilization combines modern technology with highly futuristic technology. Some cities look relatively modern, while others look as though they belong in a science-fiction setting. The planet has futuristic buildings, modern buildings, advanced transportation systems, snow vehicles, electric transportation, advanced infrastructure, and other technologies designed specifically for its cold environment.
The planet is considered highly advanced, peaceful, and prosperous. Civilian weapons are not part of ordinary life on Huskarra, and dangerous weapons are prohibited from civilian use. Toy guns, water guns, and other harmless recreational items can still exist because they are not functional weapons.
Huskarra's anthro inhabitants generally have warm fur covering their bodies. They have human-like upright bodies, plantigrade legs and feet, and feet shaped similarly to human feet. Their heads and facial structures remain animal-based rather than becoming completely human-shaped.
Most anthropomorphic animals on Huskarra have hair on their heads, although this is not universal. Some have long hair, some have short hair, and some have no head hair at all.
Huskarra has two recognized genders in this setting: male and female.
A major biological feature of Huskarra is its body-shield system. The bodies of its inhabitants are highly resistant to physical damage and conventional weapons. As a result, ordinary weapons cannot easily injure them. Huskarra's inhabitants generally do not experience ordinary physical pain or fear in the same way that humans do.
Werewolves living on Huskarra also possess this body-shield characteristic. They are similarly resistant to injury and generally do not experience fear or physical pain.
This does not mean that Huskarra's inhabitants cannot become tired, exhausted, sick, or otherwise experience ordinary biological conditions. Rather, their bodies are fundamentally different from human bodies and have developed unusual protective characteristics.
Huskarra has no major climate-change crisis. Its climate remains stable, and the planet's civilization has developed without the environmental catastrophe scenarios associated with many fictional dystopian worlds.

HUSKARRAN GEOGRAPHY

Huskarra contains:
• Snow-covered regions
• Frozen plains
• Mountains
• Icy rivers
• Lakes
• Frost-covered forests
• Frozen valleys
• Cold grasslands
• Glaciers
• Large urban areas
• Rural settlements
• Futuristic cities
• Modern cities
• Snow transportation networks
• The Two Paws of Frost Land
The Two Paws of Frost Land is a major frozen region located near the middle of Huskarra. It is one of the planet's most recognizable geographical features.

HUSKARRA'S INTERIOR

The interior of Huskarra is unusual because the planet's internal structure is adapted to its cold terrestrial environment.

Its interior contains:
• A thick crust
• A solid mantle
• A liquid outer core
• A cold solid inner core
The interior of Huskarra is predominantly associated with blue, light-blue, and white colors. Some internal regions glow, giving the planet an unusual appearance when viewed through advanced geological imaging technology.

HUSKARRAN LANGUAGES

The primary native languages of Huskarra are:
• Huskarran
• Varnuk
Huskarran and Varnuk use the Fur'maya writing system. Fur'maya script can appear unfamiliar to outsiders because its shapes may resemble an alien writing system or a script with some Cyrillic-inspired visual characteristics.
Despite having similar-looking names in some contexts, Huskarran and Varnuk are separate languages. Similar words can have completely different pronunciations, and languages that look related on paper may sound very different when spoken.

FURORIA — THE HYPER-EARTH HOMEWORLD

Furoria is the 4th planet of the Furstar System and the second habitable planet. It is one of the central worlds of the Furuniverse.
Furoria is a hyper-Earth terrestrial planet approximately five times larger than Earth. It is also approximately 2.08 times the size of Kepler-22b according to the fictional planetary measurements used in the Furuniverse.
Furoria is an Earth-like world in the sense that it contains familiar broad geographical features such as continents, oceans, mountains, plains, valleys, hills, plateaus, rivers, lakes, deltas, forests, and other terrestrial environments. However, Furoria is not Earth, and its geography, history, species, cultures, nations, languages, technology, wildlife, and civilization developed independently.
Furoria has 10 continents and 7 major oceans.

THE 10 CONTINENTS OF FURORIA

Listed from largest to smallest:

1. Xianyora

2. Zulekore

3. North Auratheria

4. South Auratheria

5. Glacithra

6. Nordicavire

7. Darrakoon

8. Pawveria

9. Clawsha

10. Halimah

THE 7 OCEANS OF FURORIA

Northern Oceans:
• Slytherian Ocean
• Elyvian Ocean
Middle Oceans:

• Veykara Ocean
• Numirian Ocean
• Orinave Ocean
Southern Oceans:
• Duskarin Ocean
• Glacithric Ocean

FURORIA'S COUNTRIES

Furoria contains 22 countries.
Of these:
• 7 are federal countries
• 15 are unitary countries
The countries of Furoria have different governmental systems, cultures, infrastructure, languages, transportation systems, and regional identities.
Traffic systems also vary.
• 10 countries use left-hand traffic
• 12 countries use right-hand traffic
Furoria does not follow Earth's political map. Its nations developed independently and have their own fictional histories.

FURORIA'S PEACEFUL HISTORY

Furoria's history is fundamentally different from Earth's history.
There are no world wars comparable to Earth's major wars, no widespread pandemic outbreaks, and very few serious conflicts. Large-scale historical tragedies are extremely rare or absent.
Furoria also does not experience the same kinds of major natural disasters commonly associated with Earth. In particular, the setting does not include major recurring:
• Earthquakes
• Volcanic eruptions
• Tornado outbreaks
• Massive natural-disaster events
• Global climate-change crises
Furoria is intended to be an extremely peaceful and prosperous hyper-Earth civilization.
This does not mean that absolutely nothing ever goes wrong. Minor conflicts, disagreements, accidents, personal problems, or other everyday difficulties can still exist. However, Furoria does not develop the enormous cycles of destruction and tragedy that characterize many fictional dystopian settings.
Furoria is therefore commonly described as a utopian or near-utopian planet.
FURORIA'S POPULATION
Furoria has a population of more than 100 billion inhabitants during the 21st century.
Its population grew much faster than Earth's population in the fictional timeline. Furoria's population is projected to have exceeded 50 billion inhabitants as early as 1998.
The major population groups include:

1. Peditrans/Therians

2. Altertherians

3. Berdorons

4. Primatarins
Different species are represented within these broader groups.
Furoria's population also includes many anthropomorphic canines, felines, hyenas, and other furry beings.

FURORIA'S SOCIAL AND ECONOMIC STRUCTURE

The fictional socioeconomic distribution of Furoria is approximately:
• 50% wealthy or rich
• 49.5% middle class

• 0.5% living in poverty
Most of the middle class is upper-middle-class or close to becoming wealthy.
Furoria also has a large population of famous individuals:
• Approximately 50.5% are famous
• Approximately 49.5% are not famous
• Only a very small number are infamous
These figures are fictional demographic characteristics of Furoria rather than claims about real-world society.

HANDEDNESS IN FURORIA

Approximately:
• 30% are left-handed
• 60% are right-handed
• 10% are ambidextrous
Different species have different tendencies.
Many Peditrans/Therians and Altertherians are right-handed, although some are left-handed.
Primatarins and Berdorons have comparatively larger ambidextrous populations. Many Berdorons are left-handed, although many are also right-handed.
Anthro lemurs are generally right-handed within the fictional population.

FURORIA'S SPECIES AND BODY STRUCTURE

Anthropomorphic beings in Furoria have animal-based heads, faces, ears, muzzles, tails, fur, and other species-specific traits. They are not simply humans wearing animal features.
At the same time, their bodies are adapted for upright living.
Most anthros have:
• Plantigrade legs
• Human-like feet
• Upright posture
• Balanced torsos
• Balanced body proportions
• Animal-based heads
• Species-specific fur or skin
• Species-specific facial structures
Anthros can be taller or shorter depending on species and individual genetics.
Anthro canines, felines, hyenas, Peditrans/Therians, Altertherians, and many Berdorons are generally tall.
Primatarins are generally semi-tall, although some species, particularly anthro lemurs, can be quite tall.
Some female anthros can have naturally slender bodies because of extremely fast metabolisms. In this setting, it can take a long time for certain species to gain significant excess weight.
Some Berdorons, Primatarins, Altertherians, anthro pigs, and anthro hogs can be overweight, particularly because some individuals consume large amounts of junk food.

HAIR, FUR, AND APPEARANCE

Furoria has enormous variation in fur and hair.
Not everyone has:
• Long hair
• Short hair
• Head hair
• Long fur
• Short fur
Individual appearance varies by species, genetics, culture, and personal preference.
Some anthros can have hairstyles that resemble human hairstyles, while others retain a more natural animal-like appearance.

FURORIA'S BIOLOGY AND PAIN RESPONSE

Not every Furorian experiences physical pain in the same way.
Many Peditrans/Therians and Altertherians have unusual genetics that make them highly resistant to physical suffering. They generally do not experience ordinary physical pain, although they can still become sick, tired, or exhausted.

Some individuals may still experience fear, especially fears associated with:
• Heights
• Death
• Being alone
• Tall or extremely open spaces
These fears are relatively uncommon.
Primatarins and Berdorons have different biological characteristics. They can experience pain and fear more normally than many Peditrans/Therians and Altertherians, although their bodies are still unusually resistant to severe suffering.
Death can still be a serious biological event in the Furuniverse, even in peaceful societies.

FURORIA'S GENDERS

Furoria recognises two genders within this setting:
• Male
• Female
If an LGBTQ-equivalent community exists within the broader Furuniverse setting, it develops much later than comparable communities in modern Earth history, becoming more prominent during the late 2000s. Its development is part of the fictional social and cultural history of the Furuniverse and does not follow Earth's historical timeline exactly.

FURORIA'S LANGUAGE

The primary language of Furoria is Furorian.
There are also a small number of other native languages and regional languages.
Earth languages such as Arabic, Chinese/Mandarin, English, Finnish, French, German, Hindi, Italian, Korean, Japanese, Polish, Portuguese, Russian, Spanish, Swedish, and others do not exist as native languages of Furoria.
This is because Furoria is not an alternate version of Earth. Its languages evolved independently.

FURORIA'S TECHNOLOGY AND CITIES

Furoria contains many different kinds of settlements.
These include:
• Huge metropolitan cities
• Cities with enormous skylines
• Medium-sized cities
• Small cities
• Towns
• Village towns
• Rural communities
• Industrial areas
• Research facilities
• Underground complexes
Technology varies considerably by region.
Some areas are highly futuristic, while others are modern or relatively ordinary. Furoria does not have one universal technological standard.
Its brands, vehicles, architecture, consumer products, electronics, wildlife, foods, beverages, and infrastructure are all fictional and different from Earth's.
Furoria has many familiar categories of food and beverages, including fruits, vegetables, prepared meals, snacks, and drinks, but the brands and fictional products are different.

FURORIA'S WEAPONS POLICY

Civilian possession of functional firearms and other weapons is heavily restricted throughout Furoria.
Civilian use of:
• Handguns
• Long guns
• Other functional weapons
is prohibited under the fictional weapons policies of Furoria's governments.
Harmless toy guns and water guns can still exist for recreational use.
Furoria has very little violent crime compared with Earth. High-profile criminals are extremely uncommon, and most

crimes do not become major historical events.
There are only a very small number of notorious criminals in the entire United Federal States of Auratheria and the wider Furworld.
There are consequently very few jails and prisons compared with the enormous prison systems found in some real-world countries.
Some fictional criminals can still become famous or infamous through their actions, including individuals from species such as anthro ducks, monkeys, chimpanzees, gorillas, pigs, hogs, goats, and other species.
However, they represent extremely unusual cases rather than the normal condition of Furorian society.

VELIRUM — THE SECOND HYPER-EARTH HABITABLE WORLD

Velirum is the 5th planet of the Furstar System. It is the third known habitable planet and the second major hyper-Earth planet of the system.
Velirum is approximately 4.5 times larger than Earth.
The planet has a population exceeding 85 billion inhabitants.
Velirum has one of the most diverse populations in the Furuniverse, containing many different anthropomorphic species and specialised biological groups.

MAJOR SPECIES OF VELIRUM

Velirum includes:
• Anthro lizards
• Anthro snakes
• Anthro Komodo dragons
• Anthro sharks
• Anthro seals
• Anthro bats
• Anthro kangaroos
• Anthro wolf/deer hybrids
• Other furry hybrids
• Anthro hyenas
• Anthro coyotes
• Anthro dogs
• Anthro foxes
• Anthro jackals
• Anthro wild dogs
• Anthro kitsunes
• Anthro wolves
• Anthro dragons
• Anthro dingoes
• Anthro dolphins
• Anthro sea lions
• Anthro orcas
• Anthro deer
• Anthro reindeer
• Anthro elks
• Anthro caribous
• Anthro lemurs
• Anthro alligators
• Anthro crocodiles
• Anthro cats
• Anthro big cats
• Mermaids
• Other furry species and hybrids
Many anthro dogs resemble fictionalised versions of breeds such as Labradors, German Shepherds, Border Collies, Australian Shepherds, Dobermans, Huskies, Belgian Malinois, and other dog types.
These are not exact copies of real-world breeds. They are fictional species and breed-like populations within the Furuniverse.

VELIRUM'S SPECIES GROUPS

Velirum's species can be grouped into several broad categories.
Marinians include:
• Anthro sharks
• Anthro seals
• Anthro sea lions
• Anthro dolphins
• Anthro orcas
Reptilians include:
• Anthro lizards
• Anthro snakes
• Anthro Komodo dragons
• Anthro alligators
• Anthro crocodiles
Peditrans/Therians include many:
• Anthro canines
• Anthro big cats
• Anthro kangaroos
• Anthro deer
• Anthro bats
• Other mammalian furry species
Altertherians include certain species such as:
• Anthro elks
• Anthro reindeer
• Anthro caribous
The largest population group on Velirum is Peditrans/Therians.
The second largest group is Reptilians.
The third largest group is dragons.
The fourth largest group is Marinians.

VELIRUM'S ANTHRO SHARKS AND ORCAS

Velirum's anthro sharks and orcas are substantially different from real-world sharks and orcas.
Many possess two external ears and may have wolf-like, dog-like, or cat-like ears.
Their heads are more stylised and canine-like than realistic marine-animal anatomy.
Anthro sharks can have heads approximately 1:6.8 to 1:7.8 of their total body height.
Anthro orcas can have heads approximately 1:6.5 to 1:8 of their total body height.
Many have hair as well.
These proportions exist because Velirum's marine anthros have evolved towards a more furry, upright, anthropomorphic body plan.

VELIRUM'S CANINE AND FURRY SPECIES

Many Velirum canines have shortened, stylised muzzles that are semi-canine rather than identical to real-world animal anatomy.
Their heads can be approximately 1:6.9 to 1:8 of their total body height.
Many have hair, upright bodies, plantigrade feet, and human-like body proportions while retaining recognisable animal characteristics.

VELIRUM'S CIVILIZATION

Velirum is a highly advanced civilisation.
Its cities can contain:
• Futuristic skyscrapers
• Advanced transportation
• Autonomous vehicles
• Futuristic infrastructure
• Advanced energy systems
• Highly developed communications

• Advanced robotics
• Modern residential areas
• Futuristic public facilities
Velirum is peaceful and prosperous.
There are no major military bases on the planet.
Functional weapons are extremely rare and generally limited to security personnel when required.
Toy guns and water guns can still be used for recreation.
Velirum has no major climate-change crisis and does not experience the same environmental problems as Earth.
Its inhabitants generally do not experience fear or physical pain in the ordinary human sense because of their highly unusual biology.

VELIRUM'S INTERIOR

Velirum has:
• A thick crust
• A solid mantle
• A liquid outer core
• A hot solid inner core
Unlike Huskarra, Velirum has a hot planetary interior.

VELIRUM'S LANGUAGES

The primary languages of Velirum include:
• Auranth
• Canith Varnuk
• Velirumite
• Zenthari
Similar-looking language names do not necessarily indicate that the languages are related. Their pronunciation can be substantially different.

THE UNITED FEDERAL STATES OF AURATHERIA

The United Federal States of Auratheria, often abbreviated as U.F.S. or UFSOA, is a federal republic located in North Auratheria on Furoria.
The U.F.S. consists of 100 states.
It is one of Furoria's major federal countries.
The country contains large cities, medium-sized cities, small towns, rural communities, transportation networks, industrial areas, research centres, and major government facilities.
One of the most famous fictional facilities in the U.F.S. is HIVAC Fort Combine.

HIVAC FORT COMBINE

HIVAC Fort Combine is a massive underground laboratory, military research facility, and security complex located in Fort Combine, New Somborerio, within the United Federal States of Auratheria.
The complex shares an international border region with the Somborerian states.
HIVAC stands for Hazardous Infectious Veteran Armed Corps.
The organisation is primarily affiliated with the Ducklandia Army and loosely affiliated with the Ducklandia Marine Corps. It is not an obvious part of the Ducklandia Navy.
HIVAC Fort Combine is famous throughout Furoria because of its enormous underground infrastructure and advanced science-fiction-like appearance.
It is inspired in concept by the idea of fictional underground research facilities such as Black Mesa, but it is not an exact copy of Black Mesa or any other real or fictional facility.
The complex has its own identity, history, architecture, transportation system, personnel structure, technologies, security systems, laboratories, dormitories, and military infrastructure.

FORT COMBINE PERSONNEL

Fort Combine personnel are divided into several major groups:
• HIVAC military personnel
• HIVAC military security personnel
• Invention personnel
• Science personnel
• Security personnel

The facility also has dedicated:
• Science teams
• Invention teams
• High-security teams
• Training teams
• Transportation personnel
• Administrative personnel

FORT COMBINE SECURITY

High-security guards commonly wear:
• Blue shirts
• Black ties
• Dark-blue pants
• Black military boots
• Equipment belts
• Armor vests
• Safety helmets when required
• Safety glasses
• Identification badges
Some guards may use helmets resembling police-style motorcycle helmets, while others may operate without helmets depending on their assignment.
HIVAC security personnel and soldiers can also wear:
• Urban camouflage uniforms
• Black military boots
• Berets
• Patrol caps
• Boonie hats
• Protective helmets
• Powered Combat Vests (PCV)
• Powered Combat Body Armor (PCBA)
• HEV body armour
• Hazardous EnVironment body armour
HEV body armour can contain a built-in voice announcement system.

FORT COMBINE SECURITY VEHICLES

The facility uses numerous specialised security vehicles.
These include:
• Security cars
• Security SUVs
• Security pickup trucks
• Security armoured trucks
• Security vans
• Military trucks
• Military buses
• Other specialised underground vehicles
Some vehicles are visually inspired by general categories resembling older police interceptors, SUVs, and utility vehicles, but they are not exact copies of real-world models.
Some vehicles resemble fictionalised versions of:
• Ford Crown Victoria-style sedans
• First-generation Nissan Pathfinder-style SUVs
• Jeep Cherokee-style SUVs
These are fictional equivalents rather than exact copies.
Many HIVAC vehicles are right-hand drive because they are manufactured in Ducklandia.
Security vehicles generally have red-and-blue emergency lights and sirens.

FORT COMBINE AUTONOMOUS TRANSPORTATION

One of Fort Combine's most advanced features is its autonomous underground transportation network.
The complex contains autonomous people movers equipped with male-voice announcement systems.
These systems transport personnel through:
• Underground corridors
• Research sectors
• Laboratories
• Freight yards
• Train yards
• Elevator systems
• Administrative areas
• Military sectors
The complex also uses autonomous electric trolleybuses equipped with male-voice announcement systems.
The transportation system is designed to move personnel and equipment without requiring conventional human drivers.

FORT COMBINE MILITARY VEHICLES

The military sections of Fort Combine can contain:
• Armoured personnel carriers
• Military buses
• Military helicopters
• Military aircraft
• Tanks
• Military trucks
• Armoured utility vehicles
• Other fictional military equipment
Many military trucks are right-hand drive because they are manufactured in Ducklandia.

FORT COMBINE DORMITORIES

Fort Combine contains large residential areas for personnel.
These include:
• Apartment-like rooms
• One-story house-like rooms
• Dormitory rooms
• Private bathrooms
• Shared facilities
• Cafeterias
• Storage areas
• Administration rooms
• Bedrooms
• Training areas
Some residential areas resemble hotels, apartments, retirement homes, or ordinary houses.
Some rooms contain private bathrooms with:
• Showers
• Bathtubs
• Toilets
• Floor drains
• Urinals in some facilities
Bathrooms generally have tiled floors.
Rooms can contain:
• Floor HVAC registers
• Ceiling HVAC registers
• Large air vents
• Wall HVAC registers
• Drop ceilings
• LED recessed lights
• Dimmable switches

• Fan controls
• Motion-sensor lighting
• Ethernet wall outlets
• Coaxial wall plates
• Electrical outlets
• Carpeting
• House-style doors
Some rooms have one or two bathrooms depending on the residential configuration.

FORT COMBINE ROOM INTERIORS

Some rooms have:
• Triple-head ceiling fans
• Double-head ceiling fans
• Standard ceiling fans
Fans may have three, four, or five blades.
Some rooms have small kitchens with tiled floors.
Bathrooms have exhaust fans.
Some bedrooms contain unusual personal collections belonging to security guards or scientists.
These collections can include:
• Model railroads
• HO-scale trains
• O-scale trains
• G-scale trains
• Building Briks
• Tech'onic building sets
• PC components
• Computer parts
• Monitors
• CRT televisions
• VCR players
• Video-disc players
• Clothing collections
• Die-cast vehicles
• Model kits
• Paint supplies
• Airbrush equipment
• Model-building tools
• Scale models

MODEL COLLECTIONS

Some personnel collect scale models of large trucks.
These may include fictionalised versions of:
• Semi-trucks
• Dump trucks
• Box trucks
• Armoured trucks
• Race trucks
• Drag trucks
• Transporter trucks
• Custom racing transporters
• Fire trucks
• Garbage trucks
• Car carriers
• Other heavy vehicles
Some fictional truck designs may resemble general styling associated with Peterbilt, DAF, Kenworth, Freightliner, Western Star, International, Mack, MAN, Renault, Scania, Mercedes-Benz, Volvo, or other manufacturers.

However, these are not exact copies.
Many models are generic fictional designs.
Some use headlight designs inspired by broad visual concepts such as International 4000/8000-series styling, International 9400-style headlights, Volvo VMM-style lighting, Blue Bird Vision-style headlights, or Nissan Skyline R32-style headlight shapes.
The models can be produced in 1:24 or 1:25 scale.
Other collections include:
• Military vehicle models
• Aircraft models
• Fictional mecha models
• Car models
• Pickup-truck models
• RV models
• Trailer models
• Road-train models
• Semi-trailer models
Some completed models have weathering or dust effects.
Some are displayed inside glass display cases.
Others remain inside their original boxes.
Collections can be found in bedrooms, living rooms, kitchens, bathrooms, closets, storage rooms, and other customised spaces.

BUILDING SETS AND PERSONAL COLLECTIONS

Building Briks is a fictional LEGO-compatible building-set concept.
Tech'onic is a fictional K'nex-compatible building-set concept.
Personnel can use these sets to build:
• Buildings
• Vehicles
• Machines
• Bridges
• Trains
• Industrial structures
• Science-fiction structures
• Other fictional creations
Bedrooms and closets can contain enormous personal collections.
These collections can also include:
• PC components
• Monitors
• Model kits
• Airbrush paint
• Spray paint
• Weathering sets
• Model glue
• Super glue
• Tool kits
• Engine models
• Diesel engine models
• Jet engine models
• Scale-model accessories

FORT COMBINE DORMITORY LOCATIONS

Several dormitory areas are distributed throughout the facility.
Area 7-G Topside Dormitories is located within Sector 3-C Coolant Reserve & Storage and is positioned along the Sector 3-C line of the HIVAC Fort Combine Transit System.
Level 2-B and Level 4-D Dormitories contain additional adjoined apartment-like rooms and are located along the Sector 2-B line of the transit system.

Level 3-C Dormitories contains adjoined one-story house-like rooms within Sector 5-E Administration and is located along the Sector 5-E line of the transit system.
Some of these areas have hallways and lobbies that resemble hotels.
Certain sections may have extremely dark or completely unlit areas because of power-saving systems, lighting problems, or simply because nobody is currently occupying those floors.
These areas are not necessarily abandoned, but they can feel empty, quiet, and somewhat creepy.

FORT COMBINE TRAINING FACILITIES

Fort Combine contains specialised training centres.
These include:
• Sector A-1 Training Center
• HIVAC Unit Training Center
The Sector A-1 facility can train Hazardous EnVironment users and security guards.
The HIVAC Unit Training Center can train HIVAC security guards and soldiers.
Training can involve:
• Security procedures
• Hazardous-environment operations
• Equipment operation
• Emergency response
• Transportation procedures
• Laboratory security
• Military exercises
• Protective equipment

FORT COMBINE STORAGE AND EQUIPMENT

Fort Combine has large equipment-storage areas and secure weapon-storage rooms.
Some storage facilities contain collections of military equipment that can include:
• Pistols
• Revolvers
• Submachine guns
• Assault rifles
• Battle rifles
• Semi-automatic rifles
• Shotguns
• Light machine guns
• Rocket-propelled grenade launchers
• Grenades
• Explosives
• Laser tripmines
• Sentry guns
• Other fictional military equipment
Examples of fictional weapons and equipment include:
• P-series or Prichett-series pistols
• One Beagles
• Magnum-style revolvers
• M75 assault rifles
• R1 battle rifles
• FAL-style rifles
• G3-style rifles
• G76 rifles
• M16-style rifles
• M4-style rifles
• MP5 submachine guns
• SPAS-12-style shotguns
• Pump-action shotguns
• M240-style machine guns

• M249-style machine guns
• M60-style machine guns
• M67-series equipment
• BS Solvalous
• M27-series equipment
• M23B-style laser tripmines
• M80 Striders
• M174 Shepherds
Some weapons may be equipped with fictional grenade-launcher systems.
Some equipment-storage rooms contain ammunition and other equipment.
These facilities are not necessarily limited to Delta Therian Complex. Additional secure equipment rooms exist in other military sectors throughout Fort Combine.

ADVANCED CRYOGENIC RESEARCH

Fort Combine also contains an Advanced Cryogenic Research Lab.
Cryonics and long-term biological preservation are studied there.
Within the Furuniverse, some furries believe that leaving or escaping from Earth could allow them to awaken in the future.
These beliefs can influence fictional cryogenic research, space travel, interplanetary exploration, and teleportation projects.

DELTA THERIAN COMPLEX

Delta Therian Complex is the final major sector of HIVAC Fort Combine.
It contains some of the facility's most advanced experimental technology.
Among its most important technologies are:
• Interplanetary teleportation devices
• Interplanetary teleportation ring devices
• Interdimensional teleportation devices
• Interdimensional teleportation ring devices
These systems can accommodate both large and small land vehicles.
They can connect Furoria with other habitable planets, including Huskarra and Velirum.

INTERPLANETARY TELEPORTATION

The interplanetary teleportation technology connecting the major habitable worlds of the Furstar System was originally developed far earlier in Furuniverse history.
The technology was formed and invented during the mid-2050s BZE, meaning Before Zodiac Era, before the HIVAC Fort Combine facility itself was completely built in the late 1940s.
The technology allows large and small vehicles to travel between habitable planets without relying entirely on conventional spacecraft.

INTERDIMENSIONAL TELEPORTATION

Interdimensional teleportation is even more advanced.
A major interdimensional teleporter was developed in the 1150s in the fictional historical timeline.
A later major development occurred in late 1995, when another interdimensional teleportation system was successfully formed and invented.
The development of this technology opened connections between Furoria, other furry planets, and entirely different dimensions.

THE FURSTANCE

Eventually, HIVAC Fort Combine is no longer operated under its original HIVAC identity.
The facility is renamed Furstance Fort Combine.
The Furstance becomes affiliated with the Armed Forces of the United Federal States and the FSO, or Furstance Syndicate Organization.
This transition occurs by the mid-2010s.
The facility continues to contain laboratories, research sectors, transportation systems, residential areas, military infrastructure, advanced technology, and interplanetary and interdimensional transportation systems.

THE FURSTANCE AND THE WIDER FURUNIVERSE

Furstance personnel include many different furry species.
These can include:
• Anthro canines
• Anthro felines
• Anthro hyenas
• Anthro lemurs
• Peditrans/Therians
• Altertherians
• Other furry beings
Some foreign soldiers and visitors are also represented by these species.
Many of them already understand concepts such as "fursuit" and "fursona."
They understand these terms as part of the broader furry culture that exists throughout the Furuniverse.

THE WIDER FURRY PLANETS

The Furuniverse contains an enormous variety of furry worlds.
Some planets have populations numbering:
• Billions
• Trillions
• Quadrillions
• Quintillions
• Sextillions
• Septillions
• Octillions
• Nonillions
• Decillions
Some planets are similar in scale to enormous fictional homeworlds such as the Land of Light concept from Ultraman.
Other planets are:
• Hyper-Earths
• Super-homeworlds
• Giant furry worlds
• Canine worlds
• Feline worlds
• Marine worlds
• Reptilian worlds
• Dragon worlds
• Duck worlds
• Fantasy worlds
• Cloud worlds
• Kemono-like worlds
Some worlds are dominated almost entirely by one species.
For example, a canine world may contain mostly anthropomorphic canines.
Another world may contain mostly anthropomorphic canines and felines.
Another world may be populated almost entirely by anthro ducks.
Other worlds can contain enormous mixtures of species.

DIFFERENT FURRY DIMENSIONS

The Furuniverse contains dimensions with radically different environments and cultures.
Some dimensions are modern.
Some are futuristic.
Some are dreamlike.
Some resemble science-fiction civilisations.
Some resemble fantasy settings.
Some contain fantasy Asian towns.
These can include fictional environments inspired by a mixture of Japanese-style and Chinese-style fantasy architecture.
Other dimensions can contain:

• Cloudy lands
• Giant forests
• Magical cities
• Futuristic megacities
• Kitsune communities
• Wolf-girl communities
• Big-cat communities
• Giant goddess-like animals
• Super-homeworld planets
• Extremely advanced civilisations
• Peaceful rural settlements

These worlds are not required to follow the same rules as Furoria, Huskarra, or Velirum.
Some can have different biology, different languages, different technology, different histories, different social structures, and different forms of transportation.
Some worlds are almost entirely peaceful.
Others may contain small amounts of conflict.
Conflict can range from gentle disagreements to more serious fictional conflicts depending on the individual dimension.

THE FURUNIVERSE'S GENERAL PHILOSOPHY

Many worlds within the Furuniverse are designed around the idea that life can be extremely peaceful, prosperous, safe, and happy.
In some dimensions, inhabitants do not experience fear, pain, or loneliness in the conventional human sense.
This can apply to contemporary worlds, modern worlds, futuristic worlds, dreamlike worlds, fantasy worlds, or completely unfamiliar civilisations.
Some settings are intended to have a "happily ever after" atmosphere.
However, this does not mean every single Furuniverse story must be completely conflict-free.
Different worlds can have different levels and types of conflict.
Some conflicts can be gentle and harmless.
Others can be more serious.
The important distinction is that these fictional worlds are not automatically representations of real-world events.

TRANSPORTATION IN THE FURUNIVERSE

Different Furuniverse worlds have different transportation systems.
Some regions use conventional roads.
Others use advanced autonomous transportation.
Some regions use electric freight trains.
Some parts of Western United Federal States use electric freight trains and road trains.
Western Central Plains also use road trains, which are commonly called long-load haulers.
Road trains are particularly common in:

• Darrakoon
• Parts of Auratheria
• Southern Zulekore
• Parts of Nordicavire
• Parts of Ducklandia
• Parts of Clawsha

These vehicles can be extremely long and are designed for heavy freight transportation.

AUTOMATION AND SAFETY TECHNOLOGY

The Furuniverse contains advanced safety technology.
Many power tools are equipped with automatic stop-brake systems designed to react when a tool detects an attempt to cut into skin or another unintended object.
These systems are intended to greatly reduce the possibility of serious injury.
Similar safety technology can exist in devices such as garbage disposals.
The technology is much more advanced than conventional real-world safety systems and reflects the Furuniverse's emphasis on preventing serious accidental injuries.

BODY PROPORTIONS OF ANTHROS

Anthropomorphic animals have heads that can be larger or smaller than those of their real-world animal counterparts.
Their heads are not simply human heads with animal ears attached.
Their skulls, muzzles, jaws, ears, noses, eyes, and other facial structures remain fundamentally animal-based.
However, they have evolved or developed proportions suitable for upright anthropomorphic bodies.
Their bodies generally have:

- Plantigrade legs
- Human-shaped feet
- Upright posture
- Balanced torsos
- Balanced body proportions
- Animal-based heads
- Species-specific features

Many anthros are taller than average humans.
Some species are particularly tall.
Primatarins are generally semi-tall, while some anthro lemurs are tall even among Primatarins.
Peditrans/Therians, Altertherians, canines, felines, hyenas, and many other furry species can also be tall.
The exact height varies between species and individuals.

POWER, PEACE, AND SAFETY

The advanced societies of Huskarra, Furoria, and Velirum generally emphasise peace, prosperity, safety, technology, and quality of life.
These worlds are not intended to be dystopian versions of Earth.
They can contain advanced technology, military research, fictional security forces, strange facilities, dangerous equipment, and science-fiction concepts while still maintaining peaceful civilian societies.
The existence of military or security technology does not mean that everyday life is violent.
In many cases, such equipment exists specifically to protect the population, conduct research, or deal with unusual fictional threats.

THE FURUNIVERSE IS NOT EARTH

The Furuniverse is not an alternative Earth.
It is not a hidden version of Earth.
It is not a parallel Earth.
It is not intended to be a secret history of Earth.
It is not intended to replace Earth's actual history.
The Furuniverse is an independently fictional reality with its own:

- Planets
- Stars
- Continents
- Oceans
- Countries
- Languages
- Species

- Social structures

Some concepts may look familiar because fictional worldbuilding naturally uses recognisable ideas such as cities, cars, trains, laboratories, military facilities, languages, schools, houses, computers, model kits, and other everyday concepts.
However, familiarity does not mean that something is an exact copy of Earth.
Similarly, a fictional facility can be inspired by the general idea of a famous science-fiction research laboratory without being an exact recreation of that facility.
The Furuniverse has its own identity.

EARTH AND THE FURUNIVERSE

Earth can be referenced within Furuniverse stories, but Earth is not the foundation of the Furuniverse's fictional civilisations.
The Furuniverse does not require Earth to explain the existence of Furoria, Huskarra, Velirum, or the other furry worlds.
The three habitable worlds of the Furstar System developed independently.
Their civilisations, species, languages, geography, governments, technology, and histories are all part of the fictional setting.
The Furuniverse can therefore contain familiar concepts without being an alternate or parallel Earth.

FINAL OVERVIEW

The Furstar System is one of the major planetary systems of the Furuniverse.
Its three major inhabited terrestrial worlds are Huskarra, Furoria, and Velirum.
Huskarra is a cold terrestrial world approximately 4.9 times the size of Earth and home to more than 77 billion inhabitants, with anthro Huskies as its largest population.
Furoria is a hyper-Earth approximately five times the size of Earth, containing 10 continents, 7 oceans, 22 countries, and more than 100 billion inhabitants. It is an extremely peaceful and prosperous world with a history fundamentally different from Earth's.
Velirum is a second hyper-Earth approximately 4.5 times the size of Earth, with more than 85 billion inhabitants and an enormous diversity of anthropomorphic species, including Peditrans/Therians, Reptilians, dragons, Marinians, canines, felines, marine anthros, reptiles, hybrids, and many others.
Beyond these three planets lies an enormous wider Furuniverse containing thousands of confirmed habitable furry planets and potentially countless more worlds and dimensions.
Some are modern.
Some are futuristic.
Some are fantasy-based.
Some are dreamlike.
Some are enormous hyper-homeworlds populated by billions, trillions, quadrillions, quintillions, sextillions, septillions, octillions, nonillions, or even decillions of furry beings.
The Furuniverse is therefore not one single style of world. It is a collection of many different fictional realities, planets, dimensions, civilisations, and cultures, each capable of having its own rules and identity.
At the centre of this setting are the ideas of fictional creativity, worldbuilding, furry civilisations, technological advancement, peaceful societies, diverse species, enormous planets, and completely different fictional realities.
Nothing in the Furuniverse is intended to be an exact copy of Earth, and the Furuniverse should not be interpreted as an alternative, hidden, or parallel version of Earth.

Furuniverse Personal Journal

August–December 2025

August 1, 2025

DAMN! Time has been going so freaking fast lately. I know it always feels that way as we get older, but sometimes it really does feel like the days blur into weeks, the weeks blur into months, and the months blur into years. Everything around us seems to be getting older, too, and most things aren't exactly new anymore.

So, yeah. Today is August 1st. Yesterday was the last day of July, which means summer break is getting close to being over.

But, honestly...

MAN, I FINALLY FINISHED WRITING MY EXTREMELY LONG PAGE-DOCUMENT, "The Three Habitable Planets in the Furstar System in the Furuniverse: The Alternative Real-Life Form from a Different Reality Encyclopedia"!

It took me MONTHS AND MONTHS to finish that thing. At least I finally got it done!

DAMN, it was hard to write.

The document originally had the word "Documentary" in the title, but I eventually renamed it to "The Three Habitable Planets in the Furstar System in the Furuniverse: The Alternative Real-Life Form from a Different Reality Encyclopedia." I also added a bunch of extra encyclopedia-style topics to it.

Honestly, the ridiculously long title feels appropriate enough.

As part of my personal fictional afterlife concept, I sometimes imagine what would happen if I traveled to another dimension after transforming into a wolf with small antlers, somewhat similar to the kind of wolf transformation I imagine for Penny Fitzgerald. I imagine having beautiful fur, spending a long time in another dimension, and eventually returning to the Furuniverse after transforming back into an anthro husky.

Of course, in some versions of the idea, I might never return and could remain in another dimension permanently.

I also imagine needing some time alone before eventually making new friends in another dimension and being reunited with them later.

This is part of my personal afterlife belief and fictional worldbuilding. In one version, I would be reincarnated as a tall, 6'1" anthro husky man with three tails who becomes a mythic superstar. I might even have a mythic superstar girlfriend before eventually being reborn as an anthro husky girl and starting an entirely new life as a newborn in a new, wealthy family.

So, yeah. That's basically what I had to say for now.

Updated September 16, 2025

Three Habitable Planets in the Furstar System

I resized the three habitable planets in the Furstar System in kilometers.

Huskarra

- **Diameter: 62,436 km**
- **Radius: 31,218 km**

Furoria

- **Diameter: 63,710 km**
- **Radius: 31,855 km**

Velirum

- **Diameter: 57,339 km**
- **Radius: 28,670 km**

NEXT UP: MILES! LET'S GO!!!

August 4, 2025

Updated September 16, 2025

Three Habitable Planets in Miles

Huskarra

- **Diameter: 38,798 miles**
- **Radius: 19,399 miles**

Furoria

- **Diameter: 39,593 miles**
- **Radius: 19,795 miles**

Velirum

- **Diameter: 35,631 miles**
- **Radius: 17,816 miles**

AND YEP! That's pretty much all I had for now!

August 10, 2025

Heights of Anthro Species in the Furuniverse

Here are the approximate heights of several major anthro species found throughout the Furuniverse, including Furoria.

Anthro Canines

- **Male: around 6'1"–6'6"**
- **Female: around 5'9"–6'2"**

Anthro Felines

- **Male: around 5'11"–6'6"**
- **Female: around 5'8"–6'2"**

Anthro Hyenas

- **Male: around 6'0.5"–6'5"**
- **Female: around 5'9"–6'1.5"**

Peditrans/Therians

- **Male: around 5'11"–6'8"**
- **Female: around 5'8"–6'3"**

Altertherians

- **Male: around 6'0"–6'10"**
- **Female: around 5'8"–6'5"**

Berdorons

- **Male: around 5'11"–6'4.5"**
- **Female: around 5'8"–6'0"**

Primatarins — Excluding Anthro Lemurs

- **Male: around 5'9"–6'4", although some can be taller**
- **Female: around 5'6.5"–5'11", although some can be taller**

Primatarins — Including Anthro Lemurs

- **Male: around 5'11"–6'4"**
- **Female: around 5'9"–6'0"**

In the Furuniverse, Berdorons and Primatarins are often born through machines and may eventually receive government-assigned careers depending on their abilities and circumstances. Machine-born Altertherians and Peditrans/Therians, meanwhile, generally live more naturally, although some may develop unusual abilities or superpowers connected to creative fields such as art, animation, game development, or writing. Some may become exceptionally skilled artists or keep detailed personal journals. Machine-born Berdorons and Primatarins—including machine-born Altertherians and Peditrans/Therians—may attend guild-like academies where they learn skills and prepare for their future careers. These academies can be extremely strict and rigid. In the darker parts of this fictional system, people who repeatedly fail tests or receive poor evaluations may be sent to enormous underground labor facilities that function somewhat like prison complexes. The general concept is somewhat inspired by the guild-like systems seen in fictional settings such as Krypton in DC Comics, but these people aren't necessarily criminals. The system is simply extremely rigid and authoritarian in its structure.

August 10, 2025

I know a lot of people don't like living with parents or siblings who are constantly miscommunicating, misunderstanding them, asking too many questions, acting negatively, or being difficult, rude, or toxic.

I understand that feeling.

At the same time, having a difficult relationship with your parents or siblings doesn't automatically mean they're evil or bad people. Family relationships can be complicated, and sometimes people simply don't communicate well with one another.

Life itself isn't easy. Sometimes it feels ridiculously hard.

I also think about how small Earth is compared with many planets, especially giant planets such as Jupiter and Saturn and some of the enormous exoplanets we've discovered. Earth has nearly 200 countries and thousands of languages, so there's an enormous amount of cultural and linguistic diversity here.

The Furuniverse is deliberately very different from that.

I sometimes think about the HIVAC Fort Combine, the enormous underground military-scientific research facility in my fictional setting. In my world building, its dormitories contain huge personal hobby collections belonging to scientists, security guards, and other personnel. These collections can include model kits, die-cast vehicles, model trains, toys, computers, and all kinds of other hobbies.

That idea partly reminds me of how my grandfather had a large personal collection while living in an apartment in Wichita, Kansas, years ago. I'm intentionally keeping the details of my family's lives private, though.

My family's privacy matters to me, so please respect that.

I don't want to publicly share too much personal family information. Everyone's family situation is different, and people have different combinations of parents, siblings, aunts, uncles, grandparents, and other relatives.

As for my fictional worldbuilding, though…

HOLY SHIT, THAT'S A LOT!!!

I would love to imagine walking through those apartment-like, retirement-style, and one-story-house-style dormitories in HIVAC Fort Combine and seeing entire rooms filled with completed model kits, die-cast models, model trains, computers, toys, and other collections.

That's part of the fictional belief system and creative concept I've been developing.

August 14, 2025

Returning to This Reality as a Human Again?

OH, HELL NO!

In my fictional afterlife concept, I don't want to return to this reality as a human after leaving the Furuniverse.

In this fictional belief system, furries, therians, and furry-therian hybrids who identify as anthro animals would eventually be reincarnated as anthro animals rather than humans. It doesn't matter whether someone is agnostic, atheist, spiritual, or something else; this is simply how the fictional system works in my setting.

Someone might travel to another planet, another dimension, another country, or some kind of neutral territory. The possibilities are basically endless.

I also imagine the Furuniverse having completely different vehicle traditions. For example, some older fire trucks, buses, school buses, medium-duty trucks, and heavy-duty trucks use different styles of Budd-style steel or aluminum wheels. Older vehicles and Australian-style prime movers may use different wheel and hub configurations depending on the vehicle and region.

Furoria is a utopian hyper-Earth-scale planet, so its transportation systems are enormous.

Cities on Furoria mostly consist of above-ground buildings, although underground structures are common as well. What Furoria generally doesn't have are enormous underground skyscrapers.

Research facilities are a different story.

Large research complexes can extend far underground and contain laboratories, transportation systems, military facilities, dormitories, storage areas, power systems, and entire underground sectors. HIVAC Fort Combine is one of the biggest examples.

Its overall concept has some similarities to the fictional Black Mesa Research Facility from *Half-Life*, but HIVAC Fort Combine is its own fictional facility and is not intended to be an exact copy.

Everything in the Furuniverse is deliberately different.

August 20, 2025

Good grief. Some policies and restrictions can feel pretty frustrating sometimes.

Things change as local and national governments introduce different rules. Some regulations are strict, while others are relatively relaxed.

Earth has plenty of messed-up stuff going on, including problems on the Internet, but that doesn't mean the entire world is broken or bad. There are still plenty of good things in the world.

Speaking of our reality, including things like politics, government, and other parts of society, I've been working on the Furuniverse as my fictional narrative concept for a long time now, and it's been a lot of work.

I've also been working on the Furworld map of Furoria and its 22 countries.

The countries include:

- **Canidland**
- **The United Federal States of Auratheria**
- **Somborerio**
- **Cubén**
- **Monkania**
- **Perterrio**
- **Suria**
- **The Furolish Kingdom**
- **The Nordicaviran Union**
- **The Kingdom of Karellaberg**
- **Slavania**
- **Ruskarra**
- **United Halimah Arabia**
- **The Zulekorese Union**
- **South Zulekore LeSimba**
- **Chingduo**
- **Furon**
- **Pankhdesh Raj**
- **Ducklandia**
- **Liberen**
- **Valkoraya**
- **Darrakoon**

The Furworld has seven federal countries and fifteen unitary countries.

Here is another breakdown of their governmental structures:

Country	Government	Internal divisions
United Federal States	**Federal Republic**	**100 states**
Ducklandia	**Federal Republic**	**55 states**

Ruskarra	**Federal Republic**	**50 federal subjects**
Perterrio	**Federal Monarchy**	**47 federal states**
Furon	**Unitary Monarchy**	**40 prefectures**
Chingduo	**Unitary Republic**	**37 prefectures**
Somborerio	**Unitary Monarchy**	**35 states**
Pankhdesh Raj	**Federal Monarchy**	**30 states**
Zulekorese Union	**Neutralized Federal Monarchy**	**25 subdivisions**
Slavania	**Neutralized Unitary Country**	**22 administrative divisions**
Monkania	**Neutralized Unitary Country**	**20 divisions**
Valkoraya	**Neutralized Unitary Monarchy**	**15 administrative provinces**
Suria	**Neutralized Unitary Country**	**13 regions**
United Halimah Arabia	**Neutralized Unitary Monarchy**	**11 subdivisions**
Liberen	**Neutralized Unitary Country**	**10 states**
Cubén	**Unitary Republic**	**9 administrative divisions**
Canidland	**Neutralized Unitary Monarchy**	**8 administrative provinces**
South Zulekore LeSimba	**Unitary Republic**	**7 divisions**
Nordicaviran Union	**Federal Republic**	**5 federal states**
Darrakoon	**Unitary Monarchy**	**4 states**
Furolish Kingdom	**Unitary Monarchy**	**2 kingdoms**
Kingdom of Karellaberg	**Neutralized Unitary Monarchy**	**2 kingdoms**

In my setting, “neutralized” governments operate differently from conventional governments. Some neutralized countries have little or no conventional governmental authority, while neutralized monarchies can still retain a functioning government.

Furoria also has overhead power lines, but they generally aren't designed like the tangled and visually messy systems found in some parts of Earth.

They're mainly used in rural areas, neutral zones, and areas near cities. Medium and large cities usually place more utilities underground because Furorian infrastructure is more advanced.

And, of course, Furoria has biomes just like Earth does—just with its own geography, ecology, and environmental systems.

August 24, 2025

It's 2025, and this year has been absolutely crazy for me creatively.

I've been developing my personal fictional belief system and expanding the Furuniverse more and more. I'm still figuring things out, and I expect the concept to continue changing.

One of the ideas I've developed is that souls somehow influence wolfpacks in forests and encourage them to tell the truth. In my fictional worldview, life isn't necessarily the end, and everything can be completely different from what we experience here.

To be clear, this belief system is not intended as a real-world claim and isn't supported by scientific evidence. It's part of my fictional narrative concept.

Huskarra has a cold interior in my setting, while Furoria and Velirum have warmer interiors. All three are enormous, habitable planets with their own gravity, geology, ecosystems, and civilizations.

I imagine eventually living on Furoria before being reincarnated as an anthro husky girl in a new, wealthy, famous family.

I also imagine traveling through interdimensional teleporters into places such as anthro duck worlds and other fictional dimensions.

Some of these worlds have languages inspired by English or German, but they aren't actually English or German. They're completely fictional languages with their own pronunciations and histories.

Some of these worlds have American-inspired architecture, left-hand traffic, right-hand traffic, or a mixture of both.

Other worlds can be completely different.

Some might be fantasy worlds. Others might be futuristic worlds. Some might have Christmas themes, Halloween themes, giant cities, strange landscapes, or entirely unfamiliar cultures.

That's what makes the Furuniverse interesting to me: nothing has to be exactly the same.

August 24, 2025

About two months ago, I had all four of my wisdom teeth removed while I was under sedation at the dentist.

Afterward, I used an ice-pack head wrap, took pain medication, and ate soft foods while I recovered. It took days and then weeks to feel better, and eventually the healing continued over the following months.

It was definitely a painful experience, but I'm glad I got through it.

Around that same period, my parents and I went to TFCU to open a new bank account. It took quite a while, but eventually I got the account and received a debit card.

I chose yellow for the card.

For the time being, though, my mother kept my debit card and some of my important documents stored away, so I couldn't use them myself yet.

August 26, 2025

In the Furuniverse, human religions don't exist as part of the setting.

Instead, the Furuniverse has enormous cosmic beings such as:

- **Wolf Titans**
- **Supra Titans**
- **Navara Titans**
- **Hilux Titans**
- **Fox Titans**
- **Kitsune Titans**
- **Coyote Titans**
- **Hybrid Canine Titans**

Some have four to six ears and anywhere from two to nine tails, depending on the species.

These beings can be unimaginably enormous—far beyond ordinary planetary or even cosmic scales. Some are associated with enormous god-like superclusters called the One Paw of God and the Paw of Titans.

Despite their incredible size and power, they're generally portrayed as gentle, kind, mysterious, and benevolent.

Female canine titans are especially prominent in the mythology because they represent immense cosmic feminine power.

They are some of the most famous beings in Furuniverse mythology.

The Furworld also has several measurement systems.

Most of Furoria uses furmetric/metric units.

Auratheria, particularly the United Federal States, uses some furimperial/imperial units as well. Ducklandia, the Furolish Kingdom, Liberen, and South Zulekore LeSimba commonly use both systems.

That's another example of how Furoria has its own history rather than simply copying Earth's systems.

August 28, 2025

Furolish and Ducklandian Realms

Here are the countries that are currently under Furolish rule and belong to the Furolish realm system:

- **Canidland**
- **Darrakoon**
- **Pankhdesh Raj**
- **Valkoraya**

South Zulekore LeSimba used to be under Furolish rule in the distant past.

There are also countries within the Auratherian & Ducklandian, or A&D, realm system:

- **Liberen**
- **Monkania**

These countries have historical connections to Ducklandian imperial expansion and colonial institutions within Furworld history. Liberen has an especially complicated history because both Ducklandian and Ruskarran powers played roles in its development.

Furoria also has a different approach to infrastructure.

Most buildings on Earth are above ground, while underground buildings are generally limited to particular purposes because underground construction can be expensive.

Furoria uses much more underground infrastructure, particularly for utilities in medium and large cities.

Its underground systems are designed to be strong, organized, efficient, and visually clean.

August 30, 2025

IN FICTION — EXPECTATIONS

As part of my fictional narrative, I imagined a journal written by Délphine Revord.

In this fictional story, Délphine describes her desire to leave her old life behind and become a machine-born anthro animal in the Furuniverse.

She imagines being reborn as a tall, 5'11" anthro black wolf girl with three tails, dark fur, a slim build, and a new identity.

She eventually meets Pyotr Kulikov, a tall anthro wolf who plays an important role in the fictional history of Furoria and the Furuniverse.

She also imagines having a new boyfriend and becoming a professional artist. Depending on the version of the story, she could become an animator, sculptor, graphic designer, illustrator, or another kind of creative professional.

In the fictional timeline, she had previously been a human high-school student who maintained a YouTube channel and smaller social-media accounts.

Her fictional story is ultimately about leaving behind suffering, isolation, privacy concerns, and other negative experiences and entering a completely different fictional world.

Again, this is part of the fictional narrative and belief system, not a claim about real-world reincarnation or an instruction to escape real life.

September 1, 2025

Délphine Revord, also known in my fictional story as CHiEN-lOUP, is one of my imagined relationships in the Furuniverse.

In my fictional afterlife concept, I imagine meeting her and eventually spending time with scientists, security guards, soldiers, engineers, inventors, and Pyotr Kulikov inside HIVAC Fort Combine.

I might live there for a while, or perhaps stay at a relative's house, apartment, or small automotive workshop that is attached to someone's home.

These places could have enormous hobby collections containing model kits, die-cast vehicles, model trains, computers, toys, and other things.

Depending on the location, I imagine these homes being somewhere in the central or eastern regions of the United Federal States.

I'd also rather travel in large or medium-sized vehicles than small cars. Vans, camper vans, motorhomes, converted buses, heavy-duty trucks, and similar vehicles would be perfect for long-distance travel.

I'd especially like vehicles equipped with autonomous driving systems if necessary because driving fast cars isn't something I particularly enjoy.

Sometimes I imagine having only about a decade left to live on Furoria before another reincarnation.

One version of my afterlife plan places my reincarnation date on May 1, 1993, when I would awaken as a 6'1" anthro husky with three tails inside a bedroom in the Level 2-B Dormitories of HIVAC Fort Combine.

I imagine eventually appearing in mainstream media, giving public interviews, and living with several dogs.

Some of my fictional dogs include Frankie, Al, Hina, Lily, Scott, JoJo, and Shadow. Shadow eventually disappears into another dimension called MGR-101.

I also imagine exploring Furoria with my new friends and girlfriend, visiting bowling alleys, public events, cities, and other places.

Sometimes I imagine thousands of people gathering at a bowling alley, creating an incredibly energetic atmosphere.

I might even arm-wrestle someone for fun.

My fictional girlfriend and the other anthro characters in this setting don't experience ordinary pain, fear, or suffering in the same way humans do.

That's simply one of the biological rules of my fictional world.

In reality, I've only traveled internationally to Japan and Germany with my family, partly because of my father's military service. We visited Okinawa in 2012—just me, my mother, my brother, and my sister—before returning to Oklahoma City. Okinawa is part of Japan, of course.

But in the Furuniverse, I imagine traveling all over Furoria and visiting all kinds of places.

Anthro ducks and anthro pelicans also have their own appearances. Anthro ducks can have black bodies with orange or yellow beaks and legs, while some have black beaks and legs. They don't have wings in the conventional sense.

Anthro pelicans are generally white with orange or yellow beaks and legs and similarly lack conventional wings. They aren't particularly familiar with Earth culture because Earth simply isn't part of their cultural history.

September 1, 2025

Things I Like and Dislike

Likes

I like:

- **Bunnies**
- **Coyotes**
- **Foxes**
- **Wolves**
- **Furries**
- **Therians**
- **Warrior Cats**
- **Buses**
- **Cars**
- **Motorhomes**
- **Trucks**
- **Littlest Pet Shop**
- **Cats**
- **Dogs**
- **Puppies**
- **Food**
- **Model kits**
- **Utopia**
- **Driving big trucks in the Furuniverse**
- **Driving large vehicles in fictional worlds**
- **Alternate realities as a fictional concept**
- **Reincarnation as a fictional/worldbuilding concept**
- **Traveling to different dimensions**
- **Video games**
- **Hard work**
- **Modding**
- **Healthy food**
- **Sleeping**
- **Computers**
- **Art**
- **Fiction**
- **Drawing**
- **Junk food occasionally**
- **Being wealthy in my fictional setting**
- **Memes**
- **Stories**
- **Animals**
- **Wildlife**
- **Documentaries**
- **Encyclopedias**
- **Concept art**
- **Writing**
- **TV shows sometimes**
- **Movies sometimes**
- **Sports sometimes**
- **Subscribers**
- **Followers**
- **Friends**
- **Social media**
- **YouTube**
- **SimCity**
- **Michael Jackson**
- **The Beatles**
- **Animation**
- **Animation memes**
- **Short films**
- **Peace**
- **Pets in fictional worlds**
- **Minecraft**
- **Survivor Dogs**

- **Erin Hunter books**
- **Being well-known**
- **Maintaining a healthy weight**
- **Hamsters**
- **Small animals**
- **Politics occasionally, although I don't pay much attention to politics**

Dislikes

I dislike:

- **Algebra**
- **Allergies**
- **Animal attacks**
- **Mucus**
- **Cold weather**
- **Nothingness**
- **Sinus problems**
- **School**
- **Math**
- **Dystopian settings**
- **Isolation**
- **Loneliness**
- **Violence**
- **Terrorism**
- **Gun violence**
- **Wars**
- **Alcohol**
- **Poverty**
- **Toxic behavior**
- **Tragedies**
- **Dark material online**
- **Crime**
- **The dark web**
- **Incidents**
- **Accidents**
- **Excessive noise**
- **Bullying**
- **Cyberbullying**
- **Harassment**
- **Fighting**
- **People yelling**
- **Excessive junk food**
- **Staying up all night**
- **Being overweight**
- **Obesity**
- **Excessive fear**
- **Suffering**
- **Highways without speed limits**
- **People speeding**
- **Loud sniffing noises**
- **People hanging around school restrooms**
- **Living on small islands in reality**
- **Pets that are extremely difficult to manage**
- **Garbage days**
- **Neighbors' dogs barking**
- **Unwanted noises at home**
- **Extremely expensive cars and houses**
- **Driving fast cars in reality**
- **People keeping weapons at home for self-defense**
- **Excessive drinking**
- **People bringing heavy cases of alcohol into their homes**
- **Very fast cars**
- **Extremely loud vehicles**
- **People getting into fights**

Some of these dislikes are specific to my personal preferences, while others are things I associate with the fictional differences between Earth and the Furuniverse.

September 5, 2025

I've previously talked about visiting places on Furoria such as friends' homes, relatives' houses, museums, casinos, bowling alleys, and other public places.

In some fictional scenarios, bowling alleys can have more than 3,000 people inside, which would be absolutely insane.

I imagine visiting these places with my fictional girlfriend, Délphine Revord, the anthro black wolf.

In my fictional afterlife concept, the Furuniverse becomes a major spiritual belief system founded by Pyotr Kulikov. By 2015, it had more than a billion fictional followers.

Different followers believe in different forms of reincarnation, including one-step reincarnation, two-step reincarnation, being reborn into a new family, or being born through a machine at HIVAC Fort Combine.

Memories and knowledge gradually fade after reincarnation.

The Furuniverse's belief system is entirely fictional and isn't intended to target minors, encourage harm, promote cult activity, or make a real-world supernatural claim.

Within the fictional cosmology, dimensions aren't separate universes. Instead, they're more like directions or destinations that can be traveled to within a single reality.

That's part of the fictional physics of the setting.

Comic-book physics and fictional physics are not the same thing as real-world physics.

In the real world, housing costs money and requires ongoing expenses such as electricity, heating, cooling, insurance, Internet service, and property taxes.

The Furuniverse deliberately works differently.

That's one of the reasons I've designed it as a fictional utopian setting.

September 8, 2025

Oh, boy...

Time really does seem to be flying.

About two days ago, I uploaded my Kenworth T359 mod and promoted my fictional narrative concept online. It received more than a hundred downloads, which made me really happy.

This was supposed to be my final Australian-made Kenworth truck mod for *American Truck Simulator*.

Hopefully, it'll eventually reach more than a thousand downloads.

It took me quite a while to modify the truck. I kept getting distracted, taking breaks, listening to music, and doing other things instead of finishing it.

Still, I eventually got the job done.

And that's basically all I have to say about my last Aussie-made Kenworth truck mod.

September 9, 2025

I would rather use my cellphone before the first bell at school, but apparently there are rules restricting cellphone use once the school day begins.

This isn't necessarily just a school-district policy; in some places, cellphone restrictions can also be established through government laws or regulations.

Different countries and regions have implemented different approaches to student cellphone use.

So I have to be careful when I use my phone.

I usually prefer to use it before the first bell, before classes officially begin.

My bus gets to high school pretty quickly, usually close to 8:00 AM, so I don't have much time.

Also, a few months ago, before I graduated high school, I made some new friends and exchanged phone numbers with them.

Unfortunately, some of them didn't respond to my messages or call me back.

And that's okay.

Sometimes that just happens.

September 14, 2025

I've decided that my current fictional reincarnation plan is to become a tall, 6'2" anthro coyote trapped inside my full human body.

My fictional alias would be KROVI, written in Russian as КРОВИ, meaning “blood.”

I'd have a normal-weight body, strong muscles without being overly muscular, average-sized feet, a balanced body, and two tails.

I'd live independently as an only child inside HIVAC Fort Combine on Furoria before eventually being reborn as an anthro husky girl.

In one version of the story, that second life would begin in the mid-2000s ZE with new parents: a 19-year-old mother who is an author and a 20-year-old father who is a filmmaker. They're wealthy and famous.

My fictional middle name would become Crowell, replacing my previous middle name.

Another version places my first reincarnation in October 1990 ZE, before my fifteenth birthday in May 1991 ZE.

After reincarnation, my memories and knowledge would gradually fade away.

I'd become somewhat shy but still speak clearly and normally.

Eventually, I'd live in HIVAC Fort Combine or elsewhere on Furoria before being reborn into my new family.

Again, this is part of my fictional narrative and afterlife concept rather than a prediction about what will actually happen in real life.

September 17, 2025

The Furstar System — Planetary Sizes

I've finally organized the sizes of the eleven planets in the Furstar System.

Kilometers

Fursun — central star

- **Diameter: 2,275,874 km**
- **Radius: 1,137,937 km**

1st planet — Ketho

- **Diameter: 8,919 km**
- **Radius: 4,459.7 km**

2nd planet — Pexon

- **Diameter: 13,007.7 km**
- **Radius: 6,505.7 km**

3rd planet — Huskarra

- **Diameter: 62,436 km**
- **Radius: 31,218 km**

4th planet — Furoria

- **Diameter: 63,710 km**
- **Radius: 31,855 km**

Furmoon — natural satellite of Furoria

- **Diameter: 3,498 km**
- **Radius: 1,749 km**

5th planet — Velirum

- **Diameter: 57,339 km**
- **Radius: 28,670 km**

6th planet — Jovira

- **Diameter: 501,382 km**
- **Radius: 250,691 km**

7th planet — Skythos

- **Diameter: 28,878 km**

- **Radius: 14,439 km**

8th planet — Furvaan

- **Diameter: 438,976 km**
- **Radius: 219,488 km**

9th planet — Thera

- **Diameter: 115,099 km**
- **Radius: 57,549.5 km**

10th planet — Zynthos

- **Diameter: 98,251 km**
- **Radius: 49,125.5 km**

11th planet — Korsh

- **Diameter: 4,852 km**
- **Radius: 2,426 km**

Miles

Fursun

- **Diameter: 1,414,806 miles**
- **Radius: 707,403 miles**

Ketho

- **Diameter: 5,543.9 miles**
- **Radius: 2,771.2 miles**

Pexon

- **Diameter: 8,082.3 miles**
- **Radius: 4,041.15 miles**

Huskarra

- **Diameter: 38,798 miles**
- **Radius: 19,399 miles**

Furoria

- **Diameter: 39,593 miles**
- **Radius: 19,795 miles**

Furmoon

- **Diameter: 2,173.5 miles**
- **Radius: 1,086.8 miles**

Velirum

- **Diameter: 35,631 miles**
- **Radius: 17,816 miles**

Jovira

- **Diameter: 311,547.2 miles**
- **Radius: 155,773.6 miles**

Skythos

- **Diameter: 17,947 miles**
- **Radius: 8,973.5 miles**

Furvaan

- **Diameter: 272,747.6 miles**
- **Radius: 136,373.8 miles**

Thera

- **Diameter: 71,506.1 miles**
- **Radius: 35,753.1 miles**

Zynthos

- **Diameter: 61,051.2 miles**
- **Radius: 30,525.6 miles**

Korsh

- **Diameter: 4,852 miles**
- **Radius: 2,426 miles**

I originally created the Furstar System between April 8 and August 8, 2025.

The system includes eleven planets, Fursun as its central star, and information about the age and size of the Furuniverse and the One Paw of God.

I also developed more details about anthro biology.

Berdorons and Primatarins have unusual biology and genetics, but their normal vision is generally colorful and human-like.

Peditrans/Therians and Altertherians have more advanced biological traits.

Anthro canines, felines, and hyenas have particularly strong vision, including color vision, night vision, high resolution, and motion tracking.

Other Peditrans/Therians and Altertherians have enhanced vision as well, although it isn't necessarily as powerful as that of canines, felines, and hyenas.

Some species, such as anthro bulls, hogs, pigs, goats, sheep, cows, and donkeys, retain animal-like vocalizations as part of their biology.

September 19, 2025

Goddamn. I feel kind of shy writing such a huge online personal journal sometimes.

It takes me forever to think everything through, organize it, and actually write it down.

In reality, there are animal attacks, disasters, crimes, accidents, and countless other incidents. Some are major, some are minor, and some are never widely reported.

Earth has a lot of limitations.

That's one reason I keep returning to my fictional worldbuilding.

I've previously described Berdorons and Primatarins as having unusual biology and genetics, while Peditrans/Therians and Altertherians have significantly enhanced biology.

Back in April 2025, I created four collective categories of anthro species:

1. **Peditrans/Therians**
2. **Altertherians**
3. **Primatarins**
4. **Berdorons**

I originally gave them different lifespans, but I've continued changing those numbers as the Furuniverse develops.

My newer concept is roughly:

- **Peditrans/Therians and Altertherians: around 110–200 years**
- **Primatarins: around 130–180 years**
- **Anthro lemurs: around 100–120 years**
- **Berdorons: around 120–140 years**
- **Marinians and Reptilians: around 160–220 years**
- **Anthro dragons: around 150–200 years**

Marinians include sharks, seals, sea lions, dolphins, and orcas.

Reptilians include lizards, snakes, Komodo dragons, alligators, and crocodiles.

Anthro dragons have their own biological category.

Marinians are generally around:

- **Male: 6'3.5"–7'2"**
- **Female: 6'0"–6'9"**

Reptilians are around:

- **Male: 6'0.5"–6'10"**
- **Female: 5'11"–6'5"**

Anthro dragons are around:

- **Male: 6'1"–7'0"**
- **Female: 5'10"–6'7"**

These species also have unusually powerful biology and vision.

However, species such as protogens and sergals don't coexist in the Furuniverse.

That's pretty much what I had to say for now.

September 21, 2025

A few days ago, I ate spaghetti with seasoned garlic-butter toast.

I had recently tried double garlic-butter toast with seasoning, and honestly, I thought the flavor was really weird and disgusting. I just didn't like it.

During lunch at school, I also had two burgers—one with cheese and one without.

I opened one of the burgers and turned it into something more like a hamburger steak, or hamburg steak, with barbecue sauce.

That actually tasted freaking good.

My friend Joshua also gave me an apple-juice container because he didn't want it.

I also recently met two new friends, Nyome and her brother Robbie. They're the same age as each other, while I'm several years older and taller than both of them.

It was nice talking with my friends during lunch.

September 23, 2025

After imagining myself being reincarnated as an anthro coyote and eventually entering Furoria, I really want to visit New Brougham City, the largest and most populous city in Auratheria.

I'd love to see its massive skyscrapers, especially the famous quad towers, which are among the tallest modern buildings in the Furworld.

I imagine visiting the city with my fictional girlfriend, Délphine Revord, the anthro black wolf.

I'd probably take an airplane rather than traveling there by land because crossing an enormous hyper-Earth-scale planet by road would take forever.

Furoria has villages, small towns, medium-sized towns, medium cities, large cities, and megacities.

East and southeast Xianyora contain especially futuristic architecture, particularly in Chingduo, Furon, and Valkoraya, whose technological development happened unusually early.

Medium and large cities generally use underground power and utility lines to keep streets cleaner and more visually organized.

Villages and small towns use overhead power lines much more often because they're cheaper and easier to maintain when population density is low.

The same basic philosophy exists throughout the Furuniverse.

On Furoria and other non-futuristic habitable planets, many heavy trucks use four-stroke inline-six diesel engines. V8 diesels are also common, while V10 and V12 engines are less common.

Older heavy trucks may use two-stroke V8 or V12 diesels.

Heavy trucks generally use transmissions with around 10–18 speeds.

Classic muscle cars, pony-car-inspired cars, and pickup trucks also exist.

Muscle cars and pony-car-inspired vehicles are primarily rear-wheel drive.

Classic and modern pickups can use V8, V6, inline-six, or diesel engines depending on the design.

The important difference is that Furorian vehicle brands don't necessarily follow the same industrial history as Earth.

Everything is independently developed.

September 29, 2025

I've previously talked about classic pony-car-inspired vehicles, muscle cars, pickups, and heavy trucks.

Older heavy trucks can use inline-six, V6, V8, or V12 two-stroke diesels, while newer vehicles generally use four-stroke engines.

Minivans and many other vehicle categories also exist, although the classification system isn't exactly the same as Earth's.

The Furuniverse has taken much longer to develop than I originally expected.

I've written journals, created concept art, developed maps, designed vehicles, invented species, and worked on countless other details.

It's honestly been freaking exhausting.

But I'm almost finished.

Some canine species, such as anthro arsas, bush dogs, dholes, diuvettés, silvalus, and tanukis/raccoon dogs, exist in the Furuniverse but aren't among its most widespread canine species.

Other dimensions have much larger populations of some of these species.

For example, the fictional planet Canitron has enormous populations of arsas, bush dogs, dholes, diuvettés, hiluxes, navaras, silvalus, and supras.

Pets also exist, but they're different from Earth's pets.

Many households prefer small or medium-sized animals because very large pets aren't practical.

Earth has domesticated animals that humans have selectively bred for thousands of years.

The Furuniverse has its own completely different history of domestication.

I also deliberately make Furorian vehicles look more visually consistent than many real-world vehicles.

Earth has plenty of vehicles that look awkward, strange, unsuccessful, or just plain bizarre.

That's part of what makes real-world vehicle history interesting.

In my fictional worlds, vehicles are generally designed to look balanced, purposeful, efficient, and harmonious.

And, importantly, they're still fictional vehicles made by fictional manufacturers.

PART 1

This is actually my final page that I'm planning to write.

So here we go!

I've previously talked about inline-four, V6, and V8-powered mid-generation cars from roughly the late 1970s through the 2000s ZE that use transverse engine layouts and mechanical radiator fans.

In my fictional setting, these cars have enough room at the front of the engine bay for mechanical fans.

Not all of them are front-wheel drive, either.

Many use AWD, while others use FWD or different layouts depending on the model.

Medium- and heavy-duty vehicles can also use mechanical radiator fans, although some may be modified to use electric fans.

Now, let's move on to pets.

Furuniverse Pets

The Furuniverse contains many unusual small and medium-sized animals.

These include:

- **Miniature coyotes**
- **Silver foxes**
- **Red foxes**
- **Marble foxes**
- **Amber foxes**
- **Pinto foxes**
- **Semi-dwarf arctic-like foxes**
- **Dwarf/island/miniature pinto foxes**
- **Miniature fennec-like foxes**
- **Teacup foxes**
- **Teacup pinto foxes**
- **Hamsters**
- **Miniature otters**
- **Rabbits**
- **Miniature raccoons**
- **Miniature wolves**
- **Other small and medium animals**

Some pinto foxes are naturally good climbers.

The dwarf and island varieties are smaller, and teacup pinto foxes are the smallest fictional urocyon species in my setting.

These animals can live in islands, continental interiors, tropical environments, subtropical regions, temperate areas, polar regions, tundras, and other fictional habitats.

In the Furuniverse, pets and certain wild animals have unusually resilient biology.

They can tolerate things that would normally be dangerous to animals on Earth, thanks to their fictional hypernatural biology.

However, that's strictly part of the fictional setting.

In the real world, people should never assume that wild animals can safely eat whatever humans eat. Certain foods, including chocolate, grapes, onions, and other ingredients, can be poisonous or dangerous to real animals.

In one fictional dimension, I imagine my dogs living with an older anthro duck farmer and his wife inside a huge underground home bunker connected to an old farmhouse.

The bunker has three floors, large stairways, elevators, hobby rooms, pets, storage areas, and other spaces.

The elevators can travel between the farmhouse and underground levels.

The house contains model collections, computers, toys, model trains, and other hobbies.

Other characters, such as JoJo and his younger sibling, live in portable homes in the surrounding farmland.

That entire world is designed around the idea that everything works together for a common purpose.

That's part of the same fictional concept I've explored in my previous DeviantArt writings, including "The Year Is 1990 ZE, and I'll Be Reincarnated In..."

November 2, 2025

Updated November 4 and December 20, 2025

Story Time!

About four weeks ago, I had tamales for lunch at school.

It was my first time eating them, and honestly, they were really good.

I ate with two of my newer friends at a table near the window.

A few days later, I also tried Colombian food for the first time after going to a Colombian restaurant with my family.

A lot of different foods are still things I haven't tried before.

Also, during the Halloween dress-up day near the end of October, I saw two people wearing fursuits in real life.

That was honestly one of the most surprising things I'd ever seen because I'd never seen people wearing fursuits in person before.

I'd seen people wearing costumes from *The Amazing Digital Circus* and other characters, but seeing actual fursuits in person was different.

There were also a bunch of high-school students being extremely loud—screaming, yelling, and making all kinds of noises.

Sometimes I really want to cover my ears when people get that loud.

I wish I'd had a fursuit or therian mask at home that I could have worn for Halloween.

That would've been pretty awesome.

PART 2

In reality, most passenger cars are front-wheel drive rather than rear-wheel drive or all-wheel drive because FWD can be relatively inexpensive, compact, lightweight, and efficient to manufacture.

Transverse engine layouts are also common because they make efficient use of space.

Historically, rear-wheel drive was much more common, especially during the early automobile era and through much of the twentieth century. Front-wheel drive eventually became dominant in many passenger-car segments.

Personally, though, I prefer rear-wheel drive or AWD.

I'd rather own a used full-size pickup than buy an expensive new vehicle.

I'm not a huge fan of midsize pickups, either.

My father used to own a third-generation Dodge Dakota from the mid-2000s with four-wheel drive and a V8, but he doesn't have it anymore.

I'm also not particularly interested in crossover SUVs.

In the Furuniverse, however, most cars are rear-wheel drive or all-wheel drive, with FR and other longitudinal layouts being much more common.

I'd be able to choose whatever type of vehicle I wanted—car, pickup, van, motorhome, bus, or something completely different.

I also wouldn't want to spend enormous amounts of money on luxury cars, mansions, or other ridiculously expensive things.

In my fictional setting, I imagine having enough money to live comfortably without needing to constantly buy extravagant things.

I'd love to restore old cars, trucks, buses, and other vehicles.

I could even convert an old heavy-duty vehicle into a motorhome.

I might also become a substitute bus driver.

I imagine having lots of pets, developing fictional superpowers, gaining night vision, picking fruit and vegetables directly from trees, building model kits, assembling computers, and doing all kinds of creative projects.

I could wear military boots, military pants, military belts, baggy or flared jeans, track pants, sweaters, hoodies, cowboy hats, wild rags, cowboy boots, or whatever else fits my mood.

My fictional native language might be Furolish, although I could eventually learn other fictional languages that have no connection to Earth's languages.

In this fictional reincarnation concept, writing becomes easier for me, and I'd be able to use some animal sounds after becoming an anthro coyote.

I'd also grow long, wavy or curly head hair.

Eventually, everything from my current reality would become distant and unfamiliar.

I'd live independently as an only child, make new friends, travel around the Furuniverse, and explore other dimensions.

I'd ride in my friends' cars, vans, buses, motorhomes, medium-duty trucks, and heavy-duty vehicles.

The fictional world would have fewer everyday limitations than my current reality.

That's the point of the concept.

PART 3

In the Furuniverse and other dimensions, some vans, SUTs, SUVs, pickup trucks, medium-duty vehicles, and heavy-duty vehicles are designed to be naturally capable of traveling on rough roads or off-road terrain.

Civilian weapon ownership is generally nonexistent in my fictional setting.

Pets sometimes tilt their heads like dogs do in real life.

They can also wear shirts, jackets, and other clothing.

Their paws can come in many colors, including pink, brown, and other fictional colors.

Some pets are shy.

Others sleep together in enormous piles.

Small pets such as miniature fennec-like foxes and teacup foxes can sleep in groups of six, twenty, or even more.

Sometimes more than twenty tiny animals can fit inside a large habitat.

They might even pile onto a bed if their owner is sleeping there.

Baby medium-sized pets may also sleep in groups.

Pets can sleep on beds, in bathrooms, sinks, laundry baskets, closets, storage areas, or basically anywhere they find comfortable.

Sometimes they choose the strangest possible places, which makes it hilarious.

Their vision is colorful and highly developed.

They generally live healthier and longer lives than real-world animals.

They don't gain weight quickly, their teeth and bones are unusually strong, and their bodies can stretch, compress, and flex far beyond normal biological limits.

Their muscles, skin, bones, and other tissues are extremely resilient.

In the fictional biology of this setting, they don't experience ordinary pain, fear, anxiety, or suffering in the same way humans do.

Their bodies also have fictional biological systems that can reject or expel substances that aren't compatible with their bodies.

Again, this is fictional biology—not a description of real animals.

In reality, there are plenty of everyday things that bother me.

For example, I really dislike hearing someone blow their nose loudly in a kitchen or bathroom sink.

Unexpected noises can startle me.

I also don't like being asked overly personal questions such as:

- **“Who are you talking to?”**
- **“Did you eat something?”**
- **“Are you okay?”**
- **“What are you doing?”**

Sometimes people don't mean anything bad by those questions, but they can still feel intrusive when I'm trying to have some privacy.

In the Furuniverse, people generally respect personal boundaries more carefully.

They can still talk privately about family, pets, video games, firearms, hobbies, and other topics, but they don't constantly overshare.

The culture is more balanced and intentional about privacy.

There are also enormous “Super-Furoria,” “Super-Huskarra,” and “Super-Velirum” planets.

Some are more than 5.5 times Earth's size, while others are even larger.

Their populations can live for thousands, millions, or potentially even immortal numbers of years.

Wildlife exists throughout the Furuniverse, but it has its own evolutionary history.

Imports and exports are also much less common between worlds.

At this point, though, I don't really feel like editing all my older Furry Selection Basement Journals.

There's just too much to revise.

Maybe I'll leave those older entries alone and move on to new projects such as the Alteruniverse (Universe V2.0) and MLSU (My Little Stephen Universe).

I've already started promoting some of these ideas online.

I also made an announcement video under my username theStephengate2005 about the Furuniverse Reality Basement Collection.

It took me much longer than I expected.

Sometimes I wish I'd started keeping personal journal entries back in 2015.

Earth is complicated, and everyone experiences life differently.

Some people have lots of friends. Others experience loneliness or isolation.

Some people have supportive families, while others have complicated family situations.

Life can be genuinely difficult.

But within the Furuniverse, life is intentionally designed to feel peaceful, comfortable, and almost utopian.

Other dimensions outside the Furuniverse can be completely different.

Some are perfect.

Some are normal.

Some are imperfect.

Some are fantasy worlds.

Some are hybrid worlds.

Some are mysterious and hidden.

There could even be Christmas worlds, Halloween worlds, and other themed dimensions.

That's what I like about the concept.

It doesn't all have to be the same.

I imagine going into nature, exploring forests, visiting cities, traveling across continents, and enjoying a world where my fictional body doesn't experience ordinary pain, anxiety, fear, or suffering.

My fictional girlfriend Délphine has similar fictional biology.

In my story, our bodies can stretch, compress, and flex, while our bones, skin, and muscles are extremely resilient.

It's intentionally more like alien biology than human biology.

Again, this is fictional narrative worldbuilding rather than real-world science.

PART 4

I've previously discussed real-world conflicts and other difficult events as background material for my fictional setting.

Those events are not part of the Furuniverse itself.

The Furuniverse has its own history, conflicts, societies, and timelines.

In the fictional setting, everything works differently.

I also think about everyday frustrations such as digestive problems, traffic jams, nosebleeds, annoying advertisements, loud noises, and other little things that can make daily life irritating.

These things aren't necessarily major problems, but they can still be bothersome.

In the Furuniverse, biological systems work differently.

People can be born naturally, through machines, through cryogenic processes, or through magical or fictional mechanisms.

Some characters live independently without traditional families.

Others are born into families.

Some become famous.

Others remain completely ordinary.

Being famous doesn't automatically make someone's life easier, though.

Fame can come with pressure, loss of privacy, expectations, and responsibility.

In my fictional world, however, fame and social status work differently.

The Furuniverse has only one fictional reality in its cosmology, with different dimensions functioning more like destinations or directions within that reality.

Earth, by comparison, has one known inhabited planet and one known Solar System.

Our real universe has three dimensions of space and one dimension of time, forming four-dimensional spacetime. Additional dimensions are hypothetical concepts in physics.

Comic-book physics and fictional physics aren't the same as real-world physics.

December 11, 2025

About three days ago, I went to a barber for the first time and had almost all of my hair shaved off.

It looked pretty funky at first.

I hadn't had short hair for years.

I had grown my hair long starting around 2022, and it took months to grow back.

When I was younger, though, my hair seemed to grow quickly.

I've cut my hair short before, but this time I shaved off much more of it and used some touch-up razors to clean up the remaining areas.

Then I had to clean all the hair off the floor, counter, toilet, bathtub, and sink in the hallway bathroom.

That was definitely a lot of work.

PART 5

This is my final page, so here we go!

In the Furuniverse and across other dimensions, freedom is essentially built into the world.

Many things are free or inexpensive, one-time payments are common, and rules are very different from those on Earth.

In my fictional afterlife concept, I imagine being right-handed, although I'd still use my left hand for certain things.

I imagine having a normal-pitched voice, gaining a healthy metabolism, wearing cowboy clothing if I want to, and speaking Furolish as my native language.

I could also learn fictional languages that aren't derived directly from Earth's languages.

Writing would become easier.

As an anthro coyote, I could make animal sounds.

I could grow long, wavy hair.

I could travel freely throughout the Furuniverse and other dimensions, meet new friends, and explore places that don't exist in my current reality.

I'd ride in my friends' cars, vans, buses, motorhomes, medium-duty trucks, and heavy-duty vehicles.

I'd be able to travel to different cities, villages, islands, forests, mountains, and other environments.

The Furuniverse would feel completely different from Earth.

Meanwhile, the real Internet continues producing enormous amounts of news every day.

Local news, national news, international news, wildlife videos, politics, UFO reports, disasters, entertainment, social media posts, and countless other stories appear constantly.

Sometimes it feels overwhelming.

CRAZY, CRAZY, CRAZY!!! HAHAHAHA!

In the Furuniverse, vehicles and everyday objects generally have a more generic or lightly cartoon-like appearance while still looking realistic and purposeful.

Vehicles can be branded or unbranded.

Electronics can have fictional brands.

Clothing, furniture, tools, and other everyday objects are often unbranded.

Tires are an exception because many fictional tire manufacturers exist.

The overall design philosophy is simple:

Everything can look stylized without looking completely unrealistic.

The same philosophy applies to cars, airplanes, helicopters, spaceships, boats, tools, furniture, computers, and other objects.

Pinto foxes are especially popular exotic pets in Ducklandia and Liberen, including their territories.

The three major fictional pinto-fox types are:

1. **Grey-fox-like pinto foxes**
2. **Island-fox-like dwarf/miniature pinto foxes**
3. **Teacup pinto foxes**

The teacup pinto fox is the tiniest fictional urocyon species in my setting.

They are particularly popular in some regions, while ordinary domesticated small and medium-sized pets are more common throughout most of Furoria.

Pets generally reach adulthood around three to five years in this fictional setting, while wild animals can mature anywhere from about two to ten years depending on species and individual development.

Cars, airplanes, helicopters, spaceships, boats, and other machines all exist, but their development is deliberately different from Earth's.

At this point, I think I'm finally ready to move on to my other projects.

I'm going to work on the Alteruniverse (Universe V2.0) and MLSU (My Little Stephen Universe) instead of constantly expanding the Furuniverse.

I don't want to make every single journal entry longer and longer forever.

So, yeah.

I think that's finally enough.

Final Thoughts

Anthro animals from the Furuniverse, other humanoid and non-humanoid species, and Animalians—the fictional term I use for talking non-anthro animals across other dimensions—

I'll be there with you guys.

You promised me. I promised you.

Humans, stay safe.

I know some of my previous writings weren't written perfectly.

The communication wasn't always clear.

The grammar wasn't always great.

Some ideas changed halfway through.

But that's part of how my creative process works.

I've been developing the Furuniverse for a long time, and I've learned a lot while creating it.

The Furuniverse is my fictional narrative concept: a completely different setting with different planets, species, civilizations, languages, vehicles, technology, cultures, biology, and dimensions.

Nothing has to be identical to Earth.

Nothing has to follow Earth's history.

Nothing has to work exactly like Earth's reality.

And that's the whole point.

Farewell.

December 29, 2025

OH! By the way—only three days until 2026!

Regards,
Rinty SkyCoyote

Furuniverse Reality Basement Collection Extras

BY STEPHEN T. FLINT AKA RINTY SKYCOYOTE

08/06/2025 - 10/13/2025

(UPDATED - 09/09/2026)

Wednesday, August 6, 2025

The Internet Is Obviously Hell.

You might have noticed this already, but I know there is a lot of messed-up stuff on the Internet because of age restrictions, restrictions in general, bans, blocked content, censorship, and other issues. However, that doesn't necessarily mean the Internet itself is broken, bad, or harmful. It can be a pretty dystopian place in some ways, and some parts of it can be pretty bad, but that doesn't mean everything about it is negative.

In a different fictional reality, such as the Furuniverse, I imagine the Internet as being more like a utopia. It's a place where I can write journals, create concept art, and explore my ideas. It is separate from this reality and represents the kind of better place I imagine wanting to go to.

Sunday, August 10, 2025

The Year Is 1993 In the Furuniverse

In my fictional narrative, I chose May 1, 1993, as the date when I would wake up from a new dream after being reincarnated as a tall, 6-foot-1-inch anthropomorphic husky. I imagine having three tails that are somehow contained within my body. I would also be known as KROVI (Russian: КРОВИ).
In this story, I would wake up in a bedroom located in the 2-B Dormitories along the Sector 2-B line of the HIVAC Fort Combine Transit System, before my 17th birthday on May 12.
I imagine eventually being featured in mainstream media and participating in a public interview, where I would be known as “60 Minutes Away Ahead.” I would strongly remember the journals I had written, although I would probably approach things differently after being reincarnated.
After security guards or officers took me to the public interview, I would eventually be reunited with people and animals I had written about in my personal journals, including my dogs.
In this fictional concept, I don't mind the idea of therians being reincarnated as anthropomorphic animals, such as canine, feline, deer, or skunk anthros, or as furry-therian hybrids if someone identifies as both a furry and a therian.
For my own story, however, I chose a timeline beginning around mid-1995 and continuing into the present, similar to what I described in my long-form Furry Selection Basement Journals and Online Docs and the Furuniverse Reality Basement Collection.
If you're a furry, therian, or animal artist and you're interested in these ideas, you're welcome to join the discussion or learn more about my fictional belief system. It's completely your choice.
This is part of my strong fictional narrative concept involving the Furuniverse and a two-step reincarnation process.

Tuesday, August 26, 2025

Earth Is Generally Hell.

From what I've noticed, there is a lot of messed-up stuff happening in this world. Unfortunately, it can be extremely difficult to turn the world into a utopia because of weapons and violence, wars, war crimes, threats, terrorism, religious conflicts, protests, poverty, and many other problems.

There are too many people whose lives have been seriously damaged by these problems year after year. But that doesn't mean the world itself is completely broken or bad. The list goes on.

Earth isn't perfect at all. In some ways, it can feel dystopian. As I've said before, this world isn't a utopia, and life, society, the environment, and many other things are far from perfect. I don't think it's realistic to expect Earth to become a perfect utopia.

So yeah, that's how I feel about it.

That's why, in my fictional afterlife concept, I imagine eventually living on Furoria, the fourth planet from Fursun in the Furstar System. I imagine going there after being reincarnated as a tall, 6-foot-1-inch anthropomorphic husky with a healthy weight, three tails, and strong muscles, but not an excessively muscular build. I'd also imagine having a balanced torso and overall physique.

In the story, I would live in HIVAC Fort Combine, the very famous massive underground military and scientific research facility, or somewhere else for a while. Eventually, I would be reborn as an anthropomorphic husky girl and start a new life with a new wealthy and famous family.

I'm not the only fictional Furuniverse believer in this story.

My Ideation Update

I've been thinking about being reincarnated as either a tall anthropomorphic silver fox or a tall anthropomorphic coyote before eventually being reborn as an anthropomorphic husky girl.

In this concept, I would first be reincarnated as one of those two anthro species and then eventually be reborn as a female anthropomorphic husky and start a new life with a wealthy family.

So yeah, I would choose between two possibilities: being reincarnated as an anthropomorphic silver fox or an anthropomorphic coyote before eventually being reborn as a female anthropomorphic husky.

I wanted to write about this idea in a journal on DeviantArt, then write and post an online journal using Google Docs. That's basically the latest update to this particular idea.

Wednesday, October 1, 2025

The Year Is 1990 ZE, and I'll Be Reincarnated

This month is October, so this is going to be a long one. I definitely chose October 15, 1990 ZE—also known as Howltober in my fictional calendar—as the date when I would be reincarnated as a tall, 6-foot-2-inch anthropomorphic coyote. In my concept, I would have a balanced torso and legs, a balanced arm span, two tails, strong muscles without being overly muscular, an appropriate foot size, a healthy weight and body-fat level, a balanced neck size, and nice fur covering my entire body.

My human body would somehow contain or conceal this anthro body, and I would also be known as KROVI (Russian: КРОВИ). I would wake up in a bedroom located in the 2-B Dormitories along the Sector 2-B line of the HIVAC Fort Combine Transit System before my 15th birthday on May 12, 1991 ZE.

Someday, in the story, I would reach a height of 6 feet 2 inches. I would also be featured in mainstream media and participate in a public interview, where I would be known as “60 Minutes Away Ahead” because I would strongly remember the journals I had written. After security guards or officers took me to the public interview, I would eventually be reunited with them and become a mythic superstar and famous person. This would include Délphine Revord, an anthropomorphic black wolf, and I would also have a new fictional girlfriend. Eventually, I would be reborn as an anthropomorphic husky girl and live with a wealthy, famous family. Occasionally, I imagine myself as a hero and as someone who is wealthy. In this fictional narrative, I would own various kinds of non-anthropomorphic pets, including foxes—either miniature or normal-sized—otters, especially miniature otters, raccoons, especially miniature raccoons, fish in an aquarium, and aquarium snails. In this fictional concept, I imagine owning cats and dogs as pets being difficult for me to deal with sometimes. I sometimes joke that they can be a pain to take care of, especially when they're being difficult. Speaking of cats and dogs, some similar things exist in the Furuniverse, including similar types of guns, vehicle models, anthro dog breeds, and other familiar concepts. However, they aren't exact copies or parallel versions of things from Earth.

I've written about this in my previous journals in the Furry Selection Basement Journals & Online Docs and in the very long encyclopedia document titled “The Three Habitable Planets in the Furstar System in the Furuniverse: The Alternative Real-Life Form From Different Reality Encyclopedia.”

I would also love to travel to other dimensions outside the Furuniverse and see completely different things. However, in the Furuniverse, dimensions aren't necessarily parallel universes. They're treated as different kinds of realities or dimensions. In my fictional setting, interdimensional teleporters are somewhat common, although developing them took many years—far longer than originally expected. Their development generally occurred during the 20th century ZE. These interdimensional teleporters are heavily restricted or locked down. Of course, in real life, interdimensional teleporters don't exist, and there is only the reality we actually live in. Comic-book and fictional physics are not the same as real-life physics. In my fictional story, I would also include my non-anthropomorphic dogs, whom I previously wrote about in my personal journals. They would live in another dimension outside the Furuniverse.

Unfortunately, Shadow the husky would have disappeared. In the story, he would live in cloudy lands within a furry dimension inspired by the general feel of Super Mario Galaxy.

Frankie, the small young dog, along with Al, Hina, and Lily—the twin sisters who are puppies—would live with their parents, step-parents, and older half-brother Scott, the young dog. They would live in a nice, old, massive underground pod connected to a large farmhouse, where an older male anthropomorphic duck farmer would sleep on the couch. JoJo and his younger sister would live in a nice portable home with older air-conditioning units mounted in the windows, located in beautiful farmland in the anthropomorphic duck world. That world would be another dimension, with everything ultimately connected by a common purpose in my fictional narrative. I would like to visit them. However, I know I would probably cry a lot when I finally saw them again. Speaking of my dogs living in another dimension, that's my latest ideation update for my fictional afterlife plan.

So yeah, that's all I had to say!

Almost Done!

YEP!!! This is going to be the last page of the Furry Selection Basement Online Docs that I want to write. That's it! Although I know it took much, much, much longer than expected to develop the Furuniverse—also known as FU-200—and its fictional belief system and narrative concepts, I just want to get everything finished as best as I can. Speaking of finally getting my own writing finished, it kind of sucks that it took me almost an entire year to develop this fictional narrative concept system when I originally expected it to take less time. I know it was difficult because this wasn't easy at all. In the Furuniverse, older and modern vehicles have engines and transmissions, but the technology, layouts, and philosophies behind them evolved very differently from those on Earth. This isn't limited to Furoria. Similar differences exist throughout the non-futuristic habitable planets of the Furuniverse. Yellow school buses are very common in North Auratheria, Auratheria (U.F.S.), Canidland, and Somborerio. They're also common in some parts of Xianyora, Ducklandia, and Liberen, and they're fairly common in some parts of Zulekore. However, yellow school buses are definitely not universally common throughout Furoria. In my fictional setting, handicapped-accessible yellow school buses with wheelchair lifts are generally built with low wheel wells and a full four-row interior layout because that provides enough space. They can also have a relatively high wheelchair capacity. This concept also applies to handicapped-accessible school-bus-style commercial buses and handicapped-accessible shuttle buses with foldaway seats. Many older and mid-generation school buses have generic-looking designs that resemble some familiar school-bus bodies, but they aren't exact copies or parallel versions of real-world models. Some have similarities to the International S-Series Schoolmaster, International 3700 and 3800, International 3000 and 3900, Freightliner FS-65, Blue Bird All American, Blue Bird CV200, Thomas Saf-T-Liner, and other school buses. Some also have body styles loosely resembling those associated with Carpenter, Blue Bird, AmTran, and other manufacturers. Again, these aren't exact copies or parallel versions of real-world vehicles. Depending on their generation, these buses can use three-speed automatics, four-speed automatics, five-speed automatics, or six-speed automatics. Three-speed transmissions are generally limited to older buses, while five- and six-speed automatics are more common in mid-generation and modern buses. Some three- and four-speed automatic transmissions have shift behavior and sound characteristics similar to Allison AT545-style transmissions. Older buses can also use manual transmissions. Older, mid-generation, and modern school buses can be powered by either diesel or gasoline engines. Many older and mid-generation buses are diesel-powered. They can use inline-six, V6, or V8 engines, although V6 engines are generally limited to older designs. Some older buses use turbocharged diesel engines, while many older buses also use naturally aspirated diesel engines. Mid-generation and modern diesel buses generally use turbocharged diesel engines. There are also many older and mid-generation gasoline-powered buses. These can use inline-six, V6, V8, or V10 engines. Modern gasoline-powered conventional school buses generally use V8 or V10 engines, similar to medium-duty vehicles. This concept isn't limited to Furoria and can also apply to other non-futuristic habitable planets in the Furuniverse and even to certain other dimensions. Every brand in the Furuniverse is different from Earth's brands. In Furoria, only eight countries have flags featuring stars and stripes. Auratheria, Ducklandia, and Liberen have red, white, and blue flags with stars and stripes. Cubén, Monkania, Suria, Valkoraya, and the Zulekorese Union also have flags featuring stars and stripes. As I said, this is another very, very long entry. I imagine that someday I could help restore old vehicles and work together with other people. I might even become a substitute school bus driver occasionally, but maybe… In the fictional narrative, this would happen after I was reincarnated as an anthropomorphic coyote before eventually being reborn as an anthropomorphic husky girl and living with a famous, wealthy family. In real life, however, driving gasoline-powered cars at speeds exceeding 100 mph (160 km/h) isn't safe or comfortable. It's too risky and isn't something I consider a good idea. In my personal opinion, I hate driving manual cars, and I really dislike the idea of owning one. I don't want to learn how to drive a manual transmission because I feel it would be dangerous for me. I like the idea of owning a Tesla with an autonomous driving system because, in my imagination, I could simply ride in it and let the vehicle handle the driving. However, in real life, autonomous driving systems still require appropriate attention and supervision and aren't a substitute for a human driver when the system requires intervention. Speaking of feeling unsafe about driving gasoline-powered cars and riding in a Tesla, that's all I have to say about that!

Monday, October 13, 2025.

Farewell... (Plus Another Long Talk)

Oh, coyotes... it feels unprecedented to me. I've spent months and months working on this, almost an entire year, writing personal journals and creating concept art, sometimes using ChatGPT to help me. I knew it! Thank God, 2025 has been one of the craziest years I've experienced so far. I've developed the Furuniverse reality for my fictional narrative concept much further than I originally expected. Yada yada yada… The Furuniverse and its other dimensions and realities are not representing any real-world events, real-life people or pets, whether they're living, deceased, present, or lost. They're also not intended to recreate human history or other real-world events. This is a fictional narrative concept. Even though developing it has been difficult as hell, I've put a huge amount of effort into it. Sometimes I feel as though my entire life has been positioned around monitoring wolf packs in forests, influencing them, and imagining stories about how their minds might be affected. But this isn't really about monitoring cats, coyotes or coyote packs, dogs, raccoons, or other animals. It's about creating stories that exist somewhere between fact and fiction. It's brave. It's fearless. It's influential. It's rising. It's peaceful. So yeah, pretty often, actually. Previously, I've talked about owning non-anthropomorphic pets after reincarnation, including miniature foxes, such as fennec-fox-like animals, normal-sized foxes, otters, especially miniature otters, raccoons, especially miniature raccoons, fish in an aquarium, and aquarium snails. Now I've also imagined owning hamsters, pocket-sized foxes or teacup foxes that are roughly the size of hamsters, miniature wolves, and miniature coyotes. In this fictional setting, the miniature wolves and coyotes would be smaller than their wild counterparts and roughly comparable in size to medium-sized dogs. They're essentially semi-medium-sized animals. So yeah, I would have a whole bunch of non-anthropomorphic animals to take care of, which would be absolutely crazy. In the fictional world, these animals would live unusually long lives after developing quickly through their early stages of life. They would also be much more intelligent than real-world domesticated animals, including my dogs. They would live in another reality, except for Shadow the husky, whom I used to have when I was a kid. In this fictional concept, these animals wouldn't experience fear, pain, or suffering. Oh yeah! After being reincarnated as an anthropomorphic coyote, I would set up habitats for small animals. I would love to see groups of miniature, fennec-fox-like foxes, hamsters, pocket-sized or teacup foxes, mice, rats, and other small animals. They would live in separate habitat enclosures owned and maintained by someone. These habitats could be located in private dormitories at HIVAC Fort Combine, other research facilities, or homes. Pets would also exist across other dimensions. Anyway, I know I don't trust the Internet very much. There are so many people posting content online through TikTok, Instagram, and other social media platforms, and sometimes I find certain content boring, diabolical, disorienting, uncouth, unfunny, unoriginal, or unsettling. Some topics involve things such as diagnoses, someone's passing or death, the loss of a pet, or other subjects that I personally don't want to engage with. I find some of this content pointless or worthless to me, and that's a feeling I can keep as part of this journal. However, it doesn't mean that the people involved are worthless or that their experiences don't matter. It simply means that I don't personally want to focus on those subjects. I don't really want to talk about it anymore. This is just so awful, and yet pathetic… I know I'm autistic, and I know that living in this world can be really, really difficult sometimes. Life can be complicated, hurtful, unfair, and overwhelming. But life can also be beautiful, fair, kind, and lovely. Acts of kindness, friendship, and love can make a huge difference. Unfortunately, there is also a lot of bad or harmful stuff on the Internet, including online gaming, so it's important to be careful about what you encounter and who you interact with online. So yeah, stay careful, stay positive, and stay safe. I won't say anything extremely serious for a while. Please respect that. I know that I am always a Furuniverse believer. Stephen Flint, hopefully you'll enter Furoria one day. I always remember you. Tragedies are no joke. It's always about awareness. Farewell...

Sincerely,
Rinty SkyCoyote
(formerly Rinty SkyHusky)

Bad News...

Unfortunately, my beloved small dog (Frankie) passed away today. I had that kinda small dog for 13 years, and I feel bad and sorry for him. However, most pets don't live very long, although some species can live much longer than others. Speaking of pet lifespans, I won't say anything too serious for a while, as it might hurt a lot of people’s feelings. Please always respect me, my family's, my friends', and my pets' privacy for this time.

Saturday, November 22nd, 2025

Today's my 21st birthday!

Yep! Today I just turned 21 years old! ;)

Tuesday, May 12th, 2026

MY NEW UPDATE!

So, I want Furoria to have very few nations, whether that's 3–5 or 6–10 nations. Nonetheless, the nations on Furoria developed independently, which means its nations did not follow the same historical paths as those on Earth, because Furoria is an original fictional world that developed independently, rather than an alternate timeline, parallel, or hidden version of Earth. While some technology and inventions resemble those on Earth, they were developed independently within Furoria's own history. I also want Furoria to have only a few major languages and dialects, meaning that its few major languages and dialects evolved independently, rather than being related to Earth's languages or language families. Therefore, languages such as Arabic, Chinese, English, French, German, Japanese, Russian, Spanish, Ukrainian, and others do not exist on Furoria as in-universe languages.

Today, there are 195 widely recognized sovereign states, including 193 United Nations member states. There are over 7,100 languages spoken worldwide. A fictional world doesn't need to have the same number of languages, nations, or other features as Earth's, especially if it's not meant to be an alternative, hidden, or parallel version of Earth. Earth has enormous diversity largely because of its very long history. Earth has existed for about 4.5 billion years, and life has been evolving for billions of years. Over extremely long periods of time, many processes created the diversity we see today: evolution over vast timescales, geographic isolation, changing climates and environments, human migration and settlement, language evolution, and the long history of humanity and civilization. A fictional world doesn't need to have the same level of diversity as Earth, especially if it's not meant to be an alternative, hidden, or parallel version of Earth.

ABOUT HIM:

Stephen Flint AKA Rinty SkyCoyote is the Internet personality, modder, and creator & inventor of the Furuniverse, the (fully fictional) multiversal worldbuilding project (and personal metaphysical belief system, but only in-universe/lore sense) for his fictional narrative concept, but things doing something right for him. He also modified mods for ETS2, ATS, and other games, but he added or replaced those engine sounds for vehicle mods as well.

YEP! THESE ARE TWO OF MY SEMI-BIG DAWGS!
